The death of Mr. CONRY was announced in the House about 7 o'clock. Because of the unusual pressure of legislation a final adjournment was not taken, but on motion of Representative FITZGERALD, of New York, the House, out of respect, took a recess.

The body will be taken to New York and the funeral will be held Tuesday, March 6.

CONGRESSMAN CONRY DEAD—NEW YORK CITY REPRESENTATIVE PASSES AWAY IN WASHINGTON.

WASHINGTON, *March 2.*

Representative MICHAEL F. CONRY, of New York City, a Democratic Member of Congress for four terms and reelected for a fifth, died at a hospital here late to-day after a long illness from kidney trouble. He was 47 years old. In spite of his failing health he had been at the Capitol quite regularly until last week, and as a member of the Ways and Means Committee had worked hard in connection with framing the revenue bill and other legislation.

A native of Shenandoah, Pa., Mr. CONRY in his youth was a miner and in following that trade sustained an injury that lamed him for life. He leaves a widow and three daughters.

—

[From the Brooklyn (N. Y.) Times, Saturday, Mar. 3, 1917.]

CONGRESSMAN MICHAEL CONRY DIES—REPRESENTATIVE FROM MANHATTAN FOR FOUR TERMS—HOUSE ADJOURNS.

Representative MICHAEL F. CONRY, of New York City, a Democratic Member of Congress for four terms, died yesterday in the Providence Hospital, Washington, of heart and kidney trouble. He was New York's

Democratic member of the Ways and Means Committee. The House adjourned for an hour yesterday in respect to Congressman CONRY'S memory. Because of the immense legislative pressure the House did not follow its usual custom of adjourning early.

Mr. CONRY was born in Shenandoah, Pa., April 2, 1870. He taught school, was a newspaper reporter, a public accountant, and then studied law in the University of Michigan, graduating in 1896. He came to New York and formed a law partnership with Edward D. Dowling, with offices at 280 Broadway. For two years he served as assistant corporation counsel, and was nominated for Congress for the first time in 1908.

Representative CONRY'S death may have an important effect on the political situation in the House next session. The Democrats and Republicans elected 215 Members each, with 5 independents. Next sessions the Democrats will have but 214 votes.

CONRY DIES; G. O. P. GRIP ON HOUSE TIGHTER—DEMOCRATS NOW LACK FOUR VOTES NECESSARY FOR MAJORITY CONTROL IN SPEAKERSHIP FIGHT—URGE WHITMAN TO HURRY SPECIAL ELECTION—REPUBLICANS CLAIM ENOUGH VOTES TO ELECT MANN.

WASHINGTON, *March 2.*

Congressman MICHAEL F. CONRY, of the seventh New York district, died after a lingering illness at Providence Hospital, this city.

The news of Mr. CONRY'S death was communicated to the House by Representative FITZGERALD, of New York, who spoke feelingly of the late Congressman's life and services. Minority Leader MANN and Representative BENNET, also of New York, joined in a tribute to the departed Member. A recess of the House was taken as a mark of respect.

Mr. CONRY'S death makes the third to occur among the membership of the present session. SAMUEL J. TRIBBLE, of Georgia, and DAVID F. FINLEY, of South Carolina, died earlier in the session.

SERVED FOUR TERMS.

Mrs. Conry and one of her daughters have been in Washington for about two weeks. The other two children—Katherine, 9, and Claire, 7—have been with the family of J. V. Kiely, at No. 116 East Fifty-fourth Street. They knew that their father had been ill since Wednesday, but were not told of his death.

MICHAEL F. CONRY was born in Shenandoah, Pa., April 2, 1870. He was educated in the public schools of his native town, and afterwards taught school for seven years. He was graduated in 1896 from the University of Michigan, receiving the degree of LL. B. He entered the legal profession, and was for a while an assistant corporation counsel of New York.

He was elected to the Sixty-first, Sixty-second, Sixty-third, and Sixty-fourth Congresses.

The body will be taken to New York to-morrow by Mrs. Conry, and the funeral will take place there Tuesday morning. Speaker CLARK named a committee, including the New York delegation in the House, to attend the services.

[From the New York City Times, Saturday, Mar. 3, 1917.]

CONGRESSMAN CONRY, OF NEW YORK, DIES—DEMOCRATIC MEMBER FROM THE FIFTEENTH DISTRICT A VICTIM OF BRIGHT'S DISEASE—ALTERS DIVISION IN HOUSE—TWO PARTIES WERE EQUALLY DIVIDED IN NEXT CONGRESS—SPECIAL ELECTION NECESSARY.

WASHINGTON, *March 2, 1917.*

Representative MICHAEL F. CONRY, of the fifteenth district of New York, died here this afternoon at 5.30 o'clock at Providence Hospital. At 7 o'clock the House was officially informed of the death of the New York Member, and a recess of one hour was taken in respect to his memory. The congestion of legislation so near the end of the session prevented an adjournment of the House.

Aside from the shock felt in the House over the sudden death of Mr. CONRY, there was concern to-night over the political effect of a vacancy in the House membership because of the possibility of an extra session of the Sixty-fifth Congress. The Democrats and Republicans of the next House are evenly divided, with five independents holding the balance of power. The death of a Member on either side gives an advantage to the other should an extra session become necessary.

The Republican governor of New York has authority to call a special election to fill Mr. CONRY'S seat, but Members here can not predict when such an election will be held.

Mr. CONRY had not been in the best of health for several weeks, but was able to be in the House last Monday. He was taken to the hospital that day, and rapidly grew worse until he became unconscious to-day. Bright's disease is said to have been the cause of his death. Word came to Mr. CONRY'S colleagues this afternoon that as a last resort physicians were attempting to draw the poison from Mr. CONRY'S system by the "sweating process."

The body of Representative CONRY will be taken to New York to-morrow, but the funeral will not be held until next Tuesday. The congressional committee which will be named to attend the funeral will go to New York on Monday evening.

Representatives HULBERT and DRISCOLL, of New York, and COADY, of Maryland, were at the bedside of Representative CONRY when he died. Mrs. Conry and one daughter were also present. Mr. CONRY leaves two other daughters, who are attending school in New York.

Tears were in the eyes of Representative JOHN J. FITZGERALD, dean of the New York delegation, as he announced Mr. CONRY'S death to the House. "Owing to the unusual condition of the public business," said Mr. FITZGERALD, "it would be impossible to hold memorial services before the end of the session."

"In the circumstances," said Mr. FITZGERALD, "it is impossible for the House to adjourn, but in respect to the memory of Mr. CONRY the House will stand in recess. Mr. CONRY was finishing his eighth year as a Member of this body. He had won the respect and admiration of all his colleagues because of his uprightness, his industry, and his manly qualities. The loss of Mr. CONRY will be keenly felt by all the Members from the State of New York and all Members of this House.

"Laboring as he was under severe physical affliction, everyone admired the courage and fidelity with which MICHAEL CONRY attended to his duties, and everyone, I am sure, feels the deepest sympathy for his wife and children."

Representative JAMES R. MANN, the Republican floor leader, said:

"Mr. CONRY earned and received the respect and affectionate regard of all the Republicans of the House as well as the Democrats. There have been few men in the House for whom Members entertained so high a personal regard as for this man. Despite his physical disabilities he always had a smile and a way about him that endeared him to everybody."

Representative WILLIAM S. BENNET, a New York Republican, said:

"What has just been said expresses fittingly the feeling on both sides of the House regarding Mr. CONRY. I could add nothing but to say it voices the feeling of the entire New York delegation and the House as well."

—

[From the New York Sun, Saturday, Mar. 3, 1917.]

REPRESENTATIVE M. F. CONRY DIES; HOUSE LEAD TO G. O. P.—NEW YORK CITY CONGRESSMAN SUCCUMBS TO HEART AND KIDNEY DISEASES.

WASHINGTON, *March 2.*

Representative MICHAEL F. CONRY, of New York City, a Democratic Member of Congress for four terms and elected for a fifth, died at the Providence Hospital here this afternoon of a complication of heart and kidney diseases.

His death may have an important effect on the political complexion of the House in the next session. The Democrats and Republicans elected 215 Members each, and there are five independents. If an extra session is called, the Democrats would now be represented by only 214 votes, as it is not likely that Mr. CONRY'S successor will be elected until the November election. Even if a special election were arranged, it could not be held for 30 days.

Mr. CONRY represented the fifteenth New York district, which is strongly Democratic; so his successor will almost surely be a Democrat, but until his successor is elected the Republicans will have one vote more than the Democrats.

Mr. CONRY carried on to the last one of the most courageous fights against ill health and death itself that the House has seen in years. He was the real leader of the New York Democratic delegation, and was New York's Democratic member of the Ways and Means Committee.

He had been in ill health for several years, but had refused to permit this to interfere with his important legislative duties. This session he has insisted upon attending every meeting of the House when legislation of importance to his State or party was under consideration. He was there not only to give his vote but to fight in behalf of the measures he advocated. He led the fight for pneumatic postal tubes for big cities when he should have been in bed. The result was a series of physical collapses from the start of the session. He finally collapsed last Friday after a tremendously active day for a man in his condition.

Because of the immense legislative pressure the House did not follow its custom of adjourning early in respect to his memory, but a recess was taken from 7.10 until 8 o'clock this evening.

The body will be sent to New York to-morrow and burial will be on Tuesday. Mr. CONRY leaves a widow and three daughters.

Mr. CONRY was born in Shenandoah, Pa., April 2, 1870, and was educated in the public schools there. He taught school, was a newspaper reporter, a public accountant, and then went to the University of Michigan to study law. He was graduated in 1896.

He returned to New York and formed a law partnership with Edward D. Dowling, with offices at 280 Broadway. He was assistant corporation counsel for two years and in 1908 was nominated for Congress for the first time. He was elected then and at each succeeding election.

NEW YORK CONGRESSMAN DEAD IN CAPITAL—M. F. CONRY SUCCUMBS TO KIDNEY TROUBLE—MAY AFFECT DEMOCRATIC BALANCE IN THE NEXT HOUSE.

WASHINGTON, *March 2.*

Representative MICHAEL F. CONRY, of New York City, a Democratic Member of Congress for four terms and reelected for a fifth, died at a hospital here late to-day, after a long illness from kidney trouble. He was 47 years old.

In spite of his failing health, he had been at the Capitol regularly until last week, and, as a member of the Ways and Means Committee, had worked hard in connection with framing the revenue bill and other legislation.

A native of Shenandoah, Pa., Mr. CONRY in his youth was a miner. In following that trade he received an injury that lamed him for life. He is survived by a widow and three daughters.

The death of one of the Democratic Members elect may have an important effect on the political complexion of the House in the Sixty-fifth Congress. The Democrats and Republicans elected 215 Members each, and there are 5 independents, on whom depends which party shall organize the next House.

If an extra session were called, the Democrats probably would go into the organization fight only 214 strong.

Members of the New York delegation believe that a successor to Representative CONRY will not be elected until November. Election of a Democrat then would restore the even balance before the regular December session. Representative CONRY, active in Tammany councils, was from a safely Democratic district, the fifteenth.

The body will be taken to New York to-morrow by Mrs. Conry, and the funeral will take place there Tuesday morning. Speaker CLARK named a committee, including the New York delegation in the House, to attend the services.

The House this evening, in Committee of the Whole, voted for the widow of Representative CONRY $7,500.

CONGRESSMEN AND 400 MAIL CARRIERS AT CONRY FUNERAL—FATHER ALEXIS EULOGIZES POPULAR REPRESENTATIVE, CALLING HIM A MARTYR TO DUTY.

Four hundred letter carriers, whose cause was long championed by Congressman MICHAEL F. CONRY, hurried through their morning deliveries yesterday to take a little time to attend his funeral. They were among the most sincere mourners of the Congressman who often aided them.

Bishop Patrick J. Hayes, assisted by other priests, celebrated a solemn high mass of requiem in St. Stephen's Church, in East Twenty-eighth Street. A large delegation of Members of the House, headed by Speaker CHAMP CLARK and two Members of the Senate, attended.

Fellow Representatives present were GRIFFIN, MAHER, RIORDAN, LOFT, FARLEY, DOOLING, PATTEN, CAREW, CHANDLER, SIEGEL, HULBERT, BRUCKNER, BENNET, OGLESBY, PLATT, DRISCOLL, SMITH, LONDON, and CALDWELL, of New York; O'SHAUNESSY, of Rhode Island; EAGAN, SCULLY, and HAMILL, of New Jersey; MORIN, LIEBELL, and FARR, of Pennsylvania; GALLIVAN and TREADWAY, of Massachusetts; TAGGART, of Kansas; GALLAGHER, of Illinois; SMALL, of North Carolina; and LONERGAN, of Connecticut.

Others from Washington were United States Senators ROBINSON, of Arkansas, and SHAFROTH, of Colorado; Robert Gordon, Sergeant at Arms of the House; P. J. Haltigan, reading clerk of the House, and most of the Tammany district leaders.

Father Alexis eulogized Mr. CONRY as a martyr to duty. The burial was in Calvary Cemetery.

The pallbearers, all personal friends, were E. D. Dowling, Charles Goldstein, P. J. Haltigan, Andrew J. Sheridan, M. J. Cruise, and Judge J. L. Walsh of the city court.

The Elks, of whom the Congressman was a member, held services Tuesday night.

MICHAEL F. CONRY BURIED—CAPITOL DELEGATION AT FUNERAL OF REPRESENTATIVE.

Solemn high requiem mass was held in St. Stephen's Church yesterday morning for Representative MICHAEL F. CONRY, who died in Washington last Friday. Bishop Patrick J. Hayes was the celebrant. Several Senators and a delegation from the House, headed by Speaker CHAMP CLARK, attended.

The church was draped in mourning. The center was reserved for the Washington delegation. There were many city officials present. Intimate friends of Mr. CONRY acted as pallbearers. They were E. D. Dowling, Charles Goldstein, P. J. Haltigan, Andrew J. Sheridan, M. J. Cruise, and Justice J. L. Walsh of the city court.

Others present were United States Senators ROBINSON, of Arkansas, and SHAFROTH, of Colorado; Representatives FITZGERALD, GRIFFIN, MAHER, FLYNN, RIORDAN, LOFT, FARLEY, DOOLING, PATTEN, CAREW, CHANDLER, SIEGEL, HULBERT, BRUCKNER, BENNET, OGLESBY, PLATT, DRISCOLL, SMITH, LONDON, and CALDWELL, of New York; O'SHAUNESSY, of Rhode Island; EGAN, SCULLY, and HAMILL, of New Jersey; MORIN, LIEBEL, and FARR, of Pennsylvania; GALLIVAN and TREADWAY, of Massachusetts; TAGGART, of Kansas; GALLAGHER, of Illinois; SMALL, of North Carolina; LONERGAN, of Connecticut.

Four hundred letter carriers also attended. In Congress Mr. CONRY had been a champion of the postmen. Interment was in Calvary Cemetery.

—

[From the Brooklyn (N. Y.) Eagle, Wednesday, Mar. 7, 1917.]

LAST TRIBUTE TO CONRY—CHAMP CLARK AMONG THOSE AT REPRESENTATIVE'S FUNERAL.

Before a large assemblage, including many public men, Bishop Patrick J. Hayes, assisted by a number of priests, celebrated a solemn high mass of requiem to-day in memory of the late Representative MICHAEL F. CONRY, who died in Washington last Friday. The services were held in St. Stephen's Church on East Twenty-eighth Street, Manhattan, and interment was in Calvary Cemetery.

A delegation from the House of Representatives, several United States Senators, and local officials who had known the deceased Congressman all his life were present.

Personal friends acted as pallbearers. They were E. D. Dowling, Charles Goldstein, P. J. Haltigan, Andrew J. Sheridan, M. J. Cruise, and Justice J. L. Walsh of the city court.

Speaker CHAMP CLARK attended. The Congressmen who accompanied him as members of the official delegation included: FITZGERALD, GRIFFIN, MAHER, FLYNN, RIORDAN, LOFT, FARLEY, DOOLING, PATTEN, CAREW, CHANDLER, SIEGEL, HULBERT, BRUCKNER, BENT, OGLESBY, PLATT, DRISCOLL, SMITH, LONDON, and CALDWELL.

[From the New York City Herald, Thursday, Mar. 8, 1917.]

MASS OF REQUIEM FOR M. F. CONRY—SPEAKER CLARK ATTENDS SERVICES IN ST. STEPHEN'S FOR THE LATE REPRESENTATIVE.

Bishop Patrick J. Hayes, assisted by several priests, yesterday in St. Stephen's Church celebrated a solemn mass of requiem for Representative MICHAEL F. CONRY, who died in Washington last Friday. The services were attended by a large assemblage of distinguished men, including a delegation from Congress headed by Speaker CHAMP CLARK.

Personal friends who acted as pallbearers were E. D. Dowling, Charles Goldstein, P. J. Haltigan, Andrew J. Sheridan, Michael J. Cruise, and Justice J. L. Walsh. The church was draped in mourning.

—

[From the New York City Sun, Thursday, Mar. 8, 1917.]

MANY CONGRESSMEN AT CONRY FUNERAL—SPEAKER CLARK HEADS DELEGATION—400 LETTER CARRIERS ALSO ATTEND.

CHAMP CLARK headed a delegation of Congressmen who attended funeral services for the late Representative MICHAEL F. CONRY in St. Stephen's Roman Catholic Church in East Twenty-eighth Street yesterday. The Speaker has attended only one other funeral in recent years, but his regard for Mr. CONRY was such that he felt compelled to come to New York on this occasion.

With him were 21 other New York Representatives and several from other States, as well as several United States Senators and many city officers and friends of Mr. CONRY. Personal friends, acting as pallbearers, were E. D. Dowling, Charles Goldstein, P. J. Haltigan, Andrew J. Sheridan, M. J. Cruise and Justice J. L. Walsh, of the city court.

More than 400 letter carriers, whose fight for better working conditions Mr. CONRY championed in Washington, entered the church when they had finished their early morning deliveries. Among others present were Robert Gordon, Sergeant at Arms of the House; P. J. Haltigan, reading clerk of the House; John R. Voorhis, grand sachem of the Society of Tammany, and most of the leaders of Tammany Hall.

Bishop Patrick J. Hayes, assisted by a number of priests, celebrated a solemn high mass of requiem. Burial was in Calvary Cemetery.

—

[From the New York City Times, Thursday, Mar. 8, 1917.]

MANY MOURN M. F. CONRY—SPEAKER CLARK AND CONGRESSIONAL DELEGATION AT HIS FUNERAL.

Speaker CHAMP CLARK and a delegation from the House of Representatives and two Senators attended the funeral services here yesterday of Congressman MICHAEL F. CONRY, who died in Washington on Friday. Bishop Patrick J. Hayes, assisted by a number of priests, celebrated a solemn high mass of requiem in St. Stephen's Church, East Twenty-eighth Street. The interment took place in Calvary Cemetery.

At the conclusion of the religious part of the services the Rev. Father Alexis, a missionary of Hoboken, referred to the career of Mr. CONRY, to his many acts of charity, and said the late Congressman had died a martyr to duty and to his country.

Personal and political friends of Mr. CONRY filled the church. Among them were 400 letter carriers and post-office employees, whose welfare had always been a subject of consideration in his public work.

The delegation, headed by the dean of the New York Representatives, JOHN J. FITZGERALD, of Brooklyn, included Congressmen GRIFFIN, MAHER, FLYNN, RIORDAN, LOFT, FARLEY, DOOLING, PATTEN, CAREY, CHANDLER, SIEGEL, HULBERT, BRUCKNER, BENNET, OGLESBY, PLATT, DRISCOLL, SMITH, LONDON, and CALDWELL, of New York; EAGAN, SCULLY, and HAMILL, of New Jersey; MORIN, LIEBEL, and FARR, of Pennsylvania; TAGGART, Kansas; GALLAGHER, Illinois; SMALL, North Carolina; LONERGAN, Connecticut; and O'SHAUNESSY, Rhode Island. The Senators were ROBINSON, of Arkansas, and SHAFROTH, of Colorado.

Mr. CONRY, who represented the Democratic fifteenth district, lived at 141 East Twenty-sixth Street.

Navy League Odds and Ends.

SPEECH

OF

HON. CLYDE H. TAVENNER,

OF ILLINOIS,

IN THE HOUSE OF REPRESENTATIVES,

Tuesday, January 30, 1917.

The House in Committee of the Whole House on the state of the Union had under consideration the bill (H. R. 20573) to provide increased revenue to defray the expenses of the increased appropriations for the Army and Navy and the extensions of fortifications, and for other purposes.

Mr. TAVENNER. Mr. Chairman, the title of the bill under discussion gives a very good idea of its purpose. It reads:

A bill (H. R. 20573) to provide increased revenue to defray the expenses of the increased appropriations for the Army and Navy and the extensions of fortifications, and for other purposes.

The measure might also be labeled "A bill to discourage militarism in the United States." If I did not believe that it would serve some such useful purpose as that I would not vote for it.

The bill provides for a tax on excess profits. If those who are making excess profits have any just reason to complain at being required to pay additional taxes for so-called preparedness, how much more justified would be the average working man who in these days of high cost of living finds it difficult merely to feed and clothe his family, to say nothing of laying aside anything for a "rainy day" due to sickness or lack of employment.

This tax will fall heaviest on the munitions makers and big business. And it should fall heaviest on this class, because it is the munitions makers and the big industrial trusts that will draw down, in the form of fat contracts for preparedness supplies, a large portion of the millions now being appropriated for preparedness.

Another reason that a larger proportion of the cost of so-called preparedness should be placed on this class is that this is the class principally responsible for the staggering increases in Army and Navy appropriation bills.

The recent reign of agitation for preparation for war was the child of the munitions makers and of men who owned stock in munitions-making concerns. The propaganda started with the J. P. Morgan-controlled Navy League of the United States. I consider it my duty also to state the fact that in both the House of Representatives and Senate of the United States the particular Member thereof who started the present era of preparedness-for-war agitation were at the time they started

such agitation in the respective Houses of Congress stockholders in war-trafficking concerns. The same men are now leading the agitation for war. One of the public officials to whom I refer was publicly advocating the entrance of the United States in the European war as early as August 21, 1915.

I do not charge that these public officials started the agitation for increased appropriations in order to make increased profits, yet I consider the fact that they did own stock to be of sufficient importance to call to the attention of the American people for their consideration. The motive of an individual in a matter of this kind is purely a mental process, and it is impossible to prove what a man's motive may or may not be. In the language of Senator JOHN SHARP WILLIAMS, of Mississippi, "nobody but God can judge the intentions of men except by the outward appearance of things." I therefore make no charge as to the motive of Members of Congress who, with their relatives, own or owned stock in munitions firms.

But I do strongly assert the principle that any Member of Congress who owns or has owned since his election to Congress stock in a war-trafficking firm, or whose wife owns stock in a war-trafficking firm, or whose daughter owns stock in a war-trafficking firm, should not be permitted to take part in the debates on the great preparedness bills, on the policy of Government manufacture of munitions as compared with their manufacture by private contractors, nor on war. Much less should such Members be permitted to vote on these questions. If one of us was being examined as a prospective juryman in a suit involving a street railway company, and while being examined should state that either our wife or our daughter or our cousin was a stockholder, we would promptly be excused. It is conceded by the legal fraternity everywhere that a person having a financial interest in a suit, or a person whose relatives have a financial interest in a suit, is disqualified to sit as a juror. If it is improper for a man who owns or whose relatives own stock in a street railway company to sit as a juror, whose duty it will be merely to consider the application of the law, how much more improper is it for a man thus concerned to be permitted to actually make the law or have a hand in the making of it? Surely the welfare of the Republic is as sacred as the welfare of any street railway company.

I submit that the defense of our Republic is, or should be, the most sacred and important duty that legislators have to perform. There should be no room even for suspicion that a Member of Congress, or his relatives, might profit financially from legislation having to do with the safety of the Nation. Problems of adequate defense, of whether Government establishments should "prepare" us at actual cost or private munitions firms at large profit, and last but not least, of international questions involving war, can best be solved in the interest of the Republic if they are left in the hands wholly of legislators who have no investments at stake and who would therefore be beyond the possibility of being unconsciously influenced in favor of some particular program which might yield the largest profits.

To return to the subject under discussion, I reiterate that increased revenue for preparedness for war should not be raised by a further increase of the tax on the necessaries of life, but should be placed on the class responsible for the colossal increases in Army and Navy expenditures.

The agitation for the increased appropriations started with the Navy League, and the cry was almost immediately taken up by every form of big business and special privilege. The munitions and shipbuilding industries are controlled by the same group of capitalists who control the insurance companies, the railroads, the steamship companies, the express companies, the great Wall Street banks, and most of the powerful industrial corporations of the United States.

It was these interests, all of which are to a greater or lesser extent under the domination of J. P. Morgan & Co., that started the agitation for preparedness. And the same influences are to-day inciting the Nation to war. Wall Street first demanded preparation for war, and when it got appropriations for the Army and Navy increased by hundreds of millions of dollars it started in for the real thing, war. Wall Street has its billions tied up with the cause of the allies, and it is a tradition that the heart and sympathy of Wall Street will invariably be found sojourning in the vicinity of its money bags.

The Nation should discount any move for war by men or newspapers known to be directly or indirectly affiliated with Morgan & Co., especially until the President of the United States announces it is time for war. Morgan & Co. are the accredited agents in the United States of the British Government. This is a strong statement to place in the CONGRESSIONAL RECORD. I would not do so did I not have high authority. My authority is Lloyd George, the present premier of Great Britain. The London Daily Chronicle of June 24, 1915, quotes Lloyd George as follows in a speech before the House of Commons:

> In consequence of the great importance of the American and Canadian markets, I have asked Mr. D. A. Thomas—[cheers]—to go over and assist in developing that side of the work. He will exercise control over the production of munitions in Canada and the States, and will be given the fullest authority. Mr. Thomas will act in cooperation with the representatives of the Government in the States and in Canada. There is not the slightest idea of superseding the existing agencies there. These agencies have worked admirably, and, I believe, have saved this country millions of money. He will cooperate with Messrs. Morgan & Co., the accredited agents of the British Government.

It was neither the farmers of the Nation nor the members of organized labor who demanded that the Nation be turned into a military camp. They did not demand that the country be placed on a war footing, because they had no secret desires or hopes that this Nation should participate in the European war.

We have the word of the country's ardent militarists that it was not the plain, common people of the Nation who demanded that a military autocracy be established in the United States. I refer to a statement of Ralph M. Easley, chairman of the executive council of the National Civic Federation. In a letter sent to members of this organization Mr. Easley said:

> The second fact which stares us in the face is that in all movements for preparedness—defense leagues, security leagues, etc.—there are enrolled neither the workingmen nor the farmers of the country. On the executive boards of these organizations not one representative of either of these classes can be found, while they are found without number in all of the antipreparedness and various brands of peace organizations. * * * In any war 80 per cent of our Army would necessarily come from these classes.

No; the agitation for the thing which is responsible for Europe being in its present predicament did not originate with the purely patriotic people of the Nation who will do the dying if we go to war, but with men who will do the profit making. For the militaristic propaganda is the child of the Navy League of the United States, and the Navy League is the child of the armor and munitions makers and various other interests that make profit from war and preparation for war.

It is true, however, that A. M. Dadmun, secretary of the Navy League, sent a letter to Members of Congress on January 13, 1914, in which he made this statement.

> Certain Congressmen have insinuated that the league is supported by people who are interested in the sale of war materials to the Navy. They are entirely mistaken.

Mr. Dadmun, in a letter published in the January, 1916, issue of Pearson's Magazine, reiterated that the men back of the Navy League "are men who will not profit by the results of the league's propaganda."

On December 15, 1915, I called the attention of Congress to the amazing extent to which men affiliated with the Navy League are also connected with concerns or industries which stand to profit from "preparedness." No Member of the House has challenged the statements made on that occasion.

Since my days in the House of Representatives are numbered, and I may not have another opportunity to lay this matter before you, I desire to again present proof in support of my charge that the Navy League has been little more than a branch office of the house of J. P. Morgan & Co. and a general sales-promotion bureau for the various armor and munitions makers and the steel, nickel, copper, and zinc interests.

If I make any statement that any gentleman here is disposed to question, I hope he will arise in his place and do so while I am still in Congress, ready and prepared to defend my statements.

I submit that if there is any source from which we are justified in accepting information as accurate as to the identity of the gentlemen back of the Navy League, we are justified in accepting as accurate and truthful the information relative to the formation of the organization as it is presented in the league's own publications.

I hold in my hand the bound Navy League Journal for 1904. I obtained this document from the Library of Congress, where it was filed as being "The official organ of the Navy League of the United States." That is the assurance given on the first page. This journal is officially indexed in the Library of Congress as follows: Class V 1, Book N 8. The date of receipt at the periodical division of the Library of Congress of the particular number of the Navy League Journal from which I desire to quote is February 3, 1904.

On page 32 of the February, 1904, number of this "official organ of the Navy League" I find a list of 19 names under the head "Founders" of the Navy League.

As we proceed to take note of the occupations of some of the 19 gentlemen who were listed as the "founders" of this "wholly patriotic" organization, let us keep in mind the assertion of Mr. Dadmun, the patriotic secretary, that they were

"men who will not profit by the results of the league's propaganda."

One of the 19 names is that of the Midvale Steel Co. Did Mr. Dadmun have the name of this "founder" in mind as "men who will not profit"? Up to date this concern has received contracts from the Navy Department for armor plate alone which aggregate $20,398,188.

Another name in the list is that of Charles M. Schwab. Mr. Schwab is now chairman of the board of directors of the Bethlehem Steel Co., which firm to date has drawn down contracts for armor plate aggregating $49,153,309.

Then, I see here the name of J. P. Morgan, who organized the United States Steel Corporation, owner of the Carnegie Steel Co., which has already received $46,612,492 from Uncle Sam for the single item of armor plate.

There are only three concerns in the United States that manufacture armor plate, and it is a rather peculiar coincidence that when the purely patriotic Navy League was coming into existence the names of men identified with each of these concerns should be listed by the Navy League Journal, "the official organ of the Navy League," as "founders."

The three firms indicated have sold to the Navy Department a total of 264,039 tons of armor plate, receiving an average price of $439.95 a ton, or a total of $116,163,989. They have also received orders for munitions, submarines, and other supplies from the Army and Navy Departments aggregating probably another $100,000,000. There have been 10 official estimates by Government officials as to the cost of armor plate in a Government factory, and the average of those estimates is $251 per ton. If we subtract $251, the estimated average cost in a Government plant, from $439, the average price paid the armor ring, and consider that we have purchased 264,039 tons of armor alone at this price, it becomes difficult to agree with Mr. Dadmun that the league was backed by "men who will not profit by the results of the league's propaganda."

But while it is true that there were but three firms manufacturing armor at the time this list of "founders" was published in the league's official journal, there was a concern which made a royalty on all the armor manufactured because of owning the patent on the process used for hardening steel. This was the Harvey Steel Co. Was the Harvey Steel Co. in the vicinity when this list was being arranged? The Harvey Steel Co. was on the ground, as is evidenced by the fact that the name of S. S. Palmer, its president, and Benjamin F. Tracy, its attorney and also an ex-Secretary of the Navy, were included in the list of 19 immortals.

The Nickel Trust was represented by Robert M. Thompson, chairman of the board of directors of the International Nickel Co.

Other names listed as "founders" were those of Herbert L. Satterlee, brother-in-law of J. P. Morgan; George B. Satterlee, United States representative of the Krupps-Gruson Iron Works, of Germany; Clement A. Griscom, later a director of United States Steel, William Cramp Ship & Engine Building Co., Electric Boat Co., builders of submarines, and many other Morgan corporations; Robert S. Sloan, of New York, who acquired from his father's estate stock in such war-trafficking firms as United States Steel, Canadian Car & Foundry, General Electric, and Illinois Steel; Anson Phelps Stokes, a partner in the firm of Phelps, Dodge & Co., holders of large copper-mining interests; Jacob W. Miller, fellow director of Morgan on the New York, New Haven & Hartford Railroad Co.; George Westinghouse, president and director of 30 corporations, with an aggregate capital of $120,000,000; Harry Payne Whitney, at the time a fellow director of Morgan on numerous enterprises and now a director of the Guaranty Trust Co., a Morgan concern, which is the transfer agent for the Westinghouse, American Car & Foundry Co., Atlas Powder Co., and other munitions concerns; John Jacob Astor, a fellow director of Morgan when he became founder of Navy League.

Mr. FARR. Will the gentleman yield?

Mr. TAVENNER. Yes.

Mr. FARR. Does the gentleman think that because a man is in that business that that should deprive him of the elements of patriotism?

Mr. TAVENNER. No; not necessarily. I am perfectly willing that these gentlemen should advocate the purchase of their wares by the Government, but I want them to do it in their real capacity as munitions makers and not by attempting to hide their true identity in the folds of the American flag, making "patriotism the means and private profit the end." They should be made to remove the words "Purely Patriotic" from the Navy League's literature and substitute "America's Leading Munitions Makers." I have never stated that it is a crime under the law for stockholders of war-trafficking concerns to have been the "founders" and principal backers of the Navy League; I am merely insisting that it is a fact that they were; the Navy League officials are trying to make it appear it was not the fact.

Mr. FARR. We have a Navy League organization in my district, not one member of which is interested in munitions. It is made up of reputable men, interested in the welfare of their country and anxious that it be safeguarded against attack.

Mr. TAVENNER. That is all right; my point is that the Navy League was conceived and, according to the league's own official organ, founded by the munitions makers. The work was soon after taken up by various forms of big business, and then many sincere and patriotic people fell in, not knowing they were being made the dupes of men who had armor and munitions to sell.

Mr. DYER. Will the gentleman yield?

Mr. TAVENNER. Yes.

Mr. DYER. Are any of these men now connected with the Navy League?

Mr. TAVENNER. I am not able to state to just what extent the men who first backed the league are now connected with it. I know that since I first directed the attention of Congress to the men running the league, some of the munition makers have quietly dropped out. I know that at the first session of the league following my Navy League references in Congress the name of J. P. Morgan disappeared from the list of directors on the league's official stationery. Morgan and Morgan's men had been the guiding spirits of the organization throughout its history. Along about the same time Morgan took a rear seat a Wall Street journal printed an article hinting that it would be advisable for men affiliated with munitions firms not to be taking such prominent parts in agitation for "preparedness."

Mr. FARR. Will the gentleman again yield?

Mr. TAVENNER. Yes.

Mr. FARR. In view of the fact that we are a poor fourth in naval strength, does not the gentleman think that we ought to compliment these men who saw our danger and our inadequacy?

Mr. TAVENNER. I do not want to see this country in such a state of preparedness for war as to encourage the Government to unnecessarily enter the European war. That war ought to prove to any reasonable minded person that over-preparedness is not a guarantee of peace as the jingoes claim, but rather an assurance of war. The European war is an unnecessary war, if there ever was an unnecessary war. If the three monarchs who rule Great Britain, Russia, and Germany had desired to have avoided war they could have assembled around a table and in 15 minutes compromised their differences. But it appears they were prepared for war and actually desired it. I am convinced in my own mind that if they had not been so overprepared for war they would not have been so anxious to have entered into it. But Germany had her great giant military machine and her war plans all carefully worked out in advance, and no doubt felt absolutely confident of victory. So it was also with Great Britain. I know it is contended by some that Great Britain was not ready, but there is nothing to sustain that view. If a nation having the greatest and strongest fleet in the world can not be considered as reasonably "prepared," what hope can any nation with a much smaller navy have of ever being "adequately" prepared? Great Britain knew that she had the greatest fleet that ever sailed the seas, and was undoubtedly confident that with this great sea power she could gradually and effectively blockade Germany into submission. Great Britain had been spending more money for preparation for war than Germany, the only difference being that one was preparing for war principally on the sea and the other for a war principally on land. The thing that brought on the European war was not unpreparedness, but overpreparedness.

Mr. FARR. England was not prepared. Russia was not prepared. Does the gentleman want this country prepared?

Mr. TAVENNER. Yes, and if the gentleman does—and I know he is sincere and patriotic in his views on this question—he will stand with me in advocating that we get a dollar's worth of preparedness for every dollar appropriated. We can only do this through the Government manufacture of armor, powder, munitions, battleships, and other paraphernalia of war. Two hundred and forty million dollars, raised by taxing the American people, have annually been expended on the Army and Navy under the general assumption that in return for this collossal expenditure the Nation was being reasonably "prepared." But it is asserted, even by men occupying high and authoritative places in public life and in a position to know what they are talking about, that our country is "pitifully unprepared."

Surely to any thinking person this state of affairs must suggest an indictment of the policy of giving the bulk of Army

and Navy contracts to private munition and shipbuilding concerns. If we are not prepared as we should be, it is not because the people have not paid in taxes the price of adequate preparation, but because too much of the money appropriated for preparedness has gone into the pockets of the stockholders of the war-trafficking firms, some of which stockholders are men occupying high positions in official life.

It is possible to give definite and specific information as to the economy of Government manufacture. I will quote some figures from the report of a board of officers who examined into this subject very recently, making their report on January 4, 1917 (S. Doc. No. 664, 64th Cong., 2d sess., p. 26).

This document shows that in the manufacture of field-artillery carriages, caissons, and limbers we are manufacturing these articles in Government plants 43 per cent cheaper than we can get them from private manufacturers.

As to cannon powder, we are manufacturing it 42 per cent cheaper; 12-inch projectiles weighing 700 pounds, 80 per cent cheaper; 12-inch projectiles weighing 600 pounds, 67 per cent cheaper; optical instruments, 9 per cent cheaper. These figures were compiled by a board that I consider unfair to the Government-manufacture side. All the testimony that was presented was by the private firms that manufacture these munitions and the Army officers who are opposed to complete Government manufacture. Nevertheless, the report proves the economy of Government manufacture of munitions.

The War Department in 1913 purchased 7,000 4.7-inch shrapnel from the ammunition ring, paying $25.26 each therefor. At the same time precisely the same article was being manufactured in a Government plant at a cost of $15.45. The War Department paid the ring $17.50 for a 3.8-inch common shrapnel, when it can manufacture the identical article for $7.94. The Government has manufactured at the Rock Island Arsenal caissons for gun carriages at a cost of $1,128.67 for which private manufacturers had been paid $1,744.10, which is 54.6 per cent greater than the arsenal cost. Take powder. The Government has purchased $25,000,000 worth of powder from the Powder Trust since 1905, paying therefor all the way from 53 to 80 cents per pound. We are manufacturing powder in Government plants for 34 cents per pound, and the officers in charge state that the more we manufacture the cheaper we can produce it. A hundred similar illustrations could be cited if time permitted.

I have always contended that the test of sincerity in the demand for great preparedness is whether those who advocate it are willing that the people shall receive the preparedness which they advocate without private profit to the J. P. Morgan controlled war trust.

If those who are crying up to Heaven for greatly increased appropriations for preparation for war are wholly sincere, you would think they themselves would demand Government manufacture in order that the Nation might obtain a dollar's worth of preparedness for every dollar appropriated, instead of only 50 or 60 or 70 cents' worth.

But whenever you show me a man who is professionally agitating big Army and Navy appropriations I will attempt to show you a man opposed to Government manufacture of the preparedness he is demanding.

The Navy League of the United States, which I have on several occasions shown to have been founded and supported by war-trafficking firms, went to great trouble and expense to defeat me for reelection because I have advocated the elimination of private profit from war and preparation for war by the manufacture of Army and Navy supplies in Government arsenals and navy yards. In other words, the Navy League insists that because I advocate Government manufacture I am opposed to preparedness. The Navy League's position is that everyone who would interfere with the profits of those munitions and armor makers who are set forth in the Navy League Journal as the founders of the Navy League is an enemy of preparedness.

In this connection I wish to state that those who allege that we are not prepared as we ought to be at this time can not lay the blame at the doors of those who have been consistently advocating in Congress the Government manufacture of Army and Navy supplies.

It has been charged that the public-buildings and the rivers and harbors bills are pork-barrel bills. I believe they are to a large extent. I voted against them. But the percentage of pork in those bills is but a drop in the bucket as compared to the Army and Navy appropriation bills.

If a majority of Members would vote against these bills, it would not mean that we would not get any preparedness at this session, but that the committees in charge would be forced to bring in bills making provision for Government manufacture of supplies. It would also mean that the Nation would get from one-fourth to one-third more preparedness for the same money that we are now appropriating. But in the opinion of the Navy League and professional preparedness advocates it is quite unpatriotic to demand that the Nation shall receive the maximum defensive power or the maximum striking power for the sums appropriated.

Mr. FARR. I am in accord with the gentleman in his desire to get full value for the money we spend. The evidence presented upon the floor of this House was that this country was buying its armor plate more cheaply than any other country in the world.

Mr. TAVENNER. Mr. Chairman, the Secretary of the Navy, Mr. Daniels, who is the best Secretary the Navy has ever had and whose word I am willing to accept on this question, makes the statement in his annual report for 1913, page 9, that history does not warrant an assumption that the patriotism of the three armor-plate concerns would prove superior to their desire for profits, inasmuch as "during the time that war with Spain was imminent, these companies refused to accept the price fixed by Congress after investigation as a just rate and declined to manufacture any armor until they got their own price of $100 a ton more than that which Congress had determined on."

In this connection the Secretary of the Navy calls attention to the circumstance that the love of country possessed by these companies did not prevent them from furnishing armor to Russia at $249 a ton while they were charging the United States $616 a ton, or hinder them from furnishing armor to Italy at $395 while charging their own Government $420, or from selling armor to Japan at $406 at a time they were charging Uncle Sam from $440 to $504 a ton.

Mr. FARR. Mr. Chairman, will the gentleman yield?

Mr. TAVENNER. I must decline to yield further, as my time is nearly exhausted.

Mr. FARR. But the gentleman does not know the facts.

Mr. TAVENNER. I do know the facts.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. KITCHIN. Mr. Chairman, I yield the gentleman five minutes more.

Mr. FORDNEY. Will the gentleman yield?

Mr. TAVENNER. Yes, sir.

Mr. FORDNEY. In the case of an institution run by the Government they do not put in the overhead expenses or the superintendence; nothing at all?

Mr. TAVENNER. In the figures I have given as the actual cost of an article allowance is made for every possible kind of overhead charge, such as interest on the money invested in plant and materials, insurance, and the salaries even of the officers who would be employed and whose salaries would be paid whether we manufacture these materials in Government establishments or not.

Mr. FARR. And no taxes.

Mr. TAVENNER. No taxes are charged as overhead, because the Government pays no taxes, and of course no profit is included in arsenal cost figures. But the Government makes a big profit in being able to manufacture at a lower figure than private concerns will accept.

While I am on this subject, I desire to leave in the CONGRESSIONAL RECORD a suggestion or two for Members of Congress who are to remain or come here after I pass on into private life. If any legislator would like to serve well his country, his constituents, and at the same time his own political interests, let him specialize on a campaign for Government manufacture of munitions of war of every character. While it is true that I have been active in such an effort during the four years I have been in Congress and have not been reelected, it was not because the voters are not strongly in favor of the principle of Government manufacture. I do not believe there is an issue before the American people to-day on which there is such unanimity of opinion as that concerning the wisdom of Government manufacture. Although the congressional district I have had the honor to represent is normally Republican by about 8,000 majority, the election returns indicated my defeat by only 508. I received some 5,000 more votes than President Wilson. It is not in any spirit of egotism that I call attention to these figures, but in order that hereafter my defeat will not be attributed to my fight in Congress for Government manufacture of munitions of war. If those who speak for the munitions makers could make it appear that my failure to be reelected was due to my attitude on the issue of Government manufacture, it might in the future tend to discourage Members of Congress from carrying on this fight. But such was not the case.

I have four times been a candidate for Congress in the fourteenth Illinois congressional district, always making Govern-

ment manufacture the principal issue. My total vote on each occasion was as follows:

1910 (defeated)	12,000
1912 (elected)	15,000
1914 (elected)	17,000
1916 (defeated)	22,500

I desire to say a few words as to how I came to take up the study of Government manufacture. The matter first came to my attention in looking after the interests of my own district, in which is located the Rock Island Arsenal. But I soon saw that this was a national issue, and from that moment I worked for Government manufacture as a policy, attempting to stand for the principle on every occasion, whether it benefited my own district or some other district. For instance, I worked just as hard to have the policy of Government manufacture accepted by the Navy Department as by the War Department, although there is no navy yard or naval station within a thousand miles of the district I am representing. Time and again I have conferred with Secretary of the Navy Daniels, an official who will go down in history as the first Secretary of the Navy really friendly to the idea of Government manufacture.

About the time I was first elected to Congress, four years ago, I happened to drop into a committee room here in the Capitol and heard Gen. Crozier testify that he was paying private munitions makers 54 per cent more for caissons for gun carriages than the arsenal cost at the Rock Island Arsenal. It occurred to me that if the price of the private munitions makers was so much greater than the arsenal cost, it would be economy for Uncle Sam to manufacture a larger proportion of his Army and Navy supplies in Government establishments.

I began to inquire into the subject and learned that at the Rock Island Arsenal the capacity could be greatly extended at a comparatively small cost. I found that at that time there were two large stone buildings, originally built for manufacturing purposes at a cost of some $400,000 each, standing practically idle at the Rock Island Arsenal. They were being used merely for storage purposes. The Government owns its own water-power plant in the Mississippi River at Rock Island, and I learned that enough power was going to waste to run the machinery in these two buildings, provided I could get the two buildings equipped with machinery.

So when the proper bill was before the House I offered an amendment providing for the equipment of these two buildings with the necessary machinery to manufacture articles being purchased in large quantities from private manufacturers at what I considered were excessive prices.

But it developed the Ordnance Department had sent up officers to testify in committee against my amendment and it was beaten by a close vote.

I also introduced many other bills for the increase of the capacity at the Rock Island Arsenal, and the conviction gradually dawned on me that the Ordnance Department was opposed to Government manufacture or at least any substantial increase in the Government arsenals. They were in favor of giving the bulk of the contracts to private munitions concerns. I refer to the time I started to make a fight for Government manufacture four years ago. The situation is now somewhat improved.

The reasons or excuses given by the Ordnance Department officials four years ago will not stand close investigation. The first argument I was confronted with was that these private manufacturers were very patriotic, and we should do everything possible to build them up in time of peace, so that we could rely upon their patriotic cooperation in time of war. They outrageously overcharged the Government in time of war, even more than in time of peace.

Army and Navy officials and munitions makers and those who speak for them have been hard driven for arguments with which to combat the wisdom of the policy of Government manufacture. Army and Navy officials have been giving the big war-trafficking firm contracts running into hundreds of millions of dollars and paying them excessive prices, while justifying their outrageous waste of the taxpayers' money before congressional committees with the statement that the Government could rely on the enlarged private plants in time of war. The Army and Navy officers argued that these private munitions plants would be a source of strength and safety to the Government in time of great national emergency. But the truth is that these plants, which have been practically subsidized as a result of the action of the Army and Navy officers in paying them excessive prices, would not be a source of strength but a source of weakness to the Government in time of war.

I do not ask Congress to accept my opinion as to these views, but I ask that Congress carefully consider the views of one of the highest military bodies in the United States—the Army War College.

Practically all of the private plants that have been receiving the fat Government contracts and which the Army and Navy officers have been telling committees of Congress would be a source of strength and security to the Nation in time of war, are located in close proximity to the coasts and therefore are a source of weakness instead of strength.

To rely on these plants in time of emergency would be to imperil the safety of the Nation. These private plants are now admitted by the highest military body in the United States to be a source of weakness to the Nation and not a source of strength.

I shall not place in the RECORD, for obvious reasons, the locations of the various private munitions plants that the Ordnance Department officers have been counseling Congress to build up year after year by the awarding of contracts at excessive prices. But I desire to assert that these Ordnance officers, in their eagerness to have the fat Government contracts given to private munitions concerns instead of Government arsenals, have grossly neglected the welfare and safety of the Nation. Every one of the 18 plants about which the Army officers have been so solicitous are located in violation of the principle set forth by the Army War College. I am calling attention to this statement because I believe I am serving my country in doing so. Let us quit giving contracts to the private munitions firms located in the danger zone and build up our own plants in the interior of the country.

The official Government document which proves the accuracy of these statements may be had from the War Department. Friends of Government manufacture who will be in the next Congress can make an argument that opponents will not be able to successfully combat by reading from this document, known as War Department Document No. 532, Office of Chief of Staff. It was only recently issued and reads as follows:

Strategic location of military depots, arsenals, and manufacturing plants in the United States.

1. Paragraph 60 of the statement of a proper military policy for the United States, prepared by the War College Division, General Staff Corps, in compliance with instructions of the Secretary of War and submitted September 11, 1915, is as follows:

"60. As a general military principle, no supply depot, arsenal, nor manufacturing plant of any considerable size, supported by War Department appropriations for military purposes, should be established or maintained east of the Appalachian Mountains, west of the Cascade or Sierra Nevada Mountains, nor within 200 miles of our Canadian or Mexican borders, and steps should be taken gradually to cause to be moved depots and manufacturing plants already established in violation of this military principle."

2. The soundness of the general principle of establishing permanent Government arsenals and supply depots at a safe distance from national frontiers seems so clear that no lengthy discussion or explanation of paragraph 60, just quoted, seems necessary. It may be of service, however, to illustrate graphically the trouble liable to arise from violation of this cardinal principle.

First, take the case of France in 1870, during the war with Germany, and note the handicap imposed upon her by the capture of a number of her arsenals, due to their faulty location.

Plate I tells the story at a glance. It shows the positions of the principal arsenals and depots as they existed at the outbreak of hostilities. The shaded portion indicates the territory eventually occupied by the invader. Attention is especially invited to the proximity of the frontier of Douai, La Fere, Metz, Mutzig, Strasbourg, and Besancon. All were captured except the first two, and these were cut off from the French armies.

SERIOUS HANDICAP.

3. Next take our own case to-day, which is even worse, from a military standpoint, than that of France in 1870. Plate II shows the present locations of the principal Government arsenals and supply depots as they exist to-day in the United States. The shaded portions indicate reasonable and probable objectives for an invader, due to our present state of unpreparedness. Attention is especially invited to the proximity to the frontiers of all our arsenals and supply depots except Rock Island, Omaha, Fort Leavenworth, St. Louis, and Jeffersonville. Our handicap, if these places were captured, can not be overestimated.

4. Plate III shows the locations of some of our more important privately owned manufactories of war munitions, such as cartridge cases, fuses, shells, explosives, ammunition, binoculars, pistols, wagons, rifles, and bayonets.

The Plate III referred to shows practically all of the 18 private munitions plants located in violation of the military principle referred to in the above document.

I have cited a few samples of the arguments that the opponents of Government manufacture indulge in. They go from pillar to post, but there is no spot where they can stop and hold their ground. And in the meantime three firms in this country have drawn down $200,000,000 worth of contracts from the Army and Navy Departments, and we have paid them from 20 to 50 per cent more for these supplies than we could have manufactured them for in Government plants.

Secretary of the Navy Daniels in his annual report for 1914 called attention to the economy of Government manufacture by saying that, "contrary to popular idea, the Navy Department in what it manufactures does so, from a superdreadnaught to

a gallon of paint or a pound of powder, cheaper than the same can be purchased. This is particularly true of the most expensive instruments of war, but it is equally true of gasoline engines, electrical supplies, engines for dreadnaughts, shrapnel, clothing for marines and sailors, accouterments, and a multitude of other articles required for the fleet and shore stations."

Government manufacture will mean that the workmen who perform the labor of actually making the munitions will receive higher wages and better working conditions than if the contracts for war materials are awarded the private munition firms, among which are numbered the most bitter enemies of organized labor in the United States.

Nationalization of the manufacture of war paraphernalia offers a program on which all save those directly or indirectly interested in private war-trafficking concerns may unite. Whether in favor of disarmament, vastly increased armament, or maintaining the present armament, all can meet on a common ground. Those who desire a greater armament can obtain it through Government manufacture without placing increased burdens upon the taxpayers.

If those who demand such a large Army and Navy are wholly sincere, and if their only desire is that we shall have the strongest possible Army and Navy, why should they not want us to obtain the maximum amount of armament for every dollar we appropriate, instead of only about 65 cents worth of protection for every dollar appropriated?

By manufacturing armor, munitions, submarines, aeroplanes, and so forth, in its own plants the Government will be able to keep for its own use any improvements in such vehicles of war. Under the present policy of giving the major part of military contracts to private concerns it has been impossible to do this. "Even now," says Secretary of the Navy Daniels, "the improvements in armor and the designs worked out by the Navy have been embodied in the warship of another nation recently finished by the Bethlehem Steel Co. and put into commission. This is not an argument lightly to be disregarded in favor of a Government armor plant, nor has it been overlooked, for instance, by Japan, which has erected its own armor-making *plant* and surrounded it with such secrecy that none of the other nations is able to tell whether or not at this minute the Japanese armor may not be superior to any other in existence."

Under the present system the Government is at the mercy of a few concerns having a monopoly of the manufacture of the materials of war, who appear to have a gentlemen's agreement to divide the Government contracts between themselves and between whom there is no competition worthy of the name. "I do not see how it is possible for Congress to justify to the people a refusal to erect a Government plant," said Secretary Daniels to Congress, "nor how it can answer the charge *that will* invariably be brought up—that the same mysterious providence which saved this profitable business to the steel companies tbree times in the past, even after money for a Government plant had actually been appropriated, is not still at work exercising its beneficent protection over these lusty specimens of infant industries, who are even now under Government investigation as violators of the antitrust law."

The present European war has demonstrated that private plants not in the business of manufacturing war materials can make the necessary alterations to manufacture such supplies in a remarkably short space of time. By enlarging the Government plants and operating them in time of peace the Government could have on hand sufficient ammunition, guns, and so forth, to equip the most powerful army ever organized and keep it in the field a long time after private plants not engaged in the manufacture of war materials would have been able to reorganize their shops and be turning out ammunition and other supplies. In the event that private manufacturers should not respond to the necessity of the occasion, the Government could itself take over such industrial plants as it might need just as England has done.

It is to the interest of only the few to leave profit in war and preparation for war, while it is to the interest of the entire earth's population to take it out.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. TAVENNER. Mr. Chairman, I ask unanimous consent to revise and extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

COL. THOMPSON IS NOT APPRECIATIVE.

Mr. TAVENNER. Col. Robert M. Thompson, chairman of the board of directors of the International Nickel Co., and president of the Navy League of the United States, owes me, I feel, an apology. The colonel went to great trouble to have me defeated. He caused a friend of the Navy League to make a contribution to bring about that result, and also caused the Navy League to expend of its funds in sending 5,000 of each of two documents to the farmers of the fourteenth Illinois Congressional district, where I was a candidate for reelection.

For so acting I feel strongly that the head of the Nickel Trust owes me an apology. To say the least, he has revealed an utter lack of appreciation. Because of facts and information relative to Col. Thompson and his purely patriotic activities in various lines which I had in my possession and did not make use of in my remarks on "The Navy League unmasked," Col. Thompson was certainly under obligations to remain at least neutral as to my candidacy for reelection. I regret exceedingly that my generosity has been so shabbily treated.

The work of bringing out full and complete information about the workings of the munitions patriots will not end merely because I am not to be permitted to continue my efforts. Others are already at work, and have made discoveries with which I am conversant and which show that I did my work very badly, that I have but half unmasked the Navy League and certain of its patriot backers. I have not been given permission to make use of the information to which I refer, but I have reason to believe it will all be brought to public attention at the proper time and in the proper way.

However, before leaving Congress I wish to place in the RECORD such data concerning the Navy League as I am free at this time to release.

I desire to first address myself to the documents, of which 5,000 of each were sent into my district by the Navy League during the recent campaign. I have personally seen but one of these pamphlets. It reads as follows:

SOME OF TAVENNER'S FALSE STATEMENTS.

[A letter by Col. Robert M. Thompson, president of the Navy League, to a well-known pacifist.]

LETTER TO A PACIFIST.

DEAR SIR: I have your favor of May 17 concerning Mr. TAVENNER'S attacks on the Navy League, and am very glad of the opportunity to put before you the facts. You say you will be guided by the preponderance of evidence, whichever way it points.

If you accept assertion or noise or reiteration as evidence, Mr. TAVENNER will clearly carry the day, as he is reckless in his statements and continues to make them after opportunity has been given him to ascertain that the truth is diametrically opposite to what he is saying. I am glad that he has made a direct assertion in regard to the value of nickel in armor plate, as that assertion is very easy to disprove, and it is not necessary for you to take the word of any party to the dispute. Write to the Bureau of Ordnance, United States Navy Department, and ask them concerning the quantity and the value of nickel contained in a ton of armor plate. You will find that the gross value does not exceed $25. The Navy Department paid $425 per ton for the last armor plate purchased. The value of the nickel, therefor, is almost exactly 6 per cent of the armor price, and the value of nickel and nickel products in $5,000 worth of armor plate is only $300 instead of $4,000, which is the figure named, as you say, by Mr. TAVENNER. Ask, also, what weight of nickel enters into the construction of a battleship, including everything for which that metal is used. You will find that in a dreadnaught of 30,000 tons displacement—that is, a ship that weighs 30,000 tons—the amount of nickel is not over 600 tons, or 2 per cent of the weight, and in spite of the relatively high cost of nickel you will find that its value is not over 3 per cent of the total cost. These facts you can ascertain, just as Mr. TAVENNER might have ascertained them, if he had been desirous of telling the truth. If you will look up the Fatherland, the German socialistic organ, published in May or June, 1915, you will find that it took as a basis for its charge the chart which Mr. Samuel Untermyer prepared for use in an article against interlocking directorates when the banking bill was under consideration in Congress. The Fatherland created out of nothing the story that the gentlemen whose names appeared in the chart had met at a luncheon, organized the Navy League, and provided for its maintenance. This statement is a lie out of whole cloth. Of the 31 men named in that article, 3 were present at a Navy League luncheon on one occasion, but not one of the entire list had anything to do with the organization of the league, and none of them ever influenced or sought to influence its management or affairs.

Tavenner practically copied this statement in his speech. He got hold of an old copy of the Navy League Journal in which were published the names of members who joined the league during the year 1904. The Navy League was organized in 1902 and was formally incorporated in 1903 by the men whose names I inclose herewith. You will note that practically every one of them is a graduate of the United States Naval Academy or a man who has served in the Navy or in the Naval Militia, except in the case of George Satterlee, the father of Herbert Satterlee, who was very prominent in the organizing of the league.

I send you also a list of the present directors and vice presidents of the league. There is not a single man among them, to the best of my knowledge and belief, who could be controlled or who is influenced in his action by any financial interest of any kind whatever. If there is anyone whose position gives just ground for such accusation, I am the man. I have heretofore explained to you, frankly and fully, my interest, and I think you know enough about me to refuse to believe that I could be purchased by the paltry interests that I might have through an indirect sale of nickel to the Government.

Mr. TAVENNER'S insinuation of some relation between the American Navy League and the German Navy League is on a par with his other statements. The fact is that many years ago a gentleman who then acted as the secretary of the Navy League died. This fact reached the officials of the German Navy League through the public press, and they wrote a formal letter of condolence, to which, I have no doubt, our league responded with equal formality. So far as I know, there has never been any other communication of any kind between the two leagues—certainly

there has been none during my time. On one occasion one of our members suggested some communication between the two leagues, but our boards disapproved the suggestion. If you start off with the assumption that the leagues are honest, patriotic societies you will see that there is no reason for their not communicating. If you start off with the unfair idea that they are dishonest and are managed for the purpose of increasing the sales of munitions of war, then, of course, anything that they do will be suspicious.

The third instance of Mr. TAVENNER'S fairness is his citing an extract from the Navy League Journal as establishing the fact that persons connected with the munition and armor plants were founders of the Navy League. He knows and knew all the time that the word "founder" was used to describe a certain class of membership. I have already pointed out that the league was really founded in 1902 and incorporated in 1903, and the statements that he quoted from the Navy League Journal were from a list of members who had joined the Navy League in 1904. If you are in New York you can probably get from Herbert Satterlee a copy of the old Navy League Journal. Referring to it you will see that there are three columns to a page; that one page is headed to show that it gives the list of the members who joined during 1904; and that in one column are the names of that year's founders—a "founder" being a member who makes a single payment of $100 and becomes a life member without the necessity of paying annual dues. There are also contributing members who pay $5 a year, and annual members who pay only $2 a year. I inclose a printed copy of our by-laws showing you this fact.

Now, remember that back in 1904 war traffickers had not been invented. The officials of the Navy Department were begging Mr. Carnegie and Mr. Wharton to find the capital with which to try certain experiments. Our leading manufacturers were then captains of industry and it had not become fashionable to consider them as citizens unworthy to be associated in supporting patriotic societies. Mr. Schwab, for instance, subscribed and paid $100, and to the best of my knowledge he has never paid 1 cent into the funds of the Navy League since that time, nor has he in any way ever controlled or attempted to control any of the activities of the Navy League.

By the way, the Navy League has had but three presidents. Benjamin F. Tracy, an ex-Secretary of the Navy, with no business connections; Gen. Horace Porter, soldier and diplomat, with no business connections, and myself. The acting secretary is Mr. Arthur H. Dadmun, who came to us recommended by the Young Men's Christian Association of New York. The acting management to-day is in the hands of myself, as president; W. H. Stayton, a Naval Academy graduate, as executive secretary; A. H. Dadmun, as financial secretary; Henry Breckinridge, ex-Assistant Secretary of War, as chairman of the executive committee, and Henry H. Ward, vice president and graduate of the Naval Academy. Do you really think that smells of corruption? I don't believe you do.

If you will read Mr. TAVENNER'S speech in the light of my explanation you will see that he dwells, for instance, upon the fact that a certain number of gentlemen have subscribed to the funds of the Navy League. He is enabled to make that statement because there was published a list of some of our larger subscriptions, and disregarding the payments made by over 12,000 active members, he selected ten or a dozen and insinuated that we were controlled by corporations in which these men were interested. You are a New Yorker. Do you know of any good charitable or patriotic society around New York to which Mr. Pierpont Morgan did not subscribe? Do you think that Robert Bacon is the type of a man who disgraces a patriotic association by subscribing to its funds? You probably know Herbert Satterlee. TAVENNER urges against him the heinous offense of being the son-in-law of one and the brother-in-law of the other Pierpont Morgan. If you know Herbert, do you really think that that charge is a very serious one?

Take TAVENNER'S charge that the armor-plate manufacturers received gross and unfair profits. Send to the Bethlehem Steel Co. for a copy of their published statements showing exactly what did take place. TAVENNER claims that the Bethlehem Co. made profits anywhere from 40 to 50 per cent on their contracts. Yet in the same speech he makes another attack upon them on the ground that their stock jumped up from 35 to 450 or 500 because of their enormous profits from the sale of munitions to the British Government. But don't you think that it is a little surprising that if they were making such enormous profits out of the United States Government that their stock had been selling at 35? As an argument the two statements do not hang together.

I am sending you the evidence which shows that TAVENNER first sought to get the Navy League to indorse his scheme for building a Government munitions plant in his district and offered to support our propaganda if we would agree to support Government ownership. When we declined the proposition upon the ground that Government ownership was a disputed economic question, which it was not in our province to decide, that all that the Navy League urged was that the Government should buy the best and the cheapest article from whatever source it could be obtained, Mr. TAVENNER began his mendacious attacks, imputing to us doctrines and policies which are abhorrent to us. (I send you a copy of my speech at the opening of the late convention, which contains a statement of our real doctrines.)

We thus irritated Mr. TAVENNER and obtained his ill will, and he thereupon began a series of attacks upon us under the privilege of speeches upon the floor of the House, he having succeeded in interesting Mr. Henry Ford, who paid for enormous editions of the speeches which are being circulated throughout the United States under Mr. TAVENNER'S frank.

I submit that you should accept his statement not as evidence but as assertions, and form your judgment only when from some authoritative source you obtain absolute facts.

I have given you the truth about the points you refer to, and you can satisfy yourself as to the correctness of my statements by referring to the official sources. It is a wise maxim of the law which says, "False in one thing, false in all things." Mr. TAVENNER has made four false or scandalously exaggerated statements.

In conclusion I tell you absolutely that no person interested in the manufacturing of munitions or armor plate or interested in any corporations dealing with the United States Government, including myself, has ever attempted in any way to influence the management of the Navy League for any reason except a purely patriotic one.

I have gone through three wars. I have had brothers killed and maimed. I am fully impressed with the horror of war, and I am anxious to obtain peace, and I am convinced that the surest way and the way that the Constitution requires is to be so thoroughly prepared that no one will venture to cross the seas to attack us.

Raising the argument of cost is ridiculous, because a Navy that is second to none can be maintained for $200,000,000 a year (appropriated annually and spent wisely along lines recommended by a general staff). Any man who advocates paying $150,000,000 for an inadequate Navy when an adequate one can be obtained for $200,000,000 is so much of a fool that neither you nor I will waste time in trying to argue with him.

Cordially, yours, ROBERT M. THOMPSON.

I regret that I do not now have the time to go carefully into all of the statements made in pamphlets, letters, and so forth, that have been issued from time to time by the Navy League heads. This work is being done, and will be brought to the attention of Congress by others. If I had the time I could show how utterly unscrupulous the Navy League officials have been in misquoting and falsifying.

Let us take the leading "points" emphasized in the document which the Navy League used in my district to defeat me.

Col. Thompson ingeniously and fraudulently states:

I am glad that he [TAVENNER] has made a direct assertion in regard to the *value of nickel in armor plate*, as that assertion is very easy to disprove, and it is not necessary for you to take the word of any party to the dispute. Write to the Bureau of Ordnance, United States Navy Department, and ask them concerning the quantity and the *value of nickel contained in a ton of armor plate.*

Col. Thompson then goes on to imply that I stated that *in every $5,000 worth of armor plate* $4,000 represented the value of the nickel therein. The truth is, I have never at any time or place made any such statement. I have never believed there was $4,000 worth of anything, or of everything combined, in any $10,000 purchase of armor plate at the prices which Uncle Sam is forced to pay the armor manufacturers.

What I did state was that official estimates indicated that of *every $5,274* worth of metal used in the manufacture of armor, $2,942 represented the value of the nickel contained therein. An entirely different statement. Col. Thompson knew what I stated, for it was printed in black and white in the CONGRESSIONAL RECORD for December 15, 1915, as follows:

Are there any reasons, other than purely patriotic ones, why officers and directors of the Nickel Trust might be urging, through the Navy League, a $500,000,000 bond issue for battleships, and so forth? Light may be had on this subject by referring to a table to be found on page 5259 of the CONGRESSIONAL RECORD, last session. The table in question is headed "Metal per ton of armor," and is a part of the report of Senator TILLMAN, Representative PADGETT, and Admiral Strauss, of the Navy Department, as to the cost of manufacturing armor plate.

This table states that of every $5,274 *worth of metal used in the manufacture of armor plate* $2,953 represents the value of the nickel scrap and $1,466 represents the value of the metallic nickel used in the manufacture of armor.

Information is not given as to the amount of metallic nickel in nickel scrap, but I understand that the value of metallic nickel in a ton of nickel scrap is approximately 50 per cent of the value of nickel scrap. This would mean that $2,942 represents the value of the nickel in every $5,274 *worth of metal used in the manufacture of armor.*

The 1914 hearings of the House Naval Affairs Committee also contains (p. 522) an estimate on "Cost of ingot," which states that in every $3,028 worth of metal used $753 represents the value of the nickel in scrap, $840 the nickel in plaquettes, and $447 the nickel-chrome scrap, nickel turnings, and nickel-chrome rails. Estimating that the nickel in the latter three items represents approximately one-third of the whole value, it would mean, under this estimate, that $1,742 represents the value of the nickel in every $3,028 *worth of metal* used in the manufacture of armor.

The International Nickel Co. does not sell directly to the Government but to the various concerns that produce the finished article.

Nor is the use of nickel confined to armor plate. It goes into ammunition hoists, communication tubes and turrets, deck, hull, and ship plates, guns and gun shields, rifles and small arms, torpedo air reservoirs, marine straight-line shafting, crank shafts, piston rods, and other marine-engine forgings. This is all stated in the following advertisement of the Orford Copper Co., which concern is wholly owned by Col. Thompson's International Nickel Co., the advertisement appearing repeatedly in the Navy League Journal:

"Nickel steel for armor plate, ammunition hoists, communication tubes and turrets, deck, hull, and ship plate, guns and gun shields, rifles and small arms, torpedo air reservoirs, marine straight-line shafting, crank shafts, piston rods, and other marine-engine forgings.

"Annealed nickel steel castings have higher physical properties and resist abrasion better than low-carbon steel forgings.

"The addition of nickel to steel (a) increases the proportional elastic limit; (b) adds to the ductility of the steel; (c) increases its resistance to compression; (d) increases its resistance to abrasion; (e) increases its resistance to shock; (f) increases its toughness.

"Nickel steel is therefore a safer material than carbon steel.

"The Orford Copper Co., nickel refiners, 43 Exchange Place, New York."

The next "point" in the pamphlet, styled "Some of TAVENNER'S False Statements," but which should have been labeled "Some of Col. Thompson's False Statements," was that the Fatherland magazine printed some statements and that I reprinted them. Col. Thompson is mistaken. The documents from which I obtained the names of munitions makers connected with the Navy League was the Navy League Journal, "the official organ of the Navy League of the United States," and pamphlets and statements issued by the Navy League itself.

Col. Thompson states:

He [TAVENNER] got hold of an old copy of the Navy League Journal in which were published the names of members who joined the league during the year 1904.

To be exact, this particular Navy League Journal was just 12 years old, and, in addition to names of members, it contained,

under the head of "Founders," the names of 19 men, 14 of whom were munition makers or men who held stock in such concerns. At that time the "patriotism" of the men back of the league had never been inquired into, and the league officials were rather careless in publishing the names of the munitions makers back of the movement. The Navy League officers are more careful to-day.

Col. Thompson further avers:

By the way, the Navy League has had but three presidents—Benjamin F. Tracy, an ex-Secretary of the Navy, with no business connections; Gen. Horace Porter, soldier and diplomat, with no business connections; and myself.

Benjamin F. Tracy, immediately upon the expiration of his term as Secretary of the Navy, appeared before committees of Congress and stated under oath that he was representing as counsel the Carnegie Steel Co. and the Harvey Steel Co. Col. Thompson, one of the other two presidents of the league, is chairman of the board of the Nickel Trust, so that at least two of the three presidents of the Navy League did have "business connections."

Another of Col. Thompson's false statements is as follows:

I am sending you the evidence which shows that TAVENNER first sought to get the Navy League to indorse his scheme for building a Government munitions plant *in his district.*

If I ever made a proposition to the Navy League to get it to support the building of a munition plant "*in my district,*" I must have done so either orally or in writing. If I did it in writing, I challenge the Navy League to produce the document, or if I did it orally I challenge the Navy League to state when or where. What I did do was to challenge the Navy League to either cease advocating only the kind of preparedness that would spell increased profits for the gentlemen named in the league's official organ as the "founders" of the Navy League or go out of business. I contended that the only way the league could successfully meet this test of its patriotism was to cease opposing Government manufacture and to call a meeting of its board of directors and go on record in favor of it. I never made a proposition to the league to go on record in favor of "building a Government munition plant" *in my district*, which is a somewhat different matter. If Col. Thompson had, for instance, advocated the manufacture of munitions by the Government outside of my district, he would have wholly answered my objections to his particular propaganda. But Col. Thompson and his fellow munitions makers are not in favor of Government manufacture anywhere.

Col. Thompson further states:

It is a wise maxim of the law which says, "False in one thing, false in all things."

I will not apply this maxim to Col. Thompson, because he may be honestly mistaken in a few of his allegations.

I am not opposing the program of the Navy League because it is advocating "preparedness," but because of the kind of preparedness it is advocating. The Navy League is advocating a $500,000,000 bond issue for battleships, and so forth, but it is not advocating that the taxpayers should receive a dollar's worth of battleship for every dollar appropriated or that the amount of increased naval appropriations should be raised by a tax on incomes or inheritances. The Navy League contends this Nation needs every additional ounce of fighting force it can possibly obtain, yet it does not advocate that the people should be permitted to have a maximum striking force or a maximum resisting power for every dollar spent, instead of only 60 cents' worth, as they have been receiving. No; President Thompson, chairman of the board of directors of the International Nickel Co., never called together J. P. Morgan, director of the United States Steel Corporation; Robert Bacon, director of United States Steel; Beekman Winthrop, director of the Lackawanna Steel Co., when they were directors of the Navy League, to consider the advisability of going on record in favor of taking private profit out of war and preparation for war by having the Government manufacture its own war material.

And it is not because the matter has not been called to the attention of the league. It is more than three years now since I addressed, on January 16, 1914, a letter to the secretary of the league, in part, saying:

I beg to acknowledge receipt of your letter of the 13th instant, together with inclosures as to why a powerful Navy is needed.

Assuming that you are in good faith in this agitation and really desire the largest possible Navy for patriotic reasons, I am going to take the liberty of suggesting to you that if you will inaugurate a movement for the Government manufacture of all munitions of war, including all battleships, your campaign will strike a much more responsive chord with both Members of Congress and the people.

In other words, if the Government is to do all of the manufacturing of munitions of war, including battleships, the point can not then be successfully raised that the agitation is for the benefit of the armor ring, the ammunition ring, and the Shipbuilding Trust.

But if you do not advocate the Government manufacture of all munitions of war, including battleships, you can not successfully deny that you are carrying on a propaganda which means millions and millions of dollars of extortionate profits to the above-mentioned interests.

No action, however, has been taken by the league. I believe that if Congress should decide to manufacture all of its battleships, submarines, armor, guns, and munitions and place the burden of the cost of the Army and Navy upon incomes and inheritances, where it should be placed, the Navy League would forthwith close the doors of its lobby in the National Capital.

I am not contending that our great financiers who own stock in war-trafficking firms and cry out to heaven through the Navy League for preparation for war have no patriotism, but I do assert that it is a very difficult matter to figure out what proportion of their preparedness agitation is due to love of country and what proportion to love of dividends.

Morgan and business associates of Morgan appear to have always been in control of the Navy League, although there have at all times been numbered among the officers, directors, and honorary vice presidents men whose disinterested patriotism is beyond question. And the members of the league as a whole can at the very outset be absolved of any suspicion of taint, as it is probable that for the most part they joined the organization in the belief its backers were prompted by considerations wholly and purely patriotic, and that the inspirations of its founders were not in any sense directly or remotely associated with the business of making and selling armor and cannon.

NEW YORK SPEECH ATTRACTED ATTENTION OF LEAGUE.

My controvery with the Navy League opened in earnest as a result of a speech delivered by me at the Cooper Union Hall, in New York City, on the evening of Friday, November 19, 1915, in which I stated that inasmuch as the Navy League officials were insisting that no men connected with munitions concerns were back of the Navy League, I intended to accept their challenge by introducing a resolution in Congress requiring J. P. Morgan and other directors of the league to testify under oath whether or not they owned stock in munition firms.

The New York Times of November 20 published the following account of this meeting:

LAYS DEFENSE FIGHT TO MUNITION MAKERS—CONGRESSMAN TAVENNER ALSO CHARGES THAT OUR UNPREPAREDNESS IS DUE TO WASTE OF FUNDS.

Congressman CLYDE H. TAVENNER, of Illinois, speaking at Cooper Union last night in "Taking the Profit Out of the War," said that the manufacturers of munitions were to a great measure responsible for the agitation for national preparedness, and that they were working to force through Congress large appropriations for national armament, in order to make what he characterizes as excessive profits.

"I will make the statement upon my responsibility as a Member of Congress," he said, "that the money appropriated for the Army and Navy has been wasted like water, and that the reason we are not prepared is that too much of the money appropriated for preparedness has gone into the pockets of war-trafficking firms instead of into preparedness."

He then attacked the Navy League, intimating that its members were not as disinterested in the manufacture of munitions as they had declared themselves to be.

"I will accept their challenge that they are not connected with munitions concerns by introducing a resolution in Congress that J. P. Morgan and the other directors of the Navy League, past and present, and the men who organized and reorganized it, be called upon to testify as to whether or not they own stock in concerns engaged in the manufacture of war materials or any firms that have been drawing down contracts for the Army and Navy," said he.

"Moreover, I do not believe that any Member of Congress who owns stock in the firms engaged in war traffic should be permitted to take any part whatever in the debates on the Army and Navy bills. The worst menace to this country is not the menace beyond the seas, but the menace within our own borders—the men who would plunge us into war for their own personal profit. Those officers who do the purchasing of war munitions, and who are paid a salary to see that the Government receives a dollar's worth of goods for every dollar expended, have permitted a ring of ammunition manufacturers to put Government money by the millions into their pockets."

On November 21 I received the following letter from the chairman of the board of directors of the International Nickel Co.:

NAVAL LEAGUE OF THE UNITED STATES,
Washington, D. C., November 20, 1915.

Representative CLYDE H. TAVENNER,
House of Representatives, Washington, D. C.

DEAR SIR: From the reports of an address delivered by you at the Cooper Union on Friday evening, November 19, I gather that you believe that the Navy League is influenced in its desire to secure adequate measures of preparedness for this country to resist attack and aggression by mercenary and improper motives. Although the reports of your speech are couched entirely in the language of inunendo and insinuation, I have received the impression from them that you believe the Navy League to be definitely subsidized by certain "war-trafficking firms," to quote from a report of your speech.

If you believe these things to be true, will you not make a definite and positive public statement so that by bringing suit against you we may make a test case and demonstrate publicly and finally by court decision their truth or falsity? If you do not believe them to be true, will you assist us to give as much publicity to your statement to that effect as has been given to the reports of your address?

I trust that I shall hear from you at an early date, either denying the insinuations imputed to you or putting any charges you may have to make in concrete form so that we may institute proceedings at once, and so decide this matter so that we may have a definite court decision and record as to exactly the moral and financial status of the Navy League by the time set for the opening of Congress.

I need not tell you how gladly I should welcome an opportunity to demonstrate in court the freedom of the league's finances from the taint of subsidy. For your own part, I am sure that should the sentiments attributed to you in the newspaper reports be true you will be equally pleased to meet us in the open by putting your charges in definite form, as I feel that no American gentleman representing the sovereign people would consent to slander by false charges couched in hint and inunendo an organization made up of more than 50,000 earnest, patriotic men and women, numbering among them some of the most distinguished of his fellow citizens drawn from every locality and from all walks of life.

Trusting that I shall hear from you promptly in this matter, I am,

Very truly, yours,

ROBT. M. THOMPSON, *President.*

A DEFINITE AND POSITIVE PUBLIC STATEMENT.

My reply to this letter was made in a letter mailed to Col. Thompson and given to the newspapers for publication, and was as follows:

HOUSE OF REPRESENTATIVES,
Washington, D. C., December 2, 1915.

Col. ROBERT M. THOMPSON,
President Navy League, Washington, D. C.

MY DEAR COLONEL: I assume from your letter of the 20th ultimo and from your various utterances as president of the Navy League that the impression you desire to create in the minds of the American people is that none of the men who founded or who have been or are now directors of or contributors to the Navy League have ever been or are now in any manner interested in any concern which would profit financially from the $500,000,000 bond issue for battleships, etc., which you are advocating.

I understand your position to be that none of the money which the Navy League has used to banquet Members of Congress and Secretaries of the Navy, or to carry on the propaganda for the vastly increased naval appropriations which you advocate, has come from any gentlemen who stand to profit therefrom. I contend that the opposite is true.

In your letter you request that I give you some specific information.

I call your attention to the fact that Elbert H. Gary, who is described in the Directory of Directors for 1914 as "chairman of the board of directors and chairman of the finance committee of the United States Steel Corporation," contributed $1,000 on June 10, 1915, and that on the same date representatives of the J. P. Morgan estate subscribed $2,000.

I call your attention to the fact that J. P. Morgan, who is a director of the United States Steel Corporation, was formerly treasurer of the Navy League and is now a director of and a contributor to the Navy League, and that J. P. Morgan's brother-in-law, Herbert L. Satterlee, was one of the incorporators of the league, and is at the present time the general counsel of the league. I also note that Edward T. Stotesbury, a member of the firm of J. P. Morgan & Co. and a director of the Baldwin Locomotive Works, Cambria Steel Co., Phoenix Iron Co., Riverside Metal Co., Temple Iron Co., Wm. Cramp & Sons' Ship & Engine Building Co., and 54 other corporations, banks, and trust companies is one of the honorary vice presidents of the Navy League.

I also call your attention to the fact that George F. Baker, jr., No. 2 Wall Street, New York, son of a director of United States Steel, contributed $1,000 to the Navy League June 10, 1915.

I call your attention to the fact that Robert Bacon, formerly a member of the firm of J. P. Morgan Co., and now first director of United States Steel, is a director of the Navy League.

I call your attention to the fact that Henry C. Frick, a director of United States Steel and 10 other corporations, banks, and trust companies is one of the vice presidents of the Navy League.

United States Steel controls the Carnegie Steel Co., which has drawn down from the Navy contracts aggregating $32,954,377 for armor plate alone, and, if the Navy League's $500,000,000 bond issue goes through Congress, this firm will profit still further.

I call your attention to the fact that Allan A. Ryan, a director of the Bethlehem Steel Corporation, contributed $100 to the Navy League on June 10, 1915, and to the further fact that George R. Sheldon, a director of the Bethlehem Steel Corporation, and the American Locomotive Co., both of which concerns have profited hugely from European-war orders, is one of the vice presidents of the Navy League. Mr. Sheldon is also a director of 24 other corporations.

The Bethlehem Steel Corporation has obtained from the Navy Department armor contracts amounting to $42,321,237, and if the Navy League's program goes through, Bethlehem stands to receive increased orders.

From the foregoing it would appear that two of the three concerns composing the armor ring in this country have representation either among the contributors to the Navy League or among the officers or directors of the Navy League.

The Government has purchased from these two concerns—Bethlehem and Carnegie—$75,275,614 worth of armor plate, paying an average price of approximately $440 a ton therefor.

If this armor plate had been manufactured in a Government armor-plate factory, which the Navy League has cold shouldered, at least $25,000,000 could have been saved to the American taxpayers. There have been 10 estimates by Government officials as to the cost of armor in a Government plant, and the average of these estimates is $238 a ton. By contrasting $440, the price we have paid the private manufacturers, with $238, the cost at which we might have manufactured this armor in a Government plant, it is possible to obtain an inkling as to the reason we do not now have more preparedness to show for the colossal appropriations made for that purpose.

I note there are 31 directors of the Navy League. The personal fortunes of these 31 men, by the most conservative estimate, aggregate $100,000,000, or $3,000,000 to each director. I contend that any board of directors whose individual fortunes average $3,000,000 can hardly be considered as representative of the views, feelings, and heartbeats of the great mass of the American people.

On November 19 I publicly stated that inasmuch as the Navy League insisted that its management and backers are entirely free from any atmosphere of war-trafficking influences, I would, as soon as Congress convened, introduce a resolution providing for an investigation of the league, specifically requiring J. P. Morgan and other directors of the league, past and present, to take the responsibility of testifying, under oath, whether they are interested, or ever have been, in war-trafficking firms or concerns which stand to profit from the proposed $500,000,000 bond issue.

On November 21 I received a letter from you threatening a suit. I consider your letter nothing more nor less than an attempt to intimidate me into abandoning my plans to seek a congressional investigation of your organization. When I am right, the Navy League can not intimidate me.

I now desire in all good faith to take the responsibility of making a suggestion to the Navy League. I suggest that you call a meeting of the board of directors and go on record in favor of the Government manufacture of battleships, submarines, armament, munitions, etc., in order that the people may obtain the preparedness which you are advocating at cost. I recommend that you either do this or fold your tent and quietly take your departure from the National Capital.

Very respectfully,

CLYDE H. TAVENNER.

Neither Col. Thompson nor anyone else has ever thought it advisable to attempt to disprove the statements contained in my reply to the challenge of the president of the Navy League. Col. Thompson replied to my letter of December 2, but instead of discussing the facts presented, took a different course. He said in part:

In conclusion, let me repeat our invitation. Stop insinuating, come out in the open and say what you mean, and if your statements are actionable we will put you in court as fast as we can have the papers drawn.

I submit here that my letter of December 2 contained specific information of the connection of munitions makers with the Navy League. Therefore, I did not reply further to Col. Thompson, but began work on my resolution to investigate the Navy League.

SOME CORRESPONDENCE WITH MR. DADMUN.

On November 23, 1915, my attention had been attracted to the following news item in the Washington (D. C.) Star:

NAVY LEAGUE COURTS CONGRESSIONAL INQUIRY—ANXIOUS TO REFUTE REPRESENTATIVE TAVENNER'S CHARGES, ASSERTS SECRETARY DADMUN.

Following a statement by Representative TAVENNER, of Illinois, that he would introduce a resolution of inquiry to prove his contention that the Navy League is financed by persons interested in war munitions, A. H. Dadmun, secretary of the league, to-day declared that if an investigation could be held it would be all that the organization desires.

The statement issued by Mr. Dadmun says:

"Nothing would please the officers and directors of the Navy League more than to open our books and demonstrate to Congress and the country that the nation-wide movement on behalf of naval preparedness is a movement of, for, and by the American people. The league is supported by red-blooded Americans whose motives are unselfish and patriotic.

"Among these unselfish American patriots is J. P. Morgan, who became a life member on the payment of $25 more than eight years ago. The only other contribution or support either asked for or received from Mr. Morgan was received four years ago, when he contributed $100 to meet the traveling expenses of speakers attending a western convention."

In reply to this statement of Mr. Dadmun's I wrote the following letter:

HOUSE OF REPRESENTATIVES,
Washington, D. C., November 24, 1915.

Mr. A. H. DADMUN,
Secretary the Navy League, Washington, D. C.

MY DEAR MR. DADMUN: I notice in your statement of yesterday that you state J. Pierpont Morgan is an "American patriot." Evidently you miss my point. I do not charge that Mr. Morgan is not an "American patriot." I charge that he is a war trafficker, and that he is a director of the Navy League, which is advocating larger appropriations for the war traffickers.

I also note that you state Mr. Morgan has contributed only $125 to the Navy League. I understand that the J. Pierpont Morgan estate contributed $2,000 on June 10. Will you please inform the public whether this is correct and what individual or individuals made this contribution on behalf of the Morgan estate?

I also understand that Elbert H. Gary, who is described in the Directory of Directors for 1914 as "chairman of the board of directors and chairman of the finance committee of the United States Steel Corporation," contributed $1,000 on the same date.

Will not the Navy League please issue a special statement to cover these two contributions and also state whether the board of directors of the Navy League is considering the advisability of going on record in favor of the Government manufacture of munitions, battleships, submarines, etc., in order that the people may obtain a dollar's worth of preparedness for every dollar of their money appropriated, which they have not been getting in the past?

Very respectfully,

CLYDE H. TAVENNER.

NAVY LEAGUE OF THE UNITED STATES,
Washington, D. C., November 29, 1915.

Hon. CLYDE H. TAVENNER,
House of Representatives, Washington, D. C.

MY DEAR MR. TAVENNER: About three and a half years ago Col. Thompson asked the late J. Pierpont Morgan to join with himself and one other gentleman in giving the Navy League a thousand dollars a year for five years. He appealed to Mr. Morgan as one who usually took the lead in any great national undertaking calling for patriotism and public spirit, and solely from the standpoint of unselfish patriotism Mr. Morgan consented to give a thousand dollars a year for five years. Col. Thompson, at the dinner, June 10, informed the people of Mr. Morgan's promise and referred to the inspiring letter he wrote him on that occasion. The three payments have already been made of this, and the administrators of the Morgan estate, on seeing a copy of the letter from J. Pierpont Morgan, have agreed to carry out his promise, and

we hope to receive a thousand dollars before the close of this year and another thousand dollars next December. I have never received any communication from Mr. Jack Morgan regarding his father's subscription, nor has he ever mentioned it to me.

Judge Gary was at the dinner, and at the solicitation of Jacob Schiff, who handed around a subscription paper, and headed it himself for a thousand dollars. Mr. Gary signed for an equal amount.

* * * * * * *

Yours, very truly,

A. H. DADMUN,
Secretary of Navy League.

P. S.—Been away, hence delay in writing. Thank you for so much free advertising. Your recent letter brought us $25 from an entire stranger.

RESOLUTION OF INQUIRY IS INTRODUCED.

On January 19, 1916, I introduced the resolution to investigate the Navy League. It was referred to the Committee on Rules, but was never reported out of committee. The resolution follows:

House joint resolution (H. J. Res. 112) providing for a committee to investigate certain matters relating to the materiel of the Army and Navy.

Whereas more than $200,000,000, raised principally by taxing the things that the people eat, wear, and use, have been expended annually on the Army and Navy, under the general assumption that in return for this colossal expenditure the Nation was being reasonably "prepared"; and

Whereas it is now being generally asserted in many quarters that the Nation is pitifully "unprepared," the specific charge having been made on the floor of the House of Representatives by a Member thereof that "If war were to break out to-day, it would be found that our coast defenses have not sufficient ammunition for an hour's fight"; and

Whereas it has also been charged in the Congress that millions of dollars of public funds have been wasted by the payment to private manufacturers by Army and Navy officers of from 20 to 60 per cent more for large quantities of Army and Navy supplies than the same could have been obtained for through their manufacture in Government arsenals and navy yards; and

Whereas President Wilson, in a message to the Congress on December 8, 1914, said that, "Like good stewards we should so account for every dollar of our apropriations as to make it perfectly evident what it was spent for and in what way it was spent"; and

Whereas the profit incident to the manufacture and sale of arms, armament, and munitions of war has a tendency to corrupt public opinion, disturb international peace, and prevent a peaceful settlement of disputes between nations; and inasmuch as it ought to be made impossible for any person or corporation to make money out of war; and inasmuch as the Government should, for its own safety and protection, manufacture all arms, armament, and munitions of war for the equipment, construction, and use of the Army and Navy, to the end that it may be independent of individuals and corporate interests; and

Whereas there has been public criticism of the action of ex-Army and ex-Navy officers who after resigning or retiring have taken employment with concerns having dealings with the Government; and

Whereas it has been charged that supposedly secret plans and designs worked out by officers and employees of the Navy Department at public expense for exclusive use in American battleships were furnished to a private firm to be embodied in battleships for another nation; and

Whereas it has been charged that the Navy League, an organization active in agitating for increased naval expenditures, has among its founders, officers, members, and directors persons who are or have been officers, directors, or stockholders of war-trafficking firms or concerns which stand to profit financially from the increased naval appropriations being agitated by said Navy League; and

Whereas hearings by the lobby investigation committee of the United States Senate in 1915 revealed that Senators now in office were stockholders of war-trafficking firms and concerns which profit financially from Government appropriations for the Army and Navy; and

Whereas any or all of the divers matters heretofore mentioned may bear on the alleged wasting of public funds and the alleged unpreparedness of our Nation in spite of the enormous appropriations made by Congress annually; and

Whereas it is deemed advisable to gather the facts bearing on the aforesaid conditions and charges, or in any way or manner relating thereto or to any of the subjects above mentioned, as a basis for remedial and other legislative purposes: Therefore be it

Resolved, etc., That a joint committee of the Senate and House of Representatives, to consist of six Members of the Senate, to be appointed by the President of the Senate, and six Members of the House of Representatives, to be appointed by the Speaker of the House, is hereby empowered, authorized, and directed—

First. To investigate fully and inquire into each and all of the above-recited matters and into any matters and subjects connected with or appuretenant to or bearing upon the same.

Second. To investigate fully and inquire into—

(a) The total amounts paid to private manufacturers for guns, ammunition, torpedoes, powder, armor plate, submarines, battleships, and other equipment and supplies used by the Army and Navy in large quantities for each year since 1887, and approximately what the saving would have been to the people if the capacity of Government establishments had permitted the complete Government manufacture of said equipment;

(b) The extent of the economy or extravagance which has resulted from the Government manufacture of Army and Navy equipment of any kind whatsoever which the Government is now engaged in manufacturing;

(c) The most feasible plan of acquiring or constructing manufacturing plants of sufficient capacity to supply the Army and Navy with all arms, armament, and munitions of war, including ships and their equipment;

(d) The probable cost of such manufacturing plants, taking into account both present and future military needs;

(e) The proper locations for such manufacturing plants;

(f) The necessary legislation to prevent either persons or corporations from engaging or continuing in such manufacture, and when such legislation should take effect.

Third. To investigate and report the extent to which Army and Navy officials on the retired list, or who have resigned from the Army and Navy, are now connected, or have ever been connected, with concerns having dealings with the Government.

(a) Or to investigate any alleged connections, direct or indirect, between any Army or Navy officer, either on the active list or the retired list, and concerns which now have, or have had, dealings with the Government;

(b) Whether any Army or Navy officers on the pay roll of the Government, either on the active or retired list, are now, or ever have been, in any contract by which they are, or were, to receive royalties on implements of war sold to foreign Governments.

Fourth. To compile a list of ex-Army and ex-Navy officers employed by private concerns, and the names, places, and character of the business engaged in by the concerns with which said persons are, or have been, connected.

Fifth. To investigate and report the circumstances under which any private concern has been able to obtain plans and specifications from the Navy Department for use in constructing battleships for a foreign nation.

Sixth. To investigate the quality of work of any character supplied the Government by private concerns or the circumstances involved in connection with the making of any contracts between the Government and any private concern.

Seventh. To ascertain the extent to which individuals who are, or who have been, founders, directors, officers, life members, or contributing members of the Navy League, or similar organizations, are, or have been, stockholders, officers, directors, or employees of concerns which stand to profit from the increased appropriations for the Army and Navy which are being advocated by the Navy League or kindred organizations.

Eighth. To inquire into the organization, membership, expenditures, receipts, and sources thereof of Labor's National Peace Council or any organizations which have been active in the propaganda for or against an embargo on munitions of war or the proposed increases in the Army and Navy of the United States.

Ninth. To ascertain the extent to which Members of Congress, both of the Senate and House of Representatives of the United States, own, hold, or control, directly or indirectly, or have ever owned, held, or controlled, directly or indirectly, at any time during their membership in this or any preceding Congress, stock or bonds in any concern or concerns which are now or have been engaged in the manufacture of munitions of war.

Tenth. To ascertain the extent to which Members of Congress, both of the Senate and House of Representatives of the United States, own, hold, or control, directly or indirectly, or have ever owned, held, or controlled, directly or indirectly, at any time during their membership in this or any preceding Congress, stock or bonds in any concern or concerns which have profited financially by virtue of contracts for munitions, armament, ships, or other supplies or materials, under moneys appropriated in the Army, Navy, fortifications, sundry civil, or other appropriation bills, or, if deemed advisable, to require Army and Navy officers or any person or persons who have taken an active part for or against increased Army and Navy appropriations to testify as to their holdings of stocks or bonds.

Eleventh. To require munitions concerns or firms which have obtained contracts for materials of any character under Army and Navy appropriations to furnish sworn lists of its stockholders and bondholders on June 30, 1914, June 30, 1915, or such other dates as it may designate, or to require stock brokers to furnish lists of those for whom they have bought or sold stocks or bonds.

That said joint committee be authorized to take testimony, have the power to administer oaths and to send for persons and papers, and to compel witnesses to attend and testify, and to report at the earliest practicable date, or to make partial reports at intervals of time during the course of proceedings if in the judgment of the committee such action appears advisable, and be authorized to sit by subcommittee or otherwise during the sessions or recesses of Congress at such times and places as it may deem advisable, and to employ such clerical and stenographic assistance as it shall deem necessary; to order such printing and binding done as may be required in the transaction of its business and to incur such expenses as may be deemed necessary, all such expense to be paid in equal proportions out of the contingent funds of the Senate and the House of Representatives upon vouchers signed by the chairman of the committee and approved by the proper committee of each House; and that the hearings of this committee be open to the public: *Provided*, That any Member of the House or Senate who is in this, or has been in any preceding Congress, a member of the Military Affairs, Naval, or the Appropriations Committee of the House or Senate, or has held, owned, or controlled, directly or indirectly, during this or any preceding Congress any stock or bonds in concerns which have profited under Army or Navy appropriations, or whose relatives, either by blood or marriage, have held, owned, or controlled, directly or indirectly, bonds or stock in such concerns, shall not be eligible for appointment on the committee herein provided for.

NAVY LEAGUE EMPLOYEES EMBARRASSED IN ANSWERING DIRECT QUESTIONS.

Constant dodging and misstatement is the policy of the Navy League in answering specific questions concerning the identity of men affiliated with the Navy League. The following correspondence between the late Col. H. N. Wheeler, editor of the Quincy (Ill.) Journal, and an employee of the league, offers an illustration. This correspondence was furnished me by Col. Wheeler some months before his death.

QUINCY, ILL., *March 23, 1916.*

Mr. W. A. MCGARRY,
Press Secretary Navy League of the United States,
Navy League of the United States,
Southern Building, Washington, D. C.

MY DEAR MR. MCGARRY: I beg to acknowledge receipt of your favor of the 15th instant in which you state that certain statements made by Representative TAVENNER on the floor of Congress, reproduced in the Journal, are untrue. You send me the inclosed clipping, which I am returning so that you will see what you have called our attention to. The Journal desires to be accurate in every way and therefore desires to ask you some questions. I trust you will answer them at your earliest convenience and thus put us right in the matter.

I notice that the letterhead on which you write me states that Robert M. Thompson is president of the Navy League. Is this the same Robert M. Thompson who is chairman of the board of directors of the

International Nickel Co.? Do you wish me to infer by your letter that Robert M. Thompson has contributed only $100 to the Navy League? If you have no objection will you please inform me as to the total amount Col. Thompson has contributed to the Navy League during its career?

I note on the letterhead of the Navy League the statement that Robert Bacon is chairman of the executive committee of the Navy League. Is this the Robert Bacon who is a director of the United States Steel Corporation? I note that the letterhead says that Herbert L. Satterlee is counsel of the Navy League. Is this the Satterlee who is a brother-in-law of J. P. Morgan? I notice in the list of directors the name of J. P. Morgan. May I ask whether this is the same J. P. Morgan whom Lloyd George referred to in the House of Commons on June 24, 1915, when he stated that Morgan & Co. were the accredited agents of the British Government in the United States, or is it your contention that J. P. Morgan is not a war trafficker?

Trusting that you will answer these specific questions to make the situation perfectly clear, I remain,

Very truly, yours,

H. N. WHEELER.

NAVY LEAGUE OF THE UNITED STATES,
Washington, D. C., March 28, 1916.

H. N. WHEELER, Esq.,
The Quincy Journal, Quincy, Ill.

MY DEAR SIR: In answer to your letter of March 23, may I state that the Robert M. Thompson whose name appears on our letterhead was once president of the International Nickel Co., but has long ago retired from that position.

* * * * * * *

A rash conclusion reached because there are other men of multitudinous financial interests that may be affected by conditions of war or peace is no less unjustified. There is the case of J. P. Morgan, for instance, who as a life member of the league, has paid $25 into its coffers, and who in addition once contributed $100 to defray the traveling expenses of a speaker to a Navy League convention. Mr. Morgan has never taken any active part in the work of the league, has never in any way attempted to influence its course, and hasty conclusions to the reverse are simply erroneous and unjust.

* * * * * * *

I must protest that you are assuming an attitude which strikes me as being far from fair. You are assuming that men with large interests play parts in public affairs which they do not play. It might not be illogical that you should assume an organization occupying the position of the Navy League would be voluntarily backed by armor-plate and munition manufacturers, yet you have no right to assert that it is so backed unless you know your facts. *If you would take it from me as a fact, it might be interesting to you from a psychological standpoint to know that no individual or organization has ever volunteered to contribute a sum as large as a thousand dollars to the Navy League.* No organization or individual has ever even accumulatively through a series of years contributed more than $5,000 to that organization. No contributor has ever made any attempt to control the policies of the league. These statements may seem illogical to you, but we offer to you as we have offered to Mr. TAVENNER and Mr. Bryan and Mr. Ford and others who have jumped to the conclusion that we represented special interests, access to our books, that you may make a complete examination and determine the source from which all our limited funds have come. We have offered to place the lists of all our contributors and the amounts given at the disposal of Mr. TAVENNER or anyone who would like to have them printed in the CONGRESSIONAL RECORD.

With all these opportunities to determine facts, we hold that there is great injustice in blindly making charges against us without any effort to determine the facts.

Very truly, yours,

———— ————,
Field Secretary.

It will be noted that Col. Wheeler asked:

Is this the same Robert M. Thompson who is chairman of the board of directors of the International Nickel Co.?

The field secretary of the league parried this question by answering one that was not asked. He replied:

The Robert M. Thompson whose name appears on our letterhead was once president of the International Nickel Co., but has long ago retired from that position.

The field secretary did not think it incumbent upon him, evidently, to state that Col. Thompson was still the chairman of the board of directors of International Nickel.

The field secretary also states:

If you would take it from me as a fact, it might be interesting to you from a psychological standpoint to know that no individual or organization has ever volunteered to contribute a sum as large as a thousand dollars to the Navy League.

Unless there is some hidden meaning to the words "volunteered to contribute," this statement is absolutely without foundation. For instance, it is wholly at variance with the following statement contained in Secretary A. H. Dadmun's letter dated November 29, 1915:

Judge Gary was at the dinner and, at the solicitation of Jacob Schiff, who handed around a subscription paper and headed it himself for a thousand dollars, Mr. Gary signed for an equal amount.

THE OFFICIAL MINUTES OF THE NAVY LEAGUE.

That Col. Thompson, the head of the Nickel Trust, has been a sort of Santa Claus for the Navy League throughout its entire existence, is indicated by the official minutes of the Navy League, from which I have copied a number of interesting paragraphs, which follow.

Extract from letter sent out by Navy League soon after its incorporation to "individuals and chairmen of sections":

About 18 months ago our attention was brought to the matter of the great influence exercised by the navy leagues of Germany and England.

The minutes of an executive committee held on April 28, 1904, reveal the manner in which the league obtained some of its founders. The minutes contain the following letter from the League Publication Co., 78 Broad Street, New York:

NEW YORK, *April 27, 1904.*

NAVY LEAGUE OF THE UNITED STATES.

DEAR SIRS: Our company will undertake to find founders, life, subscribing, and regular members for your league acceptable to you on the basis of a commission of 50 per cent of the subscriptions. Checks to be drawn to the order of your treasurer and forwarded to him periodically at least once a week, the commissions to be paid by the league to the company weekly on the basis of the previous week's subscriptions.

Yours, truly,

WM. R. ————, *President.*

From minutes of meeting of executive committee held at office of Vice President Robert M. Thompson, December 5, 1904, at which meeting Rear Admiral Higginson, United States Navy, was present:

A discussion followed concerning the ways and means of meeting the running expenses, and Col. Thompson withdrew from the meeting and returned in a few minutes and reported that he had obtained a contract for a one-page advertisement for the Journal for one year from the International Nickel Co., which agreed to pay therefor the sum of $500 in advance. During the meeting the committee were entertained at lunch by Col. Thompson.

From minutes of executive committee held on December 26, 1905:

A committee consisting of Col. Robert M. Thompson and Herbert L. Satterlee, Esq., were appointed to confer with Paul Morton, Esq., president of the Equitable Life Association, regarding the circulation of the edition. The committee reported that after consultation with Mr. Morton he had agreed to send to each of the 8,000 agents of his company two copies each of the journal with instructions that the same be distributed.

The meeting then considered the advisability of employing a paid organizer to travel through the country and establish sections of the league. After a general discussion of the ways and means, Col. Thompson offered the following generous proposition: That if he would not be called upon for any other work in connection with the affairs of the league he would guarantee to provide $10,000 to be applied toward the payment of the salary and expenses of the organizer. It was decided that a retired naval officer would be the most suitable person for this service.

From minutes of meeting of executive committee of the Navy League held February 9, 1906:

A letter from Col. Robert M. Thompson was read informing the league that he had employed an organizer to travel through the Southern States for the period of six months at the salary of $100 per month. It was unanimously voted that the generous proposition of Col. Thompson be accepted with thanks.

The minutes of the board of directors' meeting of March 27, 1906, contained this item:

The secretary was directed to convey to Commander E. C. Benedict the thanks of the board for his generous contribution to the funds of the league.

From minutes of meeting of executive committee held at office of Col. Thompson, October 5, 1906:

It was suggested that a form of letter be prepared to be sent to the midshipmen asking them to interest their relatives and friends in their home towns in the work of the league. At 1 o'clock a recess was taken, and the committee and their guests were entertained at lunch by Col. Thompson.

From minutes of meeting of the board of directors of the Navy League held on October 29, 1906:

Col. Robert M. Thompson then addressed the board at some length in regard to the future prospects of the league. At the conclusion of his remarks, on motion duly seconded, it was voted that the patriotic and generous proposition of Col. Thompson be accepted and that the details thereof be left to the executive committee with power.

From minutes of meeting of executive committee held at office of Col. Thompson, 43 Exchange Place, New York City, November 28, 1906:

Col. Thompson further offered to personally pay the expense of printing and publishing the Navy League Journal until the completion of the present volume, No. LV, that is, including No. 12, the number for December, 1906. He further offered to pay the running expenses of the headquarters of the league for one year, and authorized the league to call on him (or his representative, Miss Van Brunt) for not to exceed $600 per month for the two purposes above outlined, or not to exceed $250 a month for the expenses of headquarters alone, upon voucher to be signed by the chairman of the executive committee.

From minutes of meeting of board of directors of Navy League of March 13, 1907:

Mr. W. H. Stayton informed the board that he would guarantee the expenses for the work of the league, aside from headquarters running expenses, for the period of one year, to the amount of $3,000; Mr. H. H. Ward also made the same offer, and on motion duly made and seconded the generous propositions were accepted.

The minutes contained the following agreement dated New York, May 17, 1907 (in part):

Robert M. Thompson and Henry H. Ward have agreed and do jointly and severally hereby agree to guarantee or underwrite until and including March 31, 1909, all expenses of the league office at 78 Broad Street, New York, other than those which, as in the preceding paragraph, Robert M. Thompson has agreed to directly assume individually, and to guarantee or underwrite until and including March 31, 1909, any or all expenses connected with any other office or offices which Robert M. Thompson and Henry H. Ward may hereafter agree to

include under this agreement. By agreeing to guarantee or underwrite such expenses, it is intended that they shall undertake and they do undertake to actually pay, without any purpose of being reimbursed and without any claim or right to reimbursement, all such expenses for the now current fiscal year of the league; and that for the coming fiscal—i. e., the year ending March 31, 1909, their guaranty extends to all such expenses as are hereinbefore in this paragraph enumerated, which are not fully met and covered by the assessment and the payments under assessment to be made at the annual convention of 1907–1908 for the fiscal year ending March 31, 1909, the amount of assessment received by the league treasury to be an offset against the expenses so guaranteed. The agreement of guaranty made in this paragraph has been made in consideration of those fiscal and other measures included in the by-laws adopted May 2, 1907, and holds good only so long as those by-laws remain in effect and in no case does it hold good beyond March 31, 1909. This joint agreement of Robert M. Thompson and Henry H. Ward equally with the individual agreement of Robert M. Thompson does not apply in any sense to any expenses or obligations of the League Publishing Co. Furthermore, the joint responsibility of each of the guarantors under this paragrah of the agreement is limited to a total amount of $6,000 and the responsibility of each severally is limited to $3,000.

From minutes of meeting of board of directors of Navy League held at office of Col. Thompson, 43 Exchange Place, February 6, 1909:

The secretary reported correspondence which he had had with Pond Lecture Bureau in regard to league representatives traveling with Admiral Evans, and in connection with his tour. Mr. Glass, representing the Pond Bureau, appeared before the meeting and having stated that he was dissatisfied with certain action of the league representatives, said that he intended telegraphing Admiral Evans to discontinue mentioning the league in his lectures. Whereupon the chairman, Mr. Stayton, requested him to consider the interview closed and to withdraw.

From minutes of meeting of board of directors of Navy League held at office of Col. Thompson, 43 Exchange Place, March 8, 1909:

The secretary and field secretary were directed to draw up and submit at the next meeting of the board a circular leter to be used in notifying prominent citizens throughout the United States of their election to membership in the league.

TESTIMONY BEFORE COMMITTEES OF CONGRESS.

I desire to add for preservation in the CONGRESSIONAL RECORD my testimony before the Committee on Rules of the House of Representatives on January 19, 1916, in support of the resolution to investigate the Navy League, and also my testimony before a special committee of the House appointed to expunge certain remarks of Hon. OSCAR CALLAWAY, of Texas, reflecting on Hon. AUGUSTUS P. GARDNER, of Massachusetts.

PEACE PROPAGANDA INVESTIGATION.

STATEMENT OF HON. CLYDE H. TAVENNER, MEMBER OF CONGRESS FROM ILLINOIS.

Mr. TAVENNER. Mr. Chairman and gentlemen of the committee, I am very anxious to see an investigation by Congress; but as Mr. CHIPERFIELD says, even after you investigate the four organizations that are named in Mr. GARDNER'S resolution and in Mr. HENSLEY'S resolution, you would then have only arrived at the point where you ought to start to investigate. I realize that what the Navy League is or is not is not very important, so far as the subject of defense is concerned. The important thing is this, that $240,000,000, raised by taxing the things that the people eat, wear, and use, have been expended annually on the Army and Navy, and that now, it is said, we are "pitifully unprepared," and that "if war were to break out to-day, it would be found that our coast defenses have not sufficient ammunition for an hour's fight."

It seems to me the thing we really ought to investigate is the question as to where all these millions of dollars have gone, the circumstances under which contracts have been made by Army officers with private munitions firms, and the prices that we have paid for armor and munitions of war. The public service that would result from that kind of an investigation, in my opinion, would be this: We could profit by the mistakes that have been made in the past. If we are not prepared after spending $240,000,000 a year, what reason is there to believe that we would be prepared if we spend $340,000,000 a year?

So far as my motives are concerned, I wish to say this: I have not made a single dollar of profit out of my campaign for Government manufacture of munitions.

Mr. GARDNER suggested that both he and I be investigated. I am perfectly willing to be investigated, and I wish to make this statement right here now, that I am at the service of any gentleman who desires to question me further on the matter, any gentlemen in this room, any member of the committee, or anyone else. I have not made one penny of profit from any source whatsoever, neither from any writings of newspaper articles, nor from any lectures, nor from any other source. I do not belong to any organization; I am not affiliated with any organization, and I report to no one and take orders from no one except my constituents. I have gone as far as New York from Illinois to make speeches on the proposition of Government manufacture of munitions of war, and I have paid my own expenses; not only my own car fare but my own hotel bills. However, I do not wish to be understood as meaning that I deserve any credit on account of not having my expenses paid when I have traveled about making speeches for Government manufacture; I am just stating the fact that my expenses were not paid. No one ever offered to pay them. I am not criticizing any Member of Congress who has been paid for speaking. Members are constantly receiving requests to go to various cities and deliver addresses, and they can not afford to make this practice unless they receive some compensation. After making several trips and not receiving expenses or compensation, I have quit accepting invitations to speak, as I find it too expensive a luxury for me to indulge in.

I repeat, I have not made a single penny of profit out of this campaign from any source, and the minute any gentleman shows I have, I will resign my seat in Congress. I now put myself at the disposal of the gentleman from Massachusetts to ask me any questions he desires as to whether I have made one penny of profit from any source. If he desires to ask me any question, I will be glad to answer him.

Mr. GARDNER. Did you address that to me?

Mr. TAVENNER. Yes, sir.

Mr. GARDNER. I simply say that both sides ought to be investigated.

Mr. TAVENNER. I would consider it a luxury to be investigated.

Mr. GARDNER. And see whether you write letters for the newspapers.

Mr. TAVENNER. I have not written any articles for pay for a year and a half, or about that time. I have discontinued my newspaper service. I used to conduct a newspaper bureau and wrote an article every day from Washington for six or eight years. I wrote those articles for the pay the papers gave me, and they paid just enough to enable me to live.

Mr. GARDNER. I take absolutely your word for that as sufficiently convincing.

Mr. TAVENNER. It is a question of facts. What we ought to do is this: We ought to find out what Members of Congress own stock in war-trafficking firms. It is not a question of establishing motive but of fact. Let the people know the facts, and if it is all right for Members of Congress to own stock in the munitions firms, they can get out among their constituents and say, "Vote for me! I own stock in such and such munitions concerns! Is not this fact an indorsement of my candidacy?" If there is nothing wrong about it, perhaps their majorities will be increased. In any event, we should let the people know the facts.

Mr. CHIPERFIELD. Mr. TAVENNER, may I inquire whether you have carried on campaigns about the present status of war contracts?

Mr. TAVENNER. I am fighting for Government manufacture of munitions.

Mr. CHIPERFIELD. And I would judge that had been a source of considerable expense to you?

Mr. TAVENNER. It has.

Mr. CHIPERFIELD. Has that all been met privately?

Mr. TAVENNER. Yes. I have used too much of my salary, more than I could really afford. I have no income except what I draw from the House of Representatives as a Member.

Mr. CHIPERFIELD. Has that all been paid from your own private funds?

Mr. TAVENNER. From my salary which I receive as a Member of the House of Representatives. It has not been so very expensive, however, for the reason that I have my clerk, as a Member of Congress, and I can send out extracts from my remarks in the CONGRESSIONAL RECORD at very little cost. Before I sent out these extracts to the newspapers I made up a sample and submitted it to the Post Office Department, asking, "Is it all right for me to mail this matter under my frank?" They replied, "It is absolutely all right to frank that. All you must state is that the matter is from the CONGRESSIONAL RECORD, extracts from remarks, etc."

I want to see an investigation, but I want this matter inquired into: Why are we paying from 20 to 60 per cent more for millions of dollars' worth of munitions, armor, etc., than we can manufacture them for in the Government arsenals and navy yards? I realize there are two sides to this policy, and an investigation would bring out both sides. I am not afraid to have the argument of the other side heard, and then I want to have the argument in favor of Government manufacture heard.

As soon as the House convenes to-day I shall introduce a resolution asking for the appointment of a committee to investigate a number of matters of great importance.

I realize the Navy League is only a side issue. My statement about the Navy League was not that these men were not inspired by lofty motives, but that they owned stock in war-trafficking firms; that the founders of the league were such, and I believe an investigation would reveal that the Navy League originated at 23 Wall Street, in the office of J. P. Morgan & Co. The reason I believe that——

The CHAIRMAN. You mean to say that in your resolution you will charge that Members of Congress and Senators own stock in munition-trafficking concerns?

Mr. TAVENNER. There was an investigation in 1914–15 by a committee of the United States Senate into lobbies, and two Members of the Senate testified, under oath, that they owned stock in such concerns; others that their relatives owned stock.

The CHAIRMAN. You want to broaden this resolution?

Mr. TAVENNER. Yes, sir; I want to broaden this resolution to take in everything, because I realize nothing would be gained by the public if we investigated only the unimportant part.

Mr. CHIPERFIELD. Are those Senators present Members of the Senate?

Mr. TAVENNER. Yes; they are Senators now.

Mr. GARDNER. Did you ask what the stock was they owned?

Mr. TAVENNER. Yes, sir; the stock was that of the General Electric Co. and the United States Steel Corporation. The General Electric Co. has drawn down two and one-half millions of dollars worth of contracts from the Navy Department, receiving orders every year, and it is reported in the Standard Corporation Service Reports as having profited hugely from the European war, and it is so reported in the Wall Street Journal and in Financial America. They all have it down as a war trader.

I think the orders from the United States Government were received during the time Senators held stock. If not, let us ascertain when they bought the stock, how long they held it, and all about it.

Mr. GARDNER. But the other orders?

Mr. TAVENNER. From these various countries?

Mr. GARDNER. Yes.

Mr. TAVENNER. I would not be surprised if there had been some withdrawals since the European war.

Mr. GARDNER. The General Electric Co. is in my county. I sold out my stock. [NOTE.—Jan. 22, 1916.—I am a trustee of certain trusts containing General Electric shares. My wife is a small beneficiary and my married daughter is a substantial beneficiary.]

Mr. TAVENNER. Did you sell out your stock before General Electric received contracts from the Navy Department?

Mr. GARDNER. I never heard until this minute of any contracts with the Navy Department. That is the trouble; a man makes investments, and he can not go into everything; but I got rid of my General Electric Co. stock when I found out that they had contracts to make munitions.

Mr. TAVENNER. I would like to ask you what relation George Peabody Gardner is to you?

Mr. GARDNER. He is a first cousin.

Mr. TAVENNER. He is a director in the General Electric Co., which is a J. P. Morgan concern; is not that correct?

Mr. GARDNER. Yes.

The CHAIRMAN. You have called these matters to the attention of the Committees on Naval Affairs and Military Affairs and asked them to make inquiry?

Mr. TAVENNER. No; because I thought the proper way to do this would be by a special joint committee of Congress.

The CHAIRMAN. Those committees would have jurisdiction even now to inquire into the expenditure of money which we are appropriating in Congress for the Army and Navy.

Mr. TAVENNER. Yes, sir; but I want investigated some other things of a nature that they probably would not feel like going into.

I want certain Wall Street brokers to testify and give names of patrons who are Army and Navy officers.

The CHAIRMAN. Are you going to specify those things in your resolution?

Mr. TAVENNER. Yes, sir. I want to find out by what authority secret plans and specifications worked out by officers and employees of the Navy Department were turned over to a private firm, for use in foreign battleships, and I have——

Mr. CHIPERFIELD. Do you know that to be true?

Mr. TAVENNER. Yes, sir; I do.

Mr. FOSTER. Did you ever place that before the Navy Department?

Mr. TAVENNER. No, sir; the Navy Department knows about it. I have here a copy of the resolution which I shall introduce to-day. I will read it.

Mr. FOSTER. I do not think that will be necessary, if you are going to introduce it.

Mr. CHIPERFIELD. Have you informed the War and Navy Departments of that fact?

Mr. TAVENNER. They know it.

Mr. BENNET. Is that in relation to the fire-control plans sold to the Greek Government?

Mr. TAVENNER. No, sir; to the Argentine Government.

Mr. LENROOT. Mr. TAVENNER, is it your opinion that an investigation as proposed in this resolution before the committee now would be of public benefit or benefit with reference to action of Congress?

Mr. TAVENNER. I believe it would. I believe the people ought to know all about the identity of the gentlemen who founded the Navy League.

I desire to add this, that while I do not agree with Mr. GARDNER on everything, and am unwilling to go to anything like the length he would have us go, I realize he has given much painstaking study, time, and energy to the work of educating himself on matters pertaining to the Army and Navy. I believe his work, on the whole, will be beneficial for this reason; I am satisfied in my own mind that millions and millions of dollars appropriated for defense have been wasted by the payment of excessive prices for materials of various kinds. I believe that the Nation does not have the Army and Navy it should have for the colossal sums that have been expended upon them. Mr. GARDNER has called attention to certain weaknesses in our defenses, and they will be corrected. In the meantime the eyes of Congress and the people are being opened to the fact that they have not been receiving a dollar's worth of defense for every dollar appropriated. I believe the result will be that public sentiment will ultimately force Congress to manufacture its own munitions, armor, battleships, submarines, etc. I expect legislation looking to this end to be enacted even in the present session of Congress. Once private profit and private graft are taken out of war and preparation for war, I am confident that that part of the systematic agitation for increased Army and Navy appropriations that is bought and paid for will cease overnight, and that the now threatening danger of a military autocracy in this country will completely vanish.

STATEMENT OF HON. CLYDE H. TAVENNER, A REPRESENTATIVE IN CONGRESS FROM THE STATE OF ILLINOIS, ON AUGUST 14, 1916, BEFORE A SPECIAL COMMITTEE OF THE HOUSE COMPOSED OF REPRESENTATIVES PAGE, RAKER, TAYLOR, MONDELL, AND TOWNER, APPOINTED TO REPORT ON EXPUNGING FROM THE CONGRESSIONAL RECORD CERTAIN LANGUAGE OF HON. OSCAR CALLOWAY IN REFERENCE TO HON. AUGUSTUS P. GARDNER.

Mr. TAVENNER. If the committee is willing, I would like to ask Mr. GARDNER a couple of questions through the chairman.

Mr. TAYLOR. Inasmuch as Mr. TAVENNER has been referred to here a number of times, I think he should be permitted to ask the questions.

Mr. RAKER. You may proceed, Mr. TAVENNER.

Mr. TAVENNER. Relative to the $2,500,000 worth of contracts obtained by the General Electric Co. from the Navy Department, I would like to ask Mr. GARDNER whether he knows approximately the amount of the contracts, or the value of contracts, obtained by the General Electric Co. from the Fore River Shipbuilding Co., the Bethlehem Steel Co., New York Shipbuilding Co., and various other shipbuilding companies as a result of the contracts received by those concerns from the Navy Department? I ask that for this reason: The Government itself has in the past done very little in the way of building ships, but the ships, submarines, etc., are built by private concerns which purchase many of the supplies necessary for that purpose from the General Electric Co.

Mr. GARDNER. I have no idea. I have never looked into that.

Mr. TAVENNER. I would like to ask Mr. GARDNER how much stock he personally owned in the General Electric Co. in October, 1914?

Mr. GARDNER. I think I owned 625 shares. I have not looked it up, but I can tell you what I owned on December 31.

Mr. TAVENNER. That is near enough. I wanted to know approximately how much you had at about that date.

Now, one other question: I have here what purports to be a telegram signed by you and printed in the New York World on August 21, 1915. It does not purport to be an interview, but appears to be a telegram signed by you, as follows:

HAMILTON, MASS., *August 20.*

If Wilson takes a bold stand, the country will take a bold stand, even if it means war. If Wilson wabbles, the country will wabble. If I were Wilson, I should send Count Bernstorff home at once and call Congress together, with the recommendation that war be declared against Germany. I hope that the President will not write any more notes.

A. P. GARDNER,
Member of the House of Representatives.

Mr. GARDNER. That is absolutely correct; I take pleasure in verifying it.

Mr. TAVENNER. Mr. Chairman and gentlemen of the committee, if I had been present at the time Mr. ROGERS offered the resolution under which this hearing is being held, I should have offered as a substitute therefor H. J. Res. No. 112, which I introduced on January 19, 1916, which is before the Committee on Rules and which I have never been able to get reported out of committee. Such an investigation as this resolution of mine provides for would have shown what Members of Congress own stock in war-trafficking firms and would have shown who was chiefly responsible for the present reign of preparedness propaganda. I have made the statement on the floor of the House that those chiefly responsible for the present preparedness propaganda were munition makers or men who when they started their agitation were stockholders in war-trafficking firms.

I have no personal quarrel with the gentleman from Massachusetts [Mr. GARDNER], and my only interest is to see the facts stated as they are. I will be entirely satisfied, and I think Mr. CALLAWAY will be, if it appears in the CONGRESSIONAL RECORD that Mr. GARDNER, when he started this so-called "preparedness" agitation in October, 1914, was a stockholder in the General Electric Co., that his wife was a stockholder in the General Electric Co., and that his daughter was a stockholder in the General Electric Co. This is a war-trading concern. These are facts, I understand, undisputed by Mr. GARDNER. The reason I consider this important is that Mr. GARDNER, I believe, more than any other Member of the House, is responsible for the starting of the widespread agitation for excessive preparedness, as I consider it. I want the record to show for all time that Mr. GARDNER did own this stock when he started this propaganda for increased Army and Navy expenditures. It tends to substantiate my statement that war-trafficking firms and stockholders of war-trafficking firms started the so-called "preparedness" propaganda. I do not challenge the motive of Mr. GARDNER individually, and I have never challenged the motives of the members of the Navy League individually. I have simply called attention to facts so that the public may consider them and reach its own conclusions.

I have here a copy of the Navy League Journal, and I desire to direct the attention of the committee to the fact that on the first page appears the statement that this is "the official organ of the Navy League of the United States."

Mr. RAKER. What is the date of that publication?

Mr. TAVENNER. February, 1904. This was at a time when no one had ever attacked those behind this militaristic propaganda and they were a little careless in stating who was financing it. On turning to page 32 I find that this official journal of the Navy League publishes these names under the head of "Founders"—I do not say that these men were the founders, but I say that the official organ of the Navy League itself represents them as the "founders" of the Navy League:

"FOUNDERS.

"Herbert L. Satterlee, J. W. Miller, J. Pierpont Morgan, Benjamin F. Tracy, Seth Low, Clement A. Griscom, Thomas Lowry, Timothy L. Woodruff, Midvale Steel Co., Anson Phelps Stokes, George Westinghouse, R. S. Sloan, John J. Astor, R. M. Thompson, Charles M. Schwab, John J. McCook, Harry Payne Whitney, George B. Satterlee, S. S. Palmer."

Of these 19 men, 14 are either war traffickers, stockholders in war-trafficking firms, or else they sat on boards of directors with men who were war traffickers. For instance, here is J. Pierpont Morgan; the Midvale Steel Co.,; Charles M. Schwab, who is now the president of the Bethlehem Steel Co. Then here is Benjamin F. Tracy, who was counsel for the Carnegie Steel Co. and the Harvey Steel Co.; Clement A. Griscom, who was a partner of Mr. Morgan's; Herbert L. Satterlee, brother-in-law of J. P. Morgan; John J. Astor, who was a fellow director of J. P. Morgan on a number of corporations; Col. Robert M. Tompson, of the International Nickel Co. (the Nickel Trust); and S. S. Palmer, president of the Harvey Steel Co.

I say that any one of these instances might not be important in itself, but when you take all of them and behold that 14 out of the 19 are men who were either at the head of war-trafficking firms, stockholders in them, or fellow directors of men who were, and then you add to that the further fact that both in the House and the Senate of the United States the individual in each House who started the present reign of preparedness propaganda was also a stockholder in war-trafficking firms—taking that whole chain of circumstances, it is something for intelligent men to consider. Maybe I am entirely wrong, but I consider this series of coincidences is at least remarkable enough to bring to the attention of the American people.

I contend that any Member of Congress who owns stock in a war-trafficking firm, or whose wife owns stock in a war-trafficking firm, or whose daughter owns stock in a war-trafficking firm, should not be permitted to take part in the debates on these great preparedness bills, which mean increased profits for war-trading firms, or to vote on them. If one of us was being examined as a prospective juryman in a suit involving a street railway company and while being examined should state that either our uncle or our father or our cousin was a stockholder we would promptly be excused. It is conceded by the legal fraternity everywhere that a person having a financial interest in a suit is disqualified to sit as a juror.

If it is improper for a man owning stock in a street railway company to sit as a juror whose only duty is to construe the application of the law, how much more improper is it for a man financially interested to actually make the law or have a hand in the making of it? The welfare of the Republic is equally as sacred as the welfare of a street railway company.

The defense of a nation is or should be the most sacred and important duty that legislators have to perform. There should be no room even for suspicion that a Member of Congress might profit financially from legislation having to do with the safety of the Nation. The problem of adequate defense can best be solved in the interest of the Republic if it is left wholly in the hands of legislators who have no investments at stake and who would therefore be beyond the possibility of being unconsciously influenced in favor of the particular "preparedness" program that might yield the largest profits.

A Member of Congress who owns, hold, or controls, directly or indirectly, or whose immediate relatives own, hold, or control, directly or indirectly, stock or bonds in any concern or concerns engaged in the manufacture of munitions of war should be prevented by law from taking any part in debates on the so-called "preparedness" appropriation bills or from voting on them.

So far as this particular matter is concerned, I am satisfied personally if the facts relative to Mr. GARDNER'S ownership of stock appear in the record. You can not prove a man's motive. But let the facts stand recorded.

Mr. Chairman and gentlemen of the committee, that is all I have to say.

Mr. GARDNER. Of course, my daughter did not own stock in General Electric when the war broke out; but, as I have shown, that was a part of her marriage portion when she was married last July. I call the attention of the committee to the fact that I have already set all these facts forth in the RECORD of June 21, 1916, when I arose to a question of personal privilege, having notified Mr. TAVENNER beforehand that I was going to do so, and Mr. TAVENNER having been present. Furthermore, I notified him that the statement I should make involved his name. Mr. TAVENNER stated that he had a statement to make involving my name. Have you made that statement?

Mr. TAVENNER. I will finish it. I inquired of Mr. GARDNER a few moments ago whether a statement which purported to be a telegram sent by him to the New York World on August 20, 1915, was accurate and official. He replied that it was. In that statement Mr. GARDNER said that if he had been President of the United States he would have called "Congress together with the recommendation that war be declared against Germany."

I stated repeatedly along about that time, although I did not then know of this telegram, that those who were leading the agitation for "preparedness" not only wanted great armaments, but that they wanted war.

I consider that the telegram Mr. GARDNER acknowledges he sent as proof of my statement, because he himself said that had he been President he would have asked Congress to declare war against Germany. Not satisfied with crape hanging on the door of nearly every home in Europe, Mr. GARDNER, if he had been President, would have had this Nation in war, and crape would to-day be on the doors of thousands of American homes.

Mr. RAKER. You had a hearing before the Committee on Rules on your resolution?

Mr. TAVENNER. Yes, sir; I wish to repeat I have no personal grievance against Mr. GARDNER. I intend my remarks to apply to any and all Members who may in the future own stock in concerns that manufacture munitions.

I certainly would be the last one to criticize Mr. GARDNER if he had accepted money for making speeches, because certainly that is clean money; I can not see anything wrong about that. I think he would have a right to do it; but I do not think that any Member of Congress who owns stock in a munitions firm ought to be permitted to take part in the debate on these questions, whether they own the stock now or owned it at any time since they have been in Congress.

Mr. GARDNER. May I ask Mr. TAVENNER a question?

Mr. RAKER. Yes.

Mr. GARDNER. Do you think that a man who owns a farm has any right to vote on any of the questions which affect a rural community, like rural credits?

Mr. TAVENNER. Yes; I would only go to a reasonable extent in applying this principle. When you actually own stock in a war-trafficking concern, I would say "No," but when you own stock in a woolen mill I think it would be far-fetched to say you should not vote on a "preparedness" appropriation bill. I would have it apply particularly to munitions firms.

Mr. TOWNER. Mr. GARDNER, do you desire to make any further statement?

Mr. GARDNER. No.

Mr. TOWNER. Then I move that we adjourn, to reconvene at the call of the chairman.

(The special committee thereupon adjourned.)

Comments on V. B. Cheshire

EXTENSION OF REMARKS
OF
HON. WYATT AIKEN,
OF SOUTH CAROLINA,
IN THE HOUSE OF REPRESENTATIVES,
Saturday, March 3, 1917.

Mr. AIKEN. Mr. Speaker, just before the last session of Congress closed the Member from the fifth Kansas district saw fit to print in the CONGRESSIONAL RECORD a lot of stuff from a notorious creature in South Carolina intending to reflect upon me and at the same time to put a coat of whitewash on the person and so-called character of a notorious crook in this city whom the Member stated was a great friend of his, and I will ask that the inclosed clipping from a reputable newspaper in South Carolina be printed as part of my remarks:

CHESHIRE'S BOND IS FIXED IN SUM OF $2,500—ANDERSON MAN IS BOUND OVER TO GENERAL SESSIONS COURT ON SERIOUS CHARGE OF RAPE.

The following is from the Anderson Mail:

"Magistrate G. H. Geiger has bound over to the court of sessions Mr. V. B. Cheshire to answer the charge of rape. The preliminary hearing was concluded late Saturday afternoon. At its conclusion the magistrate stated that he would send the case to the higher court. The next term of the court of general sessions for this county will be convened on the second Monday in May.

"Messrs. B. F. Martin, of Greenville, and G. B. Greene, of the firm of Greene & Earl, of Anderson, appeared for the defendant, while Mr. A. H. Dagnall, of Anderson, appeared for the prosecutor. Mr. Martin went to Greenville late Saturday night and made application for bail before Judge Mendel L. Smith, at chambers. On the showing made Judge Smith named bond in the sum of $2,500. The bond was executed Saturday night and was signed by Messrs. Willis McGee and Reeves Chamblee, along with Mr. Cheshire.

"The warrant for Mr. Cheshire's arrest was issued by Magistrate Geiger on the 22d day of February, and the affidavit in the warrant alleges that the defendant committed the act during the blank day of December, the girl in the case being 9 years of age and under 14 years of age. The indictment is brought under section 143 of the criminal code. The prosecutor in the case is the grandfather of the girl, and the girl now resides with her grandfather in another city in this State."

Mr. Speaker, this creature Cheshire is a notorious lawbreaker. A few weeks ago he was convicted in the United States court for sending obscene matter through the mails, and the judge let him off with a small fine, which brought forth much unfavorable comment upon the judge. Since then he has been convicted in the mayor's court of his city for beating a woman and a girl in the head with a pistol, and now he is bound over to the grand jury of the county, charged with a most beastly and heinous offense. This creature is a close friend of the close friend of the Member from the fifth district of Kansas. This close friend of the Member from the fifth Kansas is enterprising and brazen with his crookedness, as many crooks are. As a sample of his enterprise and brazenness I may mention a recent instance. He wrote an article and had it printed in an obscure, cowardly, dirty little sheet in South Carolina, in which he eulogized certain leading Republicans and predicted Roosevelt four years hence, and he then inveigled the Member from the fifth Kansas district to have the article printed in the CONGRESSIONAL RECORD for July 1, 1916. It is hardly necessary to say that the Member in question did not realize then the character of the man he was dealing with and that he will not again be used as a cat's-paw to pull the chestnuts from the political fires for this unscrupulous schemer, this sneak and infamous liar, James H. Patten, who is held in such thorough contempt by most of the Members of this House, and who is a bosom friend of another notorious crook, James M. Baker, who has recently been reelected as Secretary of the Senate of the United States—a man who has been repeatedly denounced as a liar, a forger, and a thief in the public newspapers, and who has never dared to institute a libel suit to defend himself.

United States Marine Hospital, Chicago, Ill.

EXTENSION OF REMARKS
OF
HON. GEORGE EDMUND FOSS,
OF ILLINOIS,
IN THE HOUSE OF REPRESENTATIVES,
Saturday, March 3, 1917.

Mr. FOSS. Mr. Speaker, the United States Government owns a tract of land on which the Marine Hospital stands in Chicago. This land calls for Lake Michigan as its eastern boundary line. The title to this land carries with it riparian rights on Lake Michigan. These rights are: (1) The right of accretion, which is the right to claim any additions to the land that are formed by the slow and imperceptible action of the waters in depositing sand upon the shore line. (2) The right of access to the water. But the riparian owner must sustain the burden of losses which result from the washing away or erosion by the action of the waters upon his shore. If his land is washed away by erosion, he loses such land and can not reclaim it from the bed of the lake. His title to the land stops at the point where the waters are at rest, free from disturbing causes.

Chicago is located along the west shore of Lake Michigan. The prevailing wind which sets in motion the action of the waters in the spring and fall—the two seasons in which the greatest damage from wave action is caused—is the northeast wind. This wind, blowing transversely across the surface of the lake, starts up a movement of the waves which strike in an oblique manner against the shore and cause a scouring, with the result that instead of the shore owner obtaining accretions to his land he is constantly suffering erosions, unless his land is protected by a breakwater.

The shore line of the Marine Hospital has a breakwater across its frontage. This breakwater is in a dilapidated condition, due to the constant hammering of the waters. A request had been made upon Congress for an appropriation of $40,000 to build another breakwater to protect the Marine Hospital land from being washed away. This $40,000 will be saved to the Government if it transfers its riparian rights to the commissioners of Lincoln Park. The commissioners have agreed to protect the Marine Hospital land and make any necessary repairs on the breakwater up to the time that the park is built across this frontage.

The commissioners also agree to give the Marine Hospital direct access to the waters of Lake Michigan, with a basin within the hospital land, which will be available in all kinds of weather for rowing, and so forth, and much more useable as a water front than the present condition which fronts the open lake.

The commissioners of Lincoln Park have a plan for the enlargement of Lincoln Park by reclaiming submerged lands from the lake—that is, filling in the lake adjacent to the shore. The power to do this was given by the General Assembly of Illinois by act of June 15, 1895. Under the power of this act there have been added to Lincoln Park 220 acres of land, which now form a part of the park. Work is now in progress to add 80 acres more, and when this is completed Lincoln Park will be extended

to a street 500 feet south of the Marine Hospital grounds. The next enlargement of the park will take in the water front of the Marine Hospital grounds, but the work of extending the park across the water front of the Marine Hospital grounds can not be done until the United States Government surrenders to the commissioners of Lincoln Park the riparian rights of this tract of land.

The bill before Congress authorizes the Secretary of the Treasury, "in his discretion, to transfer and convey to the commissioners of Lincoln Park the riparian rights of the United States as the owner of land fronting on Lake Michigan and occupied as the site of the Marine Hospital." The bill empowers the Secretary of the Treasury "to undertake or conform to any proceedings provided for under the statutes of Illinois enacted for the purpose of enabling park commissioners to enlarge parks by reclaiming submerged lands under the waters of Lake Michigan for the establishment and defining of the boundary line between the lands of shore owners and the park lands of such park commissioners."

The plan for the enlargement of the park provides for a driveway along the west border of the park—that is, the border adjacent to the shore. The west line of this driveway will lie 100 feet east of the present shore line of the Marine Hospital land. There will be a strip of land 100 feet wide and 520 feet long between the present shore line of the hospital lands and the west boundary of the park lands.

If the Secretary of the Treasury conveys to the park commissioners the riparian rights of the Marine Hospital site and conforms to the statutes of Illinois now in force the title to this strip of land between the present shore and the proposed boulevard will become vested in the United States Government. The only way that this title can vest is by conforming to the Illinois statute, and in conforming to the statutes a proceeding will have to be commenced in the circuit court of Cook County, on the chancery side thereof. The circuit court, under that statute, has the power by its final decree to establish the dividing or boundary line between the lands of the petitioner—which in this case would be the United States Government—and the lands of the board of park commissioners adjacent thereto; and the line so established by the decree shall be the permanent line of said shore lands, which shall not be affected or changed thereafter, either by accretions or erosions, and the owner of said shore lands shall have the right to improve, protect, sell, and convey the shore lands up to the boundary line so established free from any adverse claim in any way arising out of any question as to where the shore line was at any time in the past or as to the title to existing accretions, if any, to said shore lands. This proceeding in court is the only method by which the United States Government, as a landowner on the shore of Lake Michigan, can become vested with an indefeasible title to the strip of land between its present shore and the west boundary of the park.

If their is incorporated in this bill before Congress a clause or condition "that the transferred rights and title to the land which may be added to the present water front of said Marine Hospital shall revert to the United States should said rights and land cease to be used for park and driveway purposes," the Secretary of the Treasury would be compelled to ask that such a reversionary clause be incorporated in the decree, and if such a clause were incorporated in the decree it would be inconsistent with the act under which the court is exercising its power to decree that—

> the boundary line fixed by the decree shall be the permanent boundary line of the shore lands, which shall not be affected or changed thereafter.

The whole proceeding for acquiring riparian rights and fixing the boundary line is predicated upon this act of the legislature. The court has no power other than by this statute to establish such a boundary line and declare that said boundary line shall be the permanent boundary line dividing the shore lands and the park lands. Consequently, anything incorporated in the decree which is inconsistent with the powers embraced in the act would be beyond the court's jurisdiction and would vitiate the decree. At any rate, it would not be an adjudication which conforms to the act of the general assembly defining the limits to which the court can go in fixing the boundary line and decreeing that the shore owner shall own all land out to such boundary line. The whole proceeding is based upon a statute; that statute must be followed; it can not be expanded by one of the parties litigant, and the United States, going into the circuit court of Cook County to have its boundary line fixed, must subscribe to the existing law the same as all other shore owners whose boundary line is fixed by this law.

The protection that the United States has that the purpose of land will not be changed is the adjudication of the circuit court that the riparian rights are surrendered and the boundary line is fixed under and pursuant to the act which expressly provides that—

> the submerged lands * * * and the shore lands, together with the riparian rights thus acquired in accordance with the preceding sections, the said commissioners shall hold for the following uses:
> "1. For the purpose of constructing and maintaining the boulevard or driveway as in said plan located.
> "2. For the purpose of filling, reclaiming, improving, maintaining, and holding such portions as are so designated upon said plan as a public park."

The legislature which had dominion over the submerged lands made a voluntary conveyance of this submerged land to the park commissioners for park purposes. The legislature also declared that the Circuit Court of Cook County shall be the forum in which there shall be adjudicated a permanent boundary line. This delegation by the legislature or power to the circuit court to make such adjudication seems to me to put it beyond the power of the legislature thereafter to overthrow or disregard a proper adjudication by the court under the terms of the act. This is based upon the fact that the government of Illinois consists of three coordinate branches—the executive, legislative, and judicial—and the legislature, having clothed the judicial power with authority to make a final adjudication, has terminated its function when the judicial power has spoken; the judicial power being of equal dignity and having entered its decree conformable to that act of the legislature, makes that the final conclusive settlement and puts it beyond the power of the legislature to repeal.

The Secretary of the Treasury is given power, "in his discretion, to convey to the commissioners of Lincoln Park the riparian rights of the United States as the owner of land fronting on the shore of Lake Michigan." Should the Secretary of the Treasury attempt to settle this question by making a deed of the riparian rights of the Marine Hospital land to the park commissioners, and incorporate in "that deed that the riparian rights and the title to the land which may be added to the present water front of the Marine Hospital site shall revert to the United States should said rights and land cease to be used for park and driveway purposes," it is a question in my mind whether the commissioners of Lincoln Park would have power to extend the park across the water front of the Marine Hospital grounds, because the power of the park commissioners to extend the park is solely acquired by the act of the legislature which requires that "the submerged land and the shore land, together with the riparian rights thus acquired, shall be held for the purposes mentioned in the act." It would be ultra vires for the park commissioners to make land which would be added to the present water front of the Marine Hospital grounds unless the title to the land made would be free from any burdens or claims by the shore owner.

Before the park commissioners can build the park they must have a line established which shall be the permanent boundary line of the shore lands, which shall not be affected or changed thereafter. Such a deed from the Secretary of the Treasury containing a reversionary clause would make a condition attaching to the title of the land held by the park commissioners, and the park commissioners can not hold park lands acquired under the terms of the act referred to burdened with any conditions as to title.

Assuming even that the matter could be settled by deed of the Secretary of the Treasury with conditions, the park commissioners could not make a deed to the United States Government of a strip of land 100 feet wide between the present shore line and the west boundary of the park, because the park commissioners are not given the power to make a conveyance of any land to a shore owner. The act provides for the settlement of the permanent boundary line, and the court's decree vests in the shore owner title to all lands lying out to that boundary line, so that the United States would acquire title to this 100 feet in and by virtue of the decree and not by any deed from the park commissioners.

I have not taken into account the question of the right of the State of Illinois to exercise the power of eminent domain and under that power change the purpose of the park lands. It does not seem to me that it is necessary to go into that phase of the question. The Legislature of the State of Illinois, like the United States Government, has the power of eminent domain, and it would not be possible to provide against the exercise of that power by any stipulation or restrictions in any decree of court, no more than it would be possible for the State of Illinois to attempt to limit the United States Government in its exercise of the power of eminent domain should the

United States deem it necessary to call upon such power for the purpose of acquiring land.

The only settlement that can be made is a settlement which will fix a permanent boundary line between the shore lands of the United States Government and the park lands of the commissioners of Lincoln Park, which shall not thereafter be changed, and to tack on to this bill a reversionary clause will defeat the object sought to be obtained by the passage of this bill.

Lincoln Park is a strip of land along the shore of Lake Michigan, perpetually endowed by the people of the State of Illinois for a public park. For more than 50 years it has been a part of Chicago's water front dedicated to the largest public use conceivable. It is the people's estate joined in the bonds of everlasting wedlock to the waters of Lake Michigan.

I desire to submit herewith an argument on the subject of title in the submerged lands made by the able attorney of the Lincoln Park board, Mr. Francis O'Shaughnessy.

The argument is as follows:

ARGUMENT OF MR. FRANCIS O'SHAUGHNESSY.

By the act of Virginia of December 20, 1783, that Commonwealth authorized its Delegates in Congress to convey to the United States all the rights of the Commonwealth to the territory northwest of the Ohio River.

On March 1, 1784, the Representatives of Virginia in Congress made a conveyance to the United States of all right, title, and claim, as well of soil as of jurisdiction, to the territory lying northwest of the Ohio River.

By the ordinance of 1787 Congress provided for a temporary government of the district of the Northwest Territory.

By act of Congress of May 7, 1800, the Northwest Territory was divided and a separate territory created called the Indiana Territory.

By act of Congress of February 3, 1809, the Indiana Territory was divided and the Territory of Illinois established.

By Act of Congress of April 18, 1818, the people of the Illinois Territory were empowered to form a State constitution. In that act it was provided that said State of Illinois shall consist of all of the territory included within the following boundaries: Beginning at the mouth of the Wabash River; thence up the same, and with the line of Indiana, to the northwest corner of said State; thence east with the line of the same State to the middle of Lake Michigan; thence north along the middle of said lake to north latitude 42° 30'; thence west to the middle of the Mississippi River; and thence down along the middle of that river to its confluence with the Ohio River; and thence up the latter river along its northwestern shore to the beginning.

The Constitution provided for was adopted in 1818, at Kankakee, Ill.

SOVEREIGNTY AND JURISDICTION OVER SOILS UNDER TIDEWATER.

In Shively *v.* Bowlby, 152 U. S., 1, Mr. Justice Gray says:

"In England, from the time of Lord Hale, it has been treated as settled that the title in the soil of the sea, or of arms of the sea, below ordinary high-water mark, is in the King, except so far as an individual or a corporation has acquired rights in it by express grant, or by prescription or usage * * * and that this title, jus privatum, whether in the King or in his subjects, is held subject to the public rights, jus publicum, of navigation and fishing. * * *

"It is equally well settled that a grant from the sovereign of land bounded by the sea, or by any navigable tide water, does not pass any title below high-water mark, unless either the language of the grant, or long usage under it, clearly indicates that such was the intention. * * *

"By the law of England, also, every building or wharf erected, without license, below high-water mark, where the soil is in the King, is a purpresture, and may, at the suit of the King, either be demolished or be seized and rented for his benefit, if it is not a nuisance to navigation. * * *

"The law of England upon this subject, at the time of the emigration of our ancestors, is the law of this country, except so far as it has been modified by the charters, constitutions, statutes, or usages of the several colonies and States or by the Constitutions and laws of the United States. * * *

"It is the settled rule of law in this court that absolute property in, and dominion and sovereignty over, the soils under tidewaters in the original States were reserved to the several States, and that new States since admitted have the same rights, sovereignty, and jurisdiction as the original States possess within their respective borders, in that behalf. Upon the acquisition of the territory from Mexico the United States acquired the title to tidelands, equally with the title to upland; but with respect to the former they held it only in trust for the future States that might be erected out of such territory."

In the opinion of Shively *v.* Bowlby, supra, there is set out a summary of the laws of the original States governing the question of riparian ownership. Reference to that opinion will show that each of the original colonies had a local law governing the question of riparian rights, and Mr. Justice Gray says:

"The summary of the laws of the original States shows that there is no universal and uniform law upon the subject, but that each State has dealt with the lands under the tidewaters within its borders according to its own views of justice and policy, reserving its own control over such lands or granting rights therein to individuals or corporations, whether owners of the adjoining upland or not, as it considered for the best interests of the public. Great caution, therefore, is necessary in applying precedents in one State to cases arising in another.

"The new States admitted into the Union since the adoption of the Constitution have the same rights as the original States in the tidewaters, and in the lands below the high-water mark, within their respective jurisdictions.

"The act of 1783, and the deed of 1784, by which the State of Virginia, before the adoption of the Constitution, ceded 'unto the United States in Congress assembled, for the benefit of the said States, all right, title, and claim, as well of soil as jurisdiction,' to the Northwest Territory, and the similar cession by the State of Georgia to the United States in 1802 of territory including a great part of Alabama and of Mississippi, each provided that the territory so ceded should be formed into States, to be admitted, on attaining a certain population, into the Union (in the words of the Virginia cession) 'having the same rights of sovereignty, freedom, and independence as the other States,' or (in the words of the ordinance of Congress of July 13, 1787, for the government of the Northwest Territory, adopted in the Georgia cession) 'on an equal footing with the original States in all respects whatever'; and that 'all the lands within' the territory so ceded to the United States, and not reserved or appropriated for other purposes, should be considered as a common fund for the use and benefit of the United States. Charters & Constitutions, pp. 427, 428, 432, 433; Clayton's Laws of Georgia, pp. 48-51; acts Congress, Apr. 7, 1798, ch. 28 (1 Stat., 549), May 10, 1800, ch. 50, and Bar. 3, 1803, ch. 27 (Stat., 69, 229); Pollard's Lessee *v.* Hagan, 3 How., 212, 221, 222.

"In Pollard's Lessee *v.* Hagan (1844) this court, upon full consideration (overruling anything to the contrary in Pollard *v.* Kibbe, 14 Pet., 353; Mobile *v.* Eslava, 16 Pet., 234; Mobile *v.* Hallett, 16 Pet., 261; Mobile *v.* Emanuel, 1 How., 95; and Pollard *v.* Files, 2 How., 591), adjudged that upon the admission of the State of Alabama into the Union the title in the lands below high-water mark of navigable waters passed to the State and could not afterwards be granted away by the Congress of the United States. Mr. Justice McKinley, delivering the opinion of the court (Mr. Justice Catron alone dissenting), said: 'We think a proper examination of this subject will show that the United States never held any municipal sovereignty, jurisdiction, or right of soil in and to the territory of which Alabama or any of the new States were formed, except for temporary purposes and to execute the trusts created by the acts of the Virginia and Georgia Legislatures and the deeds of cession executed by them to the United States and the trust created by the treaty with the French Republic of the 30th of April, 1803, ceding Louisiana.' 'When the United States accepted the cession of the territory they took upon themselves the trust to hold the municipal eminent domain for the new States and to invest them with it to the same extent in all respects that it was held by the States ceding the territories.'

"'When Alabama was admitted into the Union on an equal footing with the original States she succeeded to all the rights of sovereignty, jurisdiction, and eminent domain which Georgia possessed at the date of the cession, except so far as this right was diminished by the public lands remaining in the possession and under the control of the United States for the temporary purposes provided for in the deed of cession and the legislative acts connected with it. Nothing remained to the United States, according to the terms of the agreement, but the public lands.' (3 How., 221-223.) 'Alabama is therefore entitled to the sovereignty and jurisdiction over all the territory within her limits, subject to the common law, to the same extent that Georgia possessed it before she ceded it to the United States. To maintain any other doctrine is to deny that Alabama has been admitted into the Union on an equal footing with the original States, the constitution, laws, and compact to the contrary notwithstanding.' 'Then to Alabama belong the navigable waters and soils under them, in controversy in this case, subject to the rights surrendered by the constitution to the United States.' (3 How., 228, 229.)"

A case of particular value in this connection is Hardin *v.* Jordan (140 U. S., p. 371), which went to the United States Supreme Court from Illinois. This case concerned the question of riparian rights growing out of lands granted under United States patent, which were bounded by a lake in the State of Illinois. All the justices agreed that the question must be determined by the laws of Illinois. Mr. Justice Bradley, speaking for the majority of the court, said:

"With regard to grants of the Government for lands bordering on tidewater, it has been distinctly settled that they only extend to high-water mark, and that the title to the shore and lands under water in front of lands so granted inures to the State within which they are situated if a State has been organized and established there. Such title to the shore and lands under water is regarded as incidental to the sovereignty of the State, a portion of the royalties belonging thereto and held in trust for the public purposes of navigation and fishery, and can not be retained or granted out to individuals by the United States. Such title being in the State, the lands are subject to State regulation and control, under the condition, however, of not interfering with the regulations which may be made by Congress with regard to public navigation and commerce. The State may even dispose of the usufruct of such lands, as is frequently done, by leasing oyster beds in them and granting fisheries in particular localities; also by the reclamation of submerged flats and the erection of wharves and piers and other adventitious aids of commerce. Sometimes large areas so reclaimed are occupied by cities and are put to other public or private uses, State control and ownership therein being supreme, subject only to the paramount authority of Congress in making regulations of commerce and in subjecting the lands to the necessities and uses of commerce. This right of the States to regulate and control the shores of tidewaters and the land under them is the same as that which is exercised by the Crown in England. In this country the same rule has been extended to our great navigable lakes, which are treated as inland seas; and also, in some of the States, to navigable rivers, as the Mississippi, the Missouri, the Ohio, and in Pennsylvania to all the permanent rivers of the State; but it depends on the law of each State as to what waters and to what extent this prerogative of the State over the lands under water shall be exercised." (140 U. S., 380, 382; 11 Sup. Ct., 808, 838.) And Mr. Justice Brewer, in beginning the dissenting opinion, said: "Beyond all dispute the settled law of this court, established by repeated decisions, is that the question how far the title of a riparian owner extends is one of local law. For a determination of that question the statutes of the State and the decisions of its highest court furnish the best and final authority." (140 U. S., 402; 11 Sup. Ct., 808, 838.)"

"The common-law rules relating to admiralty jurisdiction on the ocean where the tides ebb and flow were made applicable by Congress to the Great Lakes of the United States—these lakes are, in truth, 'inland seas' of fresh water without tides." * * *

"The act was sustained by the Supreme Court of the United States in the case of Propeller Genessee Chief et al. *v.* Fitz Hugh et al. (12 How., 443), and thenceforth the Great Lakes and shipping thereon were treated in like manner as shipping by the courts of England." (Barney *v.* Keokuk, 94 U. S., 224, 229; Hardin *v.* Jordan, 140 U. S., 371.)

GRANT OF SUBMERGED LANDS BY THE STATE TO PARK COMMISSIONERS FOR PARK PURPOSES.

The leading case which defines the riparian rights of a shore owner on Lake Michigan is the case of People of the State of Illinois *v.* Revell (177 Ill., 468). Revell, as a shore owner, constructed from his

premises into the lake two piers extending into the lake about some 200 feet, and the main question involved was his right to build and maintain such structures.

At page 478 of the opinion the court say:

"The law is well settled in the different States that the title to and dominion over lands covered by tide waters within the boundaries of the several States belong to each State wherein the lands are located. The State holds the fee in trust for the public. The doctrine established in regard to lands covered by tide waters has also been held applicable to lands bounded by fresh water in our large lakes. (People *v.* Kirk, 162 Ill., 138; Shively *v.* Bowlby, 152 U. S., 9.) In the case last cited it is said: 'By the common law both the title and the dominion of the sea, and all rivers and arms of the sea where the tide ebbs and flows, and of all the lands below high-water mark within the jurisdiction of the Crown of England are in the King. Such waters, and the land which they cover, either at all times or at least when the tide is in, are incapable of ordinary and private occupation, cultivation, and improvement, and their natural and primary uses are public in their nature, for highways of navigation and commerce, domestic and foreign, and for the purpose of fishing by all the King's subjects. Therefore the title jus privatum in such land, as of waste and unoccupied lands, belongs to the King as the sovereign, and the dominion thereof jus publicum is vested in him, as the representative of the nation, for the public benefit.' In Illinois Central Railroad Co. *v.* Illinois (146 U. S., 452), in speaking of this question, the court said: 'That the State holds the title to the lands under navigable waters of Lake Michigan, within its limits, in the same manner that the State holds title to soils under tide water by the common law, we have already shown, and that title necessarily carries with it control over the waters above them whenever the lands are subject to use. * * * It is a title held in trust for the people of the State, that they may enjoy the navigation of the waters, carry on commerce over them, and have liberty of fishing therein freed from the obstruction or interference of private parties.' Indeed, the doctrine that the State holds the title to the lands covered by the waters of Lake Michigan in trust for the people is not controverted by the argument. It will not therefore be necessary to cite further authorities upon that question.

"The appellant here owned the premises bordering on the lake, but his title to the premises extended only to the water's edge, and the fee in and to the lands covered by the waters of the lake was vested in the State and held by the State in trust for the people. The fee being in the State, the important question presented is whether appellant, without a grant or other authority from the State, had the right to go upon the submerged lands and erect the structures complained of in the information. This State has adopted the common law as it existed prior to March 24, 1606—the fourth year of James I—and in the absence of any statute of the State changing the common law in regard to rights of riparian or littoral owners the common law as it then existed must control.

"Upon an examination of the authorities we think it is clear that the act complained of in the information was a trespass upon the lands of the State; that the erection of the piers in the lake in front of appellant's premises was a purpresture. But it is said in the argument that the erection of the structures complained of was not injurious to the State, and hence there was no basis for the interference of a court of equity. We do not concur in that view. Although the act complained of was not injurious and was not a public nuisance, still it was an unlawful act of such a character as would properly authorize a court of equity to interfere upon the information of the Attorney General, as is well established by the authorities." * * *

On page 483 the court says, further:

"It is true the appellant testified that the piers were constructed to prevent erosions and protect his shore bordering on the lake; but it is apparent from the evidence that the effect has been to add new land to his premises, and that the accretions resulting from the construction of the piers have extended the boundary of his premises into the lake. In other words, the erection of the piers has increased appellant's land and diminished the land belonging to the State. This being so, it can not be said that the construction of the piers was not injurious to the State. The appellant had no right to build piers or 'wharf out' into the lake for the purpose of making land or increasing the boundary of his premises, nor had he the right to do any act which would produce that result. As has heretofore been said, the lands covered by the waters of the lake belong to the State, and appellant had no right, by any device whatever, to extend his boundary line beyond the water's edge, and when he did so an injury was inflicted on the rights of the State, which might be inquired into and abated in a court of equity on the application of the attorney general. It is, however, insisted that the court erred in decreeing that appellant had no riparian rights as against the State. We de not understand that the decree goes to the extent claimed in the argument. But however that may be, the main question presented by the record and discussed in the argument is, What are the riparian rights of appellant as a shore owner on Lake Michigan? There is one riparian right which existed at common law which is not disputed or called in question in the argument, and that is, where land bordering on the lake gradually and imperceptibly encroaches upon the water the accretion thus made belongs to the shore owner. This riparian right of appellant was not disturbed or interfered with by the decree. The shore owner also has another riparian right, which is undisputed—the right of access from his land to the lake; in other words, the right to pass to and from the waters of the lake within the width of his premises as they bordered on the lake. This right can not be diverted or taken from the shore owner without just compensation being made therefor, as provided by law. These are common-law rights, and, as we understand the law, they are the only common-law rights possessed by the shore owner. Other rights may have been conferred in different States by statute, usage, or custom, but the question involved here is whether such additional rights exist in this State. * * *

"Much reliance is, however, placed in the argument in Illinois Central Railroad Co. *v.* Illinois (146 U. S., 387). It is true that the majority of the court in that case held that a littoral owner of lands bordering on Lake Michigan had the right to wharf out from his premises into the lake in aid of navigation; but upon an examination of that case it will be found that the decision is predicated largely upon Yates *v.* Milwaukee (10 Wall., 497), Railroad Co. *v.* Schurmeier (7 id., 272), and Dutton *v.* Strong (1 Black, 23), or two of them; and in Shively *v.* Bowlby, supra, decided two years after the Illinois Central case, the doctrine laid down in the three cases above cited seems to have been substantially repudiated."

The constitutionality of the act of June 15, 1895, which constituted a grant by the State of Illinois to the commissioners of Lincoln Park for the purpose of enlarging the park, being the act under which the commissioners of Lincoln Park now desire to acquire the riparian rights of the United States Government in the Marine Hospital grounds, was attacked in the case of the The Commissioners of Lincoln Park *v.* Fahrney (250 Ill., 256), in which the court held that the act was valid, and reaffirmed the doctrine laid down in the Revell case.

The case of Cobb *v.* Commissioners of Lincoln Park (202 Ill., 427) was a case which considered the question of whether the owner of land bordering on and adjacent to the waters of Lake Michigan has a right of access from his own property to a point in the lake where the waters are navigable, and whether, in the exercise of this right, he may erect a wharf or pier from his shore line over the submerged lands in the shallow water to the point of navigability in the lake.

The court said at page 432:

"The State has granted the land covered by the waters of Lake Michigan that lies immediately in front of appellant's lands to appellees, the park commissioners, for certain specific purposes, and the title thereto is now in them for the purposes declared in the act (act of June 15, 1895; laws of 1895, p. 282). This the legislature was competent to do. The property in the dry land or upland being in one person, and the property in the submerged land immediately in front thereof being in another, it would seem to be only consonant with legal principles that the consent of the latter must be obtained before any erections can be put on the submerged soil. But the appellant claims that by the common law he had the right to erect a wharf or other structure in aid of navigation on the submerged land in front of his upland, and that the title of appellees is burdened with such easement or right in him.

"In Revell *v.* People, supra (p. 484), it is said: 'In the well-known case of Shively *v.* Bowlby, supra, the Supreme Court of the United States, after a thorough examination of the authorities, held that the common law of England is the law of this country upon the question of the rights of a shore owner, except where it has been modified by the constitutions, statutes, or usages of the different States or by the Constitution and laws of the United States. The court also held that the rights of these owners have been committed to the several States, and that each State has dealt with the lands under tide water within its boundaries according to its own notion of right and public policy. This State has adopted the common law as it existed prior to March 24, 1606—the fourth year of James I, and in the absence of any statute of the State changing the common law in regard to rights of riparian or littoral owners, the common law as it then existed must control' (p. 479). 'We are aware of no statute of this State changing the common law, nor has there been established any custom or usage which modifies the common law' (p. 484). * * *

"After a careful reading of the authorities we see no reason to recede from the position taken in the Revell case and are satisfied that by the common law, unmodified by local usage, custom, or statute, a riparian owner had no right to build any structures on the submerged lands in front of his own land unless he owned such submerged lands or had a license to do so. The title of the owner of such submerged lands is not burdened with an easement in favor of the owner of the adjoining upland to build wharves out to navigable water. Such being the common law, it is the law of this State until altered by the legislature.

"Appellant also claims that by virtue of the license from the Secretary of War he is entitled to build this wharf, because, as he says, a license from the executive officer of the Government to build this wharf means permission and authority from the United States Government to do so, and such permission and authority being granted, neither the State nor any of its agents has any control over the subject matter. He refers to the rivers and harbors act of Congress of September 19, 1890 (26 Stat. L., ch. 907, p. 426), as sanctioning his contention. Section 7 of this act was superseded by sections 9 and 10 of the rivers and harbors act of March 3, 1899 (30 Stat. L., ch. 425, pp. 1121, 1150). Section 10 of the latter act is as follows: 'That the erection of any obstruction not affirmatively authorized by Congress to the navigable capacity of any of the waters of the United States is hereby prohibited; and it shall not be lawful to build or commence the building of any wharf, pier, dolphin, boom, wier, breakwater, bulkhead, jetty, or other structures, in any port, roadstead, haven, harbor, canal, navigable river, or other water of the United States outside established harbor lines or where no harbor lines have been established, except on plans recommended by the Chief of Engineers and authorized by the Secretary of War; and it shall not be lawful to excavate or fill, or in any manner alter or modify the course, locatibn, condition, or capacity of any port, roadstead, haven, harbor, canal, lake, harbor of refuge, or inclosure within the limits of any breakwater, or of the channel of any navigable water of the United States, unless the work has been recommended by the Chief of Engineers and authorized by the Secretary of War prior to beginning the same.' These provisions of the law were designed to protect the navigable waters of the United States from encroachment and from obstructions to navigation, and commit the duty of their protection to an officer of the General Government, without whose permission no structures can be erected in them.

"It is conceded that the power of Congress over the navigable waters of the country is derived from the commerce clause in the Constitution of the United States, and that it is exclusive and paramount whenever Congress has definitely spoken on any subject under its jurisdiction. It has been held by the Federal courts that when Congress has authorized the erection of a bridge it is not necessary to obtain the consent of the State authorities for its erection, and that no compensation need be made to the State for the use of its property in the lands under water (Stockton *v.* Baltimore & New York Railroad Co., 32 Fed. Rep., 9), and that an individual has no claim for compensation when the General Government erects piers on his submerged lands in aid of navigation and thus cuts off his access to the water (Scranton *v.* Wheeler, 179 U. S., 141). But however that may be, we are of the opinion that the act prohibiting the erection of wharves without the consent of the Secretary of War is a mere regulation for the benefit of commerce and navigation, and that the license or permission of the Secretary of War is only a finding and declaration of such officer that such proposed structure would not interfere with or be detrimental to navigation, and not that it is equivalent to a positive declaration by the authority of Congress that the licensee may build the wharf or other structure without first obtaining the consent of the owner of the submerged land on which it is his purpose to build. Appellant not having, by the law of this State, the right to construct a wharf over his neighbor's submerged lands without his neighbor's consent, could not acquire that right, without his neighbor's consent, by obtaining a license from the Secretary of War."

Another important case concerning the rights of a riparian owner and the rights of the commissioners of Lincoln Park under act of June 15, 1895, is Commissioners of Lincoln Park *v.* Fahrney (250 Ill., 256). In this case Fahrney, as a shore owner, was constructing piers or bulk-

heads over the submerged lands of Lake Michigan without the consent of the commissioners of Lincoln Park, who claimed to hold title to such submerged lands by virtue of an act of the legislature approved June 15, 1895. The commissioners filed a bill to enjoin Fahrney from constructing his piers in the water in front of his premises.

The court said (p. 262):

"The principal issues raised by the pleadings are: First, whether the title to the submerged lands opposite appellee's lots is in appellants. That it is is denied by appellee on the ground that the act of 1895 and subsequent acts are unconstitutional, and also because it is claimed that appellee's lots extended 715 feet farther into the lake than the present shore line, and parts of them were wrenched and torn away by violent avulsions of nature between 1872 and 1877 or 1880. Second, whether by reason of appellee's lots abutting upon Lake Michigan he is thereby vested, as riparian owner, with the right to build piers over the submerged lands for the purpose of access to the navigable waters of the lake."

The court held that the acts of the legislature granting title to the commissioners are valid; that there was no proof that there had been an avulsion; that the cases of Revell *v.* People, supra, and Cobb *v.* Commissioners of Lincoln Park, supra, were decisive on the question that Fahrney had no rights as against the commissioners of Lincoln Park.

CONSTRUCTION OF PUBLIC BUILDINGS AND WORKS.

TITLE TO LAND TO BE PURCHASED BY THE UNITED STATES.

SEC. 355. No public money shall be expended upon any site or land purchased by the United States for the purposes of erecting thereon any armory, arsenal, fort, fortification, navy yard, customhouse, lighthouse, or other public building of any kind whatever, until the written opinion of the Attorney General shall be had in favor of the validity of the title, nor until the consent of the legislature of the State in which the land or site may be to such purchase has been given. The district attorneys of the United States, upon the application of the Attorney General, shall furnish any assistance or information in their power in relation to the titles of the public property lying within their respective districts. And the secretaries of the departments, upon the application of the Attorney General, shall procure any additional evidence of title which he may deem necessary and which may not be in the possession of the officers of the Government, and the expense of procuring it shall be paid out of the appropriations made for the contingencies of the departments respectively. (R. S.) (Res. of Sept. 11, 1841, No. 6, 5 Stat. L., 468.)

PURCHASE OR CONDEMNATION OF SITES AUTHORIZED.

SECTION 1. And the Secretary of the Treasury is authorized to acquire, by private purchase or by condemnation, the necessary lands for public buildings and lighthouses to be constructed, and for which money is appropriated, including all public-building sites authorized to be acquired under any of the acts of the first session of the Forty-seventh Congress; and there may be expended by the Secretary of the Treasury, from the several amounts appropriated for the construction of public buildings, the expenses incident to the procuring of sites for said buildings, respectively. * * * (22 Stat. L., 605.) (This is from the sundry civil appropriation act of Mar. 3, 1883, ch. 143.)

—

An act to authorize condemnation of land for sites of public buildings, and for other purposes.

[Act of Aug. 1, 1888, ch. 728, 25 Stat. L., 357.]

SECTION 1. Condemnation for building sites—jurisdiction of proceedings: That in every case in which the Secretary of the Treasury or any other officer of the Government has been, or hereafter shall be, authorized to procure real estate for the erection of a public building or for other public uses he shall be, and hereby is, authorized to acquire the same for the United States by condemnation, under judicial process, whenever in his opinion it is necessary or advantageous to the Government to do so. And the United States circuit or district courts of the district wherein such real estate is located shall have jurisdiction of proceedings for such condemnation, and it shall be the duty of the Attorney General of the United States, upon every application of the Secretary of the Treasury under this act, or such other officer, to cause proceedings to be commenced for condemnation within 30 days from the receipt of the application at the Department of Justice. (25 Stat. L., 357.)

PRACTICE AND PROCEDURE.

SEC. 2. The practice, pleadings, forms, and modes of procedings in causes arising under the provisions of this act shall conform, as near as may be, to the practice, pleadings, forms, and proceedings existing at the time in like causes in the courts of record of the State within which such circuit or district courts are held, any rule of the court to the contrary notwithstanding. (25 Stat. L., 357.)

Our Strained International Relations.

EXTENSION OF REMARKS

OF

HON. WARREN WORTH BAILEY,

OF PENNSYLVANIA,

IN THE HOUSE OF REPRESENTATIVES,

Saturday, March 3, 1917.

Mr. BAILEY. Mr. Speaker, under the leave granted me by the House it is my desire to present as an extension of my remarks a few of the many communications which have reached me bearing on our present strained international relations, all indicating profound anxiety that our beloved country shall remain at peace under the patient guidance of President Wilson. But I wish to preface the communications mentioned with an Associated Press dispatch from Halifax, which was printed in various American newspapers recently. According to this story—one that has not been denied—the British Government is refusing clearance papers to vessels sailing from British ports for England with English women and children on board. The question has therefore risen in my mind whether with equal prudence we might not withhold clearance papers from American ships proposing to carry American women and children into the war zones of Europe. Especial attention is called to the fact that, while English women and children were removed from the liner at Halifax before she was permitted to proceed to England, three American women were allowed to pursue their perilous journey. There may be some explanation of why Great Britain is so much more tender regarding the safety of English women and children than of our own. It is hardly to be explained on the simple grounds of humanity, for these would suggest the same care for our women and children as for the women and children who live under the British flag.

The matters referred to above follow:

[From the Washington Post, Feb. 24.]

WOMEN TAKEN FROM SHIP—ONLY AMERICANS ALLOWED TO SAIL WHEN LINER STOPS AT HALIFAX.

HALIFAX, NOVA SCOTIA, *February 23.*

A number of women and children who arrived here on a steamship from the United States for Europe were taken off to-day by the Government authorities under a regulation which provides that women and children may not sail from a British port for England at present.

Three American women aboard the liner, which arrived in port last night, were permitted to continue the voyage. Clearance papers were refused the ship until 25 Canadian women and children had been removed. They were taken ashore in tugs.

(The name of the steamer was deleted by the censor at Halifax.)

—

MADISON, ILL., *February 19, 1917.*

Hon. WARREN WORTH BAILEY,
Washington, D. C.

DEAR SIR: "Lay on, MacDuff!" You sure had the right end of the argument last Saturday. Accept my congratulations.

Am an ex-Pennsylvanian, and it does my heart good to know we have some man left who loves a fair deal.

Go to that Yankee outfit, and be assured there are plenty with you able to disprove the insinuation of lacking sand. Also, stick with the idea that the President has trouble enough.

Very truly,

H. L. BROWN.

—

LE SUEUR, MINN., *February 19, 1917.*

Representative W. W. BAILEY,
Washington, D. C.

DEAR SIR: All honor to you for your spirited efforts to keep this country out of the ranks of the allies and to keep her neutral!

Your true charge against GARDNER is only too commonly true as against many Americans.

Our daily papers around here are proallies and conceal the figures on the vote to expunge from the RECORD the charge against GARDNER, stating only that it was expunged "by a large majority." Please send me the real figures, the number of votes for and against.

I note that your friends were the loudest on the viva voce vote, and that the standing vote was so close as to not decide it.

More power to you, and may your shadow never grow less. You'll win, too, and the proallies will not drive us into an unjust war at England's bidding.

Yours, truly,

ORA J. PARKER.

—

TROY, N. Y., *February 18, 1917.*

Hon. WARREN WORTH BAILEY,
Washington, D. C.

DEAR SIR: I read with pride your defense of Mr. Bryan and your denunciation of Congressman GARDNER'S maudlin pro-British utterances. Some of my ancestors came from Pennsylvania, but if I have any German blood in my veins I don't know it. I can not trace my ancestry out of this country on either my maternal or my paternal side. My Christian name was given in 1862—I was a war baby—from purely patriotic and American motives. So I feel that I am an American. But the press propaganda for England and the English hirelings in and out of office is a real menace to free speech and American free tradition and thought. We have been so blinded by these subtle and long-exerted influences that it is indeed refreshing to find a few public officials who refuse to be muzzled and who still are sufficiently American to stand upon their rights and to have the courage of their convictions publicly to protest against an arbitrary abridgment of these God-given rights. I thank you in the name of my fellow citizens for your courage. You are rendering a signal and conspicuous service to your country.

Sincerely,

SIGEL ROUSH.

—

SILVER SPRING, MD., *February 19, 1917.*

Hon. WILLIAM W. BAILEY,
House of Representatives, Washington, D. C.

DEAR SIR: Referring to the inclosed clipping, which reports your very appropriate reply on the floor of the House to Representative GARDNER, we wish to say that it has our most hearty approval.

Just why the act of calling any group of persons cowardly should be considered proof of the accuser's bravery, it would be hard to say. Now is good time to give the greatest publicity to the truth that the greatest coward is the one who is afraid to uphold the right, for fear of being called a coward. This particular charge reminds one forcibly of the small boy's expedient of "daring" another boy to do what the former is afraid to do himself.

It is a noticeable fact that the eagerness for war of those who are clamoring for "action" against Germany is in inverse proportion to the probability that they will get within range of the guns. We have

had overmuch from Mr. Roosevelt lately as to the anxiety of himself and his sons to take part in a war, but there seems to have been very little definite news from the sons on this point. This brings to mind the campaign of 1908, when we heard more from Mr. Roosevelt about Mr. Taft's intentions than we did from Mr. Taft himself. Let those who make capital of their alleged desire to go to war prove their sincerity by enlisting in the forces of the side they favor in the present conflict. There would be no great difficulty in accomplishing their purpose. There has even been one instance of a German society's offering to pay the traveling expenses to Europe of a certain conspicuous militant(?) anti-German, so as to enable him to enlist with the entente allies. He did not take advantage of the offer, however. Mr. Roosevelt contends that in many cases the honor of a nation that is wronged is so affected that it can not honorably submit its cause to the judgment of a court composed of all the civilized nations of the world. This is no more reasonable than to maintain that there are some wrongs suffered by an individual which he can not honorably submit to a court of law. The application of this principle would soon do away with all law.

In Washington's Farewell Address there is found this passage: "Excessive partiality for one foreign nation and excessive dislike for another cause those whom they actuate to see danger only on one side, and serve to veil and even second the arts of influence on the other. Real patriots who may resist the intrigues of the favorite are liable to become suspected and odious, while its tools and dupes usurp the applause and confidence of the people to surrender their interests." We believe that in the present crisis William J. Bryan has shown himself to be the kind of real patriot to which Washington referred, and that the few others, including yourself, who have taken the same stand, belong in his class.

Those persons who foresee great profits for themselves in a war with Germany, and who are trying to bring it about through the means of publicity at their command, charge lack of patriotism on the part of all who refuse to break into noisy demonstrations, at their instigation, in favor of war. This is one of the many indications that the profiteers who are trying to instill not Americanism but "Americanistis" and militarism into the public mind are not only cowards and liars themselves, but are actually stupid as well. Their stupidity is shown by their apparent ignorance of the fact that it is precisely those who are noisiest in their demonstrations of patriotism, who are the most backward about enlisting when war actually breaks out.

The jingo sheets charge lack of patriotism against all who oppose their policies. Patriotism, however, is love of country, or a desire to promote the highest welfare of all its inhabitants. This is the exact opposite of a readiness to promote the schemes of a small group of munition mongers and exporters at a cost of hundreds of thousands of American lives. The offense of the jingo sheets is twofold. At a time when a carefully engineered crisis is upon us, they print under flaring headlines reports of alleged outrages against this country—print them without the slightest attempt at verification. When the reports are found to be baseless they either ignore the truth altogether or publish the correction of the false rumor in some very inconspicuous part of the paper, limiting it to a few lines only. The false report of the sinking of the *Philadelphia* is a good illustration. Not content with this offense, they print editorials based on the unverified rumors and putting the worst construction on them at the worst time. In our opinion, every metropolitan daily paper should be at once placed under strict Government censorship and kept under such censorship during the remainder of the European war. The publication of unverified news items of a provocative character is bad enough, but this is aggravated by the practice of putting them under headlines giving a wholly misleading impression of great seriousness to items which do not warrant it. This seems to be done quite deliberately for the purpose of exciting those who may glance at the headlines without reading the reports themselves. A good example is such a headline as this: "Ship sunk—four Americans on board," over an article which reports that the ship was sunk, but not until all on board had been placed in security. The intention is evidently to spread the belief that American lives were sacrificed.

The case of Switzerland is often held up as proof that preparedness will keep a nation out of war. It is our belief that Switzerland's geographical situation and her mountain barriers, not her military preparedness kept her out of the present war. Had the geographical positions of Switzerland and Belgium been reversed in August, 1914, there is every reason to believe that Switzerland would have been overrun by the Germans. The Encyclopaedia Britannica says, "Switzerland exists by the sufferance of her powerful neighbors, and her military institutions are suited to such conditions, but not to a power that relies on itself for its independence." If any further reason for the immunity of Switzerland were needed, it could be found in her lack of natural resources, which do not offer any temptation to the invader. Belgium, on the contrary, is exceptionally rich in natural resources. The Atlantic and Pacific Oceans form much more effective barriers than the Alps.

The writers of this letter are both well beyond the age at which they would be liable for military duty, except in the case of a long protracted war, and have no children liable to such duty. It is not, therefore, for any considerations of personal safety, but owing entirely to sincere conviction that we wish to put ourselves on record as emphaticaly in favor of the La Follette bill, providing for a Nation-wide referendum to decide whether this country shall enter the war or remain at peace. We consider it as iniquitous to the last degree that one class of persons should have the power to declare war, and sit in security, while another class, who have had no voice in the matter, fight the battles.

Very truly

B. H. LAMORE.
I. W. LAMORE.

—

MY DEAR MR. BAILEY: I want to express my admiration of the splendid stand you are taking in endeavoring to keep our great, wonderful country out of war.

We have stood so splendidly alone—not joining in other people's quarrels—and all nationalities having common shelter here. We indeed can show that there is one Nation in the world above—far above—the old idea that bloodshed is necessary in this advanced time and age.

With deep appreciation of the stand you are taking, because you know it is right.

CARRIE MENGE.

FEBRUARY 18, 1917.

JOHNSTOWN, PA., *February 20, 1917.*

DEAR SIR: Permit us citizens of the Sixteenth Ward of the city of Johnstown to drop you a few lines by which we kindly ask and pray your honor to do all in your power to prevent our loved country from being dragged into the war with Germany as long as there is not sufficient cause for it as we will suport you in all your undertakings, and we stand for everlasting peace.

PETER J. BUETTNER.
EDWARD J. BUETTNER.
C. A. BUETTNER.

—

LA VALLE, WIS., *February 20, 1917.*

Hon. WARREN WORTH BAILEY,
Washington, D. C.

DEAR SIR: Having read the speech of Mr. GARDNER attacking Mr. Bryan and other loyal Americans and also having read part of your reply to the same, and that Congress ordered what you said stricken from the RECORD. Please permit me to congratulate you for saying what you did, and also to say your speech, though stricken from the RECORD, like John Brown's soul, goes marching on.

I hope Congress may adjourn without taking any further action on the war situation.

Very respectfuly, yours,

E. A. GROVER,
La Valle, Wis.

—

ST. LOUIS, *February 18, 1917.*

Hon. WARREN WORTH BAILEY,
Washington, D. C.

DEAR SIR: The brief press report of your speech of yesterday and of the debate which followed leads me to congratulate you upon the fearless stand you took. The most secure path toward peace is by way of absolute and unqualified neutrality, and I can not conceive of any greater departure from the established ideals of our Nation than for us to become involved in this war, either as a belligerent friendly to the allies or as their ally, pledged not to sign a separate peace or to furnish an American Army and Navy to cooperate with theirs, and to eventually take orders from their commanders or strategists. In other words, it would then be—

"Not ours to reason why,
Just ours to do and die."

Yours, truly,

FREDERICK C. STIERLIN.

—

ALTAMONT, ALBANY COUNTY, N. Y.

The Hon. Mr. BAILEY,
Member of Congress of Pennsylvania.

DEAR SIR: You are worthy of the gratitude of all loyal Americans for your stand in honor of our country in these troublesome times against the pro-British element, to the disgrace to their citizenship, who "place loyalty to Great Britain before loyalty to their own country." They would enlist this Nation in war on the side of Great Britain and declare war with Germany for the same offense against our rights as committed by Great Britain. The true American knows no German or no Briton when they trample on our rights. When both commit the same offense, it is not just or consistent to show fear or favor. Thank you and all loyal colleagues that stand where our forefathers stood in '76.

Yours, respectfully,

ANDREW GAUL.

—

CRESSON, PA., *February 19, 1917.*

Congressman W. W. BAILEY,
Washington, D. C.

DEAR MR. BAILEY: It is with much satisfaction that I see you are using your efforts to keep America out of the European struggle. It may be our international right to pass through the war zone, and so it is our right to pass through any naval hostilities, but any sane person would not exercise such right during such hostilities. If it was necessary for our vessels to pass through the zone to rescue our citizens, that would be enough matter, but when it is to assist a belligerent and to further the profits of the munition makers such vessels should not expect the protection of our country. I am in favor of millions for protection of the Americas, but not one penny for Europe. Keep out of European troubles.

Yours, very truly,

A. H. BEARD.

—

SAN FRANCISCO, *February 17, 1917.*

Representative WARREN BAILEY.

DEAR SIR: As a traveling salesman, will say that nine out of ten people desire a referendum on this war question. Many think a nation fighting for its very life can be excused for illegal acts.

Wall Street operators and English-bought American newspapers do not reflect the opinion of Americans.

Sincerely,

WIGHTMAN NORTON, S. A. R.,
Berkeley, Cal.

NEW YORK, *February 18, 1917.*

The Hon. W. W. BAILEY,
Representative from Pennsylvania, Washington, D. C.

SIR: Permit me to express to you my admiration of your courage and justice in attacking the sham "loyalty" of your colleague, Mr. GARDNER of Massachusetts. As you more aptly expressed it, the "loyalty" of these New England Tories is not for America, but for the munition makers and financiers who are open allies of Great Britain.

As an American citizen by birth, devoted to America, but not to that minority that would force us into war, let me beg of you to believe that 9 out of 10 Americans—even in this city, dominated by a venal press and financial interests—do not want war with Germany now.

Had we broken off relations with Great Britain when she proclaimed a mined "danger zone," we might at least claim to be neutral. As it is, we have satisfied national honor by our break with Germany, and we do not wish to fight that tragically beset country for the right of sailing on belligerent ships or in our own, loaded with ammunition forged against her.

With pride and gratitude that there are still American Representatives not overawed by the arrogance of Great Britain and the powers of wealth.

Yours, very respectfully,

M. C. DARNTON.

JOHNSTOWN, PA., *February 19, 1917.*

Hon. W. W. BAILEY,
Moxham, Pa.

MY DEAR MR. BAILEY: I can not help congratulating you for your stand in Congress. You are right, and I can assure you from 80 to 90 per cent of the people back home are straight with you. Register me a vote in favor of the referendum, and a special friend of Mr. Bryan's advanced, unbiased, sensible ideas.

I am,
Yours, very truly,

E. F. STAHL.

BRYN MAWR, PA., *February 22, 1917.*

House of Representatives, Washington, D. C.

DEAR MR. BAILEY: I can not refrain from sending you a line of appreciation and thanks for your eloquent speech in reply to the snobbish gentleman from Massachusetts, delivered in the House on the 17th instant. Your firm and courageous stand against the wave of ignoble passion which is being assiduously fanned by the war mongers, supplies a fitting climax to your service in Washington distinguished as it has been by high ideals of justice and the common good.

Sincerely, yours,

FRANK W. GARRISON.

The Hon. WARREN WORTH BAILEY.

DEAR SIR: Please let me add my thanks and appreciation for your courage in the stand you have taken in the present crisis, where to put the interests and welfare of the country higher than that of the small money clique who seek to control, is an act of courage in these times.

With thanks and great indebtedness to you, from all who care for this country and her best traditions, for the courageous evidence you have given in standing for the same.

Yours, very truly,

E. M. BOGG.

CLARK UNIVERSITY, *Worcester, Mass., February 18, 1917.*

WARREN W. BAILEY, M. C.,
Washington, D. C.

MY DEAR SIR: I wish to congratulate you upon the noble fight you are making against militarism and war—twin murderers of democracy. I would to God that we had more men of like vision in both Houses of Congress. In these times of a prostitute press, the voice of the real America is not being heard. Thousands of young Americans like myself will go to prison before we allow ourselves to be conscripted into the barracks. We will see the imperialistic schemes of American plutocracy in hell before we will shoulder a gun to protect foreign markets and investments. This may sound unacademic, but I assure you that it is not even an inkling of the depth of my feeling upon the subject, and the mass of the American people feel likewise. Keep up the good fight.

Again thanking you from the bottom of my soul, I remain,

Yours, most sincerely,

W. E. ZENCH, M. A.,
Fellow in Sociology.

SUMMERHILL, PA., *February 19, 1917.*

WARREN WORTH BAILEY.

DEAR SIR: In the matter of war, I would say no. Since Germany has given safe passage on steamships not laden with contraband, I think it would be terrible to risk hundreds of thousands of lives for a few who risk their lives in the war zone.

Yours, truly,

JOHN A. ROBABAUGH.

TUNNELHILL, PA., *February 20, 1917.*

Hon. WARREN WORTH BAILEY,
House of Representatives, Washington, D. C.

DEAR MR. BAILEY: Once more I wish to thank you for having sent me the RECORD, and I also again most sincerely appreciate your stand toward war. I am only a poor miner, but I can not help but thank you.

I have boys soon old enough to be called upon according to law, but I pray may darkness overshadow the day when my boys must be dragged to war.

The words you have spoken against war will ring through the world a thousand years after the "jingoists' jabbering" is dead.

I am a Socialist and therefore stand by my party, yet I can not but regret that you were defeated at the last election; and defeated by whom? Why, by the workers. It is surely to regret that the workers will never understand.

Very truly, yours,

S. A. NELSON,
Tunnelhill, Pa.

ST. LOUIS, MO., *February 18, 1917.*

Hon. W. W. BAILEY,
House of Representatives, Washington, D. C.:

I am a descendant of men and women who came to this country and braved the perils and the hardships of the wilderness, fought in the Revolution to free themselves from British tyranny, and helped to make immortal the name of the man who in his declining years warned his country never to enter into any entangling alliances with any European nation.

I have always been and I am still proud to be called a "Bryan" Democrat, and I take the liberty therefore of congratulating you upon what I consider your true democracy, in your fight on the ammunition manufacturers, and doing what you can to maintain the moral integrity of our country in its international relations. I am one of those who think the President should have lent his support to the passage of a bill to keep Americans off of foreign ships carrying contraband of war and settle the question of right after the European mess is straightened out. If you care to do so, you may advise my Representative, Mr. IGOE, that there are plenty more of us in his district who think as I do.

FRANK L. GANNAWAY.

ALTOONA, PA., *February 22, 1917.*

DEAR SIR: Allow me to congratulate you on the position you take on the war question. I am glad you are able to stand up and fight for the people. I hope you will favor the Government taking control of the food situation in order to relieve the present crisis. There is no need of an investigation; most everyone knows that the speculators are holding foodstuffs for the high prices. Hoping you will give this your immediate attention, I remain,

H. E. GRIFFITH,
2624 Eighth Avenue.

CHESTNUT HILL, BOSTON, MASS.

MY DEAR MR. BAILEY: We have been reading with great interest your "summing up" of our Congressman from Massachusetts. Do keep up the good work. You have the "backing up" of the very people who put him there.

I will send to you an editorial from a newspaper—which is not bought and paid for by the interests—that will show you how the feeling of the thinking people is strongly for the sentiments which you and Mr. Bryan express.

B. FAXON.

DUNLO, PA., *February 21, 1917.*

The Hon. WARREN WORTH BAILEY.

MY DEAR MR. CONGRESSMAN: I deem it a duty as a citizen to inform you that I thank you and indorse your excellent stand you are taking in your movement to keep our dear country out of the European war, and I pray that God will give you the strength to keep up the good fight.

Yours, very respectfully,

J. H. STARK.

Resolutions passed by the Central Trades and Labor Council of Richmond, Va.

Whereas the jingoistic elements in this Nation are doing all in their power to force this country into war; and

Whereas the greatest pressure is being brought on the President to swerve him from his stand for peace; and

Whereas Congress is now considering the adoption of stringent universal military service and so-called espionage bills, which are contrary to the principles for which we stand: Therefore be it

Resolved, That the Central Trades and Labor Council hereby reiterates its stand against war and reassures President Wilson of our support in his endeavors to keep this country out of war.

Resolved further, That we declare our opposition to any universal service and improper espionage bills, and that we hereby appoint a special legislative representative to go to Washington and assist the legislative representative of the American Federation of Labor in special opposition to these bills, and incidentally to also work for any other legislation which has been indorsed by the Central Trades and Labor Council and American Federation of Labor; and

Resolved, further, That we also instruct this representative to work for the adoption of proper legislation providing for an advisory referendum before an offensive war is declared.

H. A. WHITE, *President.*
FRANK A. JONES, *Secretary.*

JOHNSTOWN, PA., *February 28, 1917.*

Hon. W. W. BAILEY,
House of Representatives, Washington, D. C.

DEAR SIR: We, the members of St. Joseph's Beneficial Society, kindly ask to use all your influence and power to prevent war.

Thanking you for same, we beg to remain,

A. K. GEIBELHART, *President.*
JOHN G. HELD, *Secretary.*

Johnstown, Pa., February 22, 1917.

The following resolutions were unanimously adopted by Johnstown Nest No. 1024, Order of Owls:

"*Resolved*, That we, the members of Johnstown Nest No. 1024, Order of Owls, with a large membership, all loyal citizens of the United States, at a largely attended, regular, and especially advertised meeting, have this date extended our hearty congratulations to the President and Congress of the United States for their earnest efforts to keep our country out of the European war.

"We realize the difficulties besetting our administration in trying to keep peaceful with the world, when part of the press of the country, owned and controlled by the speculative moneyed interests of the country are advocating war, but who would not attempt to make a sacrifice themselves. We realize the burden of a war must fall heavy on the membership of all organizations created for the purpose of protecting our homes and those near and dear to us.

"We are ready to defend our national honor in any justifiable cause against any foreign country, but we do not believe it would be dishonorable to warn our ships to steer clear of the war zone created by the warring nations until the situation is changed, thus avoiding the ravages of warfare to a peace-loving American people. It is further

"Resolved, That we realize the common people must bear the greatest burden if war is declared by the rulers. As a peace-loving organization and true Americans we believe the United States should declare to all nations the principle that, except in resisting invasions, no Government has a moral right to declare war except by a referendum vote of the people."

Yours in O. O. O.,

GEO. K. ENGELBACH,
President.
F. LOUIS SIEVERS,
Secretary.

Feed America and starve the war was one of the demands embraced in a set of resolutions adopted unanimously by the county committee of the Socialist Party of Cambria County, at a well-attended meeting in Franklin Borough February 25. The delegates reported a favorable growth in sentiment and membership, and all present joined in laying plans for further organization and propaganda work. Two new branches were reported as working nicely. The resolutions adopted were as follows:

"Whereas the President has requested Congress to vest in him the authority to use the Army and Navy at his discretion to protect the interests of those who, for an enormous, bloody profit, are creating a famine in this country and preventing peace in Europe by the shipment of food and munitions of war; and

"Whereas these money-mad patriots for profit, who, like vultures, are fattening on the blood of the betrayed European workers who would long since have ceased fighting from exhaustion had they not been supplied with food and munitions by neutral (?) nations, are, by the shipment of such supplies, constantly inviting attack and are particeps criminis in the wholesale murder of the workers of Europe, and

"Whereas the burden of war falls almost entirely on the common people, who have nothing to gain and everything to lose by war: Therefore be it

"*Resolved*, That we voice our emphatic protest against the extension of the President's authority in international matters of any nature; and be it further

"*Resolved*, That we call on the National Government to feed America and starve the war by an embargo on all shipments to the belligerent nations, and take immediate steps to relieve the deplorable conditions among the workers, caused by the outrageously high prices; and be it further

"*Resolved*, That we demand that the war-making power, except in case of actual invasion, be vested in the people, to be exercised by them through the referendum."

CRESSON, PA., *February 27, 1917.*

Hon. W. W. BAILEY,
Member of Congress, Washington, D. C.

DEAR SIR: The above resolutions embody the sentiment of practically all the sober-minded people of this district, and we are glad to note that you are doing your utmost to prevent hostilities.

Yours, very sincerely,

AMOS B. MURPHY,
Corresponding Secretary.

Resolutions unanimously adopted by Johnstown Lodge, No. 48, Loyal Order of Moose.

JOHNSTOWN LODGE, NO. 48, LOYAL ORDER OF MOOSE,
Johnstown, Pa., February 20, 1917.

Resolved, That we, the members of Johnstown Lodge, No. 48, Loyal Order of Moose, located in Johnstown, Cambria County, Pa., with over fifteen hundred members, all loyal citizens of the United States, at a regular meeting held this date and largely attended extend our congratulations to the President and Congress of the United States for their very earnest efforts to keep our country out of the European war.

This in face of the fact that part of the press of the country, owned and controlled by speculative moneyed interests of the country, are advocating war, but who would make no sacrifices themselves. We realize the burden would fall heavy on the membership of all organizations such as we have the honor to represent, and all kindred organizations created for the purpose of protecting our families, our homes, and those who are near and dear to us.

We believe in and are ready to defend our national honor against any justifiable cause by any foreign country, but do not believe in the present crisis that it would be an act of cowardice or dishonorable to warn our ships to steer clear of war zones created by warring nations until the situation is changed, which at most can only be a very short period, and thus avoid the awful ravages of warfare to a peace-loving American people; and we further

Resolve, That we realize the horrors of war must fall at the door of the common people if declared by the rulers. As peace-loving organizations and true Americans, we believe the United States should declare to all nations the principle that except in resisting invasions no government has the moral right to declare war except by a referendum vote of the people.

[SEAL.]

WORTH BERKEY, *Dictator.*
GEO. J. HOMMEL, *Secretary.*

Pensions.

EXTENSION OF REMARKS

OF

HON. JOHN W. LANGLEY,

OF KENTUCKY,

IN THE HOUSE OF REPRESENTATIVES,

Saturday, March 3, 1917.

Mr. LANGLEY. Mr. Speaker, in exercising the authority granted me by the House to extend my remarks in the RECORD on the subject of pensions, I desire to submit some facts and observations.

SPECIAL ACTS.

As a member of the Committee on Invalid Pensions it has been my pleasure to aid in securing favorable action on many special bills, increasing the rate of pension allowed by the general law, in the cases of worthy and needy soldiers and sailors of the Civil War and their widows. Coupled with the pleasure of having the privilege to render this service, there has always been a feeling of regret that conditions permitted such action only in a very small number of the many cases equally worthy of it and my sense of justice has always revolted at the thought of the discrimination involved and which was unavoidable under the long-established practice of the committee.

The theory upon which the committee takes jurisdiction of these special cases is that on account of the needy and disabled condition of the beneficiary the rate provided by the general law is inadequate to furnish the necessaries of life and that it is the duty of a grateful Nation to supply that need. It might be termed an equitable jurisdiction, which is made the more liberal in its application (aside from the question of the length of service of the soldier or sailor, which is material to the rate allowed) the nearer the case approaches to that of indigence and helplessness. That is commendable and just, as far as it goes. The trouble about it is that the number of such special bills that can be acted on at a session is so small that each Member of Congress can, at the most, get only a few of them for his district; and it has been my observation that the Members who are most vigilant in such matters and give their cases the larger share of their personal attention get, as a rule, the larger share of the special bills that are enacted. Perhaps it would be impossible under existing conditions to change that. At the same time it works a great injustice to the thousands of other equally deserving cases. I do not wish to be understood as in any sense seeking to criticize the previous administration of this branch of the committee's work. It is perhaps impossible under existing conditions to remedy that. I will say, however, that if the present practice in special-act cases—I mean the practice of limiting the number, as heretofore—is to continue, there ought to be some arrangement whereby each Member shall have his pro rata share of special acts; and that pro rata share should be based upon the number of cases in his district that come within the rules of the committee defining the cases that are entitled to such special relief. Of course, it would be wholly impracticable to carry out such a plan with mathematical precision, but certainly it could be done with reasonable approximation, so as to give a far more equitable distribution of special acts than heretofore. I want to add that if it ever comes within my power to help institute such a reform I shall certainly avail myself of the opportunity. I do not deny that I have always managed to get as many special acts for my district as any other Member, and more than most of them, although in many cases they probably represented as large, or even larger, soldier districts than mine. I acted upon the theory that, aside from my duties as a member of the committee, which I always endeavored to perform justly and impartially, it was my duty as an individual Member of the House to help my soldier constituents and their widows to prepare the testimony in their cases and, acting as their Representative, to get as many of their cases through as it was possible for me to do. Of course, I was conscious all the while that there were many more in the district whose cases were equally deserving that I had not knowledge of personally, or, if I had, that it was not in my power to reach at the time. I simply did the best I could under the limitations with which I was surrounded. I wanted to get relief for more of them and would have gladly done it if I could. It was discrimination in a sense, but unavoidable discrimination, which I tried to minimize as much as possible by giving preference, as far as I could, to the most needy and helpless cases, in the various counties, that came within by personal knowledge. I have no doubt that there are cases more needy and helpless than some of those in which relief has already been given. This is one of the inevitable results of the system under which the committee has been proceeding and for which I am proposing a much desired remedy, for to me the task of selecting from among the many that are worthy the few that have been thus rewarded has been the most distressing that I have had to perform since I have been in official life.

What I have said regarding the practice of our Committee on Invalid Pensions, and of my own course in handling the cases from my district presented to it, applies with equal force to the other Pension Committee of the House which has jurisdiction of all cases not based upon service rendered in the Civil War. I feel that the history of special pension legislation emanating from both committees shows the urgent need of some reform. I introduced in this Congress two bills which would, in my judgment, if enacted into law accomplish that. I shall insert these in the RECORD. The first one is designed to give to all veterans of the Civil War the rates of pension practically that they would get under the rules of the committee if their cases were made special by it and included in one of the omnibus pension bills. In other words,

the enactment of this bill would eliminate the discrimination to which I have referred, and would result in all of the old soldiers being treated exactly alike. It would cost a little more money, I concede, but the increase would be only temporary, and it would be a mere bagatelle compared with what the old fellows deserve at our hands. All of them are now so far advanced in years that they are rapidly becoming helpless, many of them being so already, and those that do not now will soon require the personal aid and attendance of another person, for which the pension they are now receiving, and upon which most of them are solely dependent, is inadequate to provide. Let us, while we can, enable them to provide the necessaries of life and employ some one to look after their personal comfort, when needed, during the few remaining years that they will be with us. The full text of the bill is as follows:

A bill (H. R. 17572) to provide for increasing the rates of pension of totally disabled, needy, and helpless soldiers, sailors, and marines of the Civil and Mexican Wars.

Be it enacted, etc., That the rate of pension for every officer or enlisted man in the Army, Navy, or Marine Corps of the United States who served therein 90 days or more during the Civil War and was honorably discharged therefrom, and who has no means of support aside from his pension, and no one is by agreement bound for his support, shall be $30 per month, provided he be totally incapacitated for self-support because of disability or disabilities not the result of his own vicious habits; and shall be $40 per month, provided he be totally incapacitated for self-support because of disability or disabilities not the result of his own vicious habits and requires the frequent and periodical, though not constant, aid and attendance of another person; and shall be $50 per month, provided he be totally incapacitated for self-support because of disability or disabilities not the result of his own vicious habits and requires the constant aid and attendance of another person. The rate of pension herein provided shall commence from the date of filing an application therefor in the Bureau of Pensions after the passage of this act.

SEC. 2. That the benefits of this act shall include those who have a pensionable status under the joint resolution of February 15, 1895, and under the second section of the joint resolution of July 1, 1902, as amended by the joint resolution of June 28, 1906.

SEC. 3. That the $40 and $50 rates of pension provided by section 1 of this act shall apply to those survivors of the Mexican War who are now on the pension rolls or who may hereafter be placed thereon.

SEC. 4. That the provisions of this act shall not be construed to reduce the rate of pension to which anyone is now entitled under any general or special law.

Mr. Speaker, as is well known, it was not possible to get consideration of such a bill during the Sixty-fourth Congress. I shall introduce it again at the opening of the next Congress, and I hope we may be able to get legislation of this character enacted then. It certainly ought to be done.

SPANISH-AMERICAN WAR AND PHILIPPINE INSURRECTION.

The other bill is for the relief of the veterans of the Spanish-American War and of the Philippine insurrection. It reads as follows:

A bill (H. R. 17573) to pension the survivors of the War with Spain and Philippine insurrection.

Be it enacted, etc., That the provisions, limitations, and benefits of section 2, as amended by the act of May 9, 1900, of an act entitled "An act granting pensions to soldiers and sailors who are incapacitated for performance of manual labor and providing pensions to widows, minor children, and dependent parents," approved June 27, 1890, be, and the same are hereby, extended from the date of the passage of this act to the surviving officers and enlisted men who served in the late War with Spain and Philippine insurrection.

The effect of this bill would be to give title to pension to veterans of the Spanish-American War and of the Philippine insurrection who had a service of as much as 90 days and received an honorable discharge, and who are now shown to be disabled for the performance of manual labor, in whole or in part, without requiring them to prove that their disability was contracted in the service and line of duty. It is now nearly 20 years ago since they rendered this service, and it is practically impossible for them, in the absence of a hospital record, to establish service origin of their disabilities. Most of them were associated with comrades that they had not previously known, and most of these who are now living are scattered all over the world, so that their testimony is not available. It is true that the period of time which has elapsed since they rendered this service is a little shorter than the period which had elapsed following the close of the Civil War when the law was passed pensioning soldiers of that war without requiring proof of service origin of their disabilities, but they were not confronted with as much difficulty as these men are in securing testimony on that point; and I think the time has fully arrived when these men should have the benefits of such a law. It was not possible to get consideration of this bill in the Sixty-fourth Congress, but I am going to reintroduce it in the Sixty-fifth Congress and press it for passage then. It is needless for me to say that I earnestly hope that the Key bill for the relief of the widows of these men will also be passed in that Congress. It ought to have been passed in the Sixty-fourth Congress, and it would have been but for the opposition to it of a few men in another legislative body. I want to add, in this connection, that I have favored ever since I have been in Congress the enactment of more liberal pension legislation for the relief of the widows of veterans of the Civil War, and have introduced several bills for their benefit during that time. I shall always be proud of the fact that I was a member of the committee that framed and reported the Ashbrook bill and that I had the privilege of participating in the enactment of that law.

THE STATE MILITIA.

I have been advocating for so many years the enactment of a law that will do justice to the State miiltia organizations of Kentucky, Missourl, and other States, who were never mustered into the United States service but rendered valuable and efficient aid, along with the Regular troops in the suppression of the Rebellion, and I have so many times addressed the House of Representatives upon that proposition, and have been so persistent in my efforts in behalf of the militia soldiers that I do not feel that it is necessary for me to reiterate my attitude and views in this statement. I will, however, insert as a part of my remarks the following colloquy, in which I participated when the House, on March 3, 1917, had under consideration a bill to pension the survivors of the various Indian wars. It is my purpose to reintroduce in the Sixty-fifth Congress this militia bill and do my utmost to get some legislation for the relief of this deserving and long-neglected class of our ex-Union soldiers. The extract from the RECORD to which I have just made reference is as follows:

"Mr. SWITZER. Is there any way provided by which they can establish their identity and their connection with the service and that they actually served?

"Mr. KEY of Ohio. Yes; in the manner indicated by the gentleman from Colorado [Mr. KEATING].

"Mr. KEATING. By evidence satisfactory to the Secretary of the Interior.

"Mr. LANGLEY. What character of service is required?

"Mr. KEY of Ohio. They must have served at least 30 days. I will say to the House that I have prepared a statement setting forth the amendment and the reasons why I think this amendment should not be adopted. I can not understand how the Senate of the United States could pass an amendment to a bill providing what this amendment does. I will ask the Clerk to read the statement to the House.

"Mr. NORTON. Will the gentleman from Colorado yield?

"Mr. KEATING. The gentleman from Ohio [Mr. KEY] has the floor. He wishes this statement read.

"The SPEAKER pro tempore (Mr. SAUNDERS). The Clerk will read the statement.

"The Clerk read as follows:

"On page 5, line 17, amendment No. 9, the Senate added:

"'*Provided*, That when there is no record of service or payment for same in the War Department or Treasury Department the applicant may establish the service by satisfactory evidence from the muster rolls on file in the several State or Territorial archives: *And provided further*, That the want of a certificate of discharge shall not deprive any applicant of the benefits of this act.'

* * * * * * *

"Mr. HAYDEN. Will the gentleman yield?

"Mr. MAYS. I yield to the gentleman from Arizona.

"Mr. HAYDEN. I have presented individual bills to the Committee on Pensions for soldiers who rendered service in the Indian wars in Utah. In each case I have been told by the committee that these men have no pensionable status and that therefore the committee could not report out a special bill for their relief, but that general legislation must be passed.

"Mr. SHERLEY. Do I understand that what you would not do in an individual case after investigation, you are willing to do by wholesale, without investigation?

"Mr. MAYS. Not only this amendment, but the whole bill is general in its terms. It provides in a general way for pensioning the survivors of the various Indian wars of our history. The country's debt to these men who met and conquered the cruel, heartless savage of the West can never be fully repaid. They blazed the path of civilization. Other States have been compensated for such manly services of their citizens. The father of this bill [Mr. KEATING], who refuses to support my motion, admits that the services were rendered in full measure. Why not pay the bill? We should not invoke the aid of technicalities to avoid a just obligation.

"Mr. HOWELL. As I understand it, they would not have any status before the Committee on Pensions. The Committee on Pensions will not consider these claims.

"Mr. LANGLEY. Not unless there is some general legislation conferring a pensionable status upon that class. That is the

rule of the committee. I do not agree with it but have been unable to get it amended.

* * * * * * *

"Mr. MAYS. We have made investigation. These pioneers rendered the services. The State has a just claim covering the expenses incident to defending the settlements against the savages who were the wards of the General Government. Gentlemen say, though the cause of these veterans may be just, it might prove a dangerous precedent to meet the obligation. Unjust claims might be encouraged. Honest men do not refuse to pay honest debts through fear of future fraudulent claims.

"Mr. LANGLEY. We have encountered the same difficulty in trying to get relief for the Kentucky and Missouri Militia who rendered service for a much longer period than the gentleman says these men rendered. Some gentlemen think, as I said a while ago, that we ought not to pass a private bill for their relief, because general legislation ought to be enacted covering all of them, and others say, as my colleague from Kentucky [Mr. SHERLEY] says, that we ought not to have general legislation but special legislation, and between the two opposing contentions we have never been able to get any relief for them at all.

"Mr. SHERWOOD. Was not the reason because they were never mustered into the service of the United States?

"Mr. LANGLEY. Unquestionably; there is where all the trouble lies.

* * * * * * *

"Mr. KEATING. I yield to the gentleman from Kentucky [Mr. LANGLEY].

"Mr. LANGLEY. Mr. Speaker, I shall not take up much of the time of the House, because in this rush, with all the congested conditions surrounding us, I realize the House has not the patience, nor can we spare the time, especially since an amendment to this bill can not be made at this stage so as to include the State militiamen of Kentucky, Missouri, and other States who rendered valuable service to the Union cause during the Civil War, and realizing, as I do, that I can not by talking now advance the interests of these militiamen, whose cause is so near to my heart. I am in sympathy with the general purpose of this bill. I have made a plea almost every session of Congress during the past 10 years for some general legislation which will widen the scope of the pension laws so as to reach those soldiers who, although not mustered into the United States service, rendered just as faithful and patriotic service to their Government in time of war as those who were mustered in. The gentleman from Missouri [Mr. RUSSELL] and myself and others have been earnestly seeking during all these years to get some relief for them. We even proposed to limit that relief to cases where the service was for 90 days or more, and still Congress has thus far denied us. We have tried to get a special rule adopted by the joint Pension Committees of the two Houses which would permit relief by special act in needy and deserving cases where the soldier is shown to have rendered that much service and is now in a dependent and helpless condition, and that relief was denied us. It is true that we secured the adoption of such a rule by the House committee, but the Senate committee contended that the relief ought to be extended to all by general legislation. We secured a favorable report once from the House committee on a general bill of that character, but we have never been able to get that through Congress. The cause of these militiamen has thus fallen between these two contentions. The one that these cases should be handled by special act and the other that they should be covered by general legislation.

"If the Senate committee had agreed to the rule adopted in a previous Congress by the House committee, many cases of these old fellows would have been provided for by now. And yet here comes a proposition from the Senate to pension these militiamen who were engaged in the Indian wars if they rendered 30 days' service. I do not underestimate the valued and patriotic and unselfish service these Indian fighters rendered, and I do not wish to put myself in the position of opposing recognition for them; but, Mr. Speaker, I have not up to this moment been able to get the consent of my conscience to vote for this Senate proposition to reward the 30 days' service of these western militiamen while Kentucky militiamen, many of whom rendered a much longer period of service, are left without recognition. It seems to me that it is unjust discrimination, and when I think about voting for it these old, needy, and helpless militiamen down in Kentucky come into my mind and my conscience seems to tell me that these Indian fighters, deserving as they are, who fought after the Civil War, and are therefore presumably younger on an average than the Kentucky militiamen, ought to wait until they can all at least be treated alike and provided for in one general bill when the condition of the Treasury, now unfortunately depleted, will warrant such legislation. I dislike very much to vote against the Senate proposition, but I fear that I shall be compelled to do so in obedience to the sense of injustice which I feel over the unfairness of it. I give notice now that I shall bring this question of pensioning the militiamen of Kentucky, Missouri, and other States up again in the next Congress. I agree with all that has been said about our duty to those who have fought our wars, whether they were regularly mustered or not, and if my service as a Member of Congress was to close to-morrow I would be proud of the privilege of making my last words on this floor an appeal in their behalf.

"Mr. Speaker, I want to show that the service rendered by these Indian fighters, valiant and unselfish as it was, is no more deserving of the gratitude of this Republic than are the services rendered by these other militiamen, and that there is an additional argument in favor of the latter because most of them rendered a much longer service and certainly a service as important to the country. I know this is not the time to do that, and I therefore ask unanimous consent to extend my remarks in the RECORD on this question.

"The SPEAKER. The gentleman from Kentucky asks unanimous consent to extend his remarks in the RECORD. Is there objection?

"There was no objection.

* * * * * * *

"Mr. HOWELL. There is no complete analogy between the forces of a sovereign State which for reasons sufficient for them refuse or neglect to enter the military service of the United States and the militia of a Territory subject to the orders of the governor, their commander in chief, and himself the direct appointee of the President of the United States, the Commander in Chief of all Federal forces. The organization of a Territory is merely the agency of the Federal Government. Any gentleman who considers the matter a moment must differentiate between the militia of a Territory and that of a sovereign State.

"Furthermore, I want to emphasize the fact that these Indian volunteers or militia could not be mustered into the service of the United States. There was no one to muster them in, even if there had been authority for it. The crisis had to be met, without regard to future personal considerations. They gave their strength and risked their lives in this cause.

"Mr. LANGLEY. Will the gentleman yield to me there?

"Mr. HOWELL. Yes.

"Mr. LANGLEY. I have given a great deal of study to the militia question. A number of the Missouri and Kentucky Militia, under the command of Federal officers, performed service and were armed and equipped by the Federal Government, and we have tried to get recognition for those who served 90 days or more.

"Mr. HOWELL. There is a marked difference in the pension policy of the Government in dealing with Indian and other wars. The very nature of Indian warfare and the atrocities and horrors involved in it, as well as its suddenness and temporary character, has always been recognized by Congress. Different rules of service and proof in Indian wars have been written into these laws from what is customary in all other wars. There has always been shown a liberality and spirit to mete out justice in these Indian wars without regard to a strict observance of all those precise channels of evidence which are so requisite and essential in a thorough and perfect military organization.

"Mr. LANGLEY. Neither is there a difference between the Federal troops and the militia.

"Mr. HOWELL. If the claim which Utah presented in 1869 for reimbursement and compensation for these services had been appropriated for this amendment would not be necessary in our particular case. Utah has undoubtedly a just and valid claim for reimbursement for these services, which Congress will some day acknowledge and pay, but it is cruel and unjust to argue because Congress has not made just and adequate compensation for this service that for that reason these survivors should be further deprived of a pension freely given to all others who rendered similar service. Such objections are flimsy and technical and ought not to weigh with this House under the circumstances.

"Mr. BORLAND. Will the gentleman yield?

"Mr. HOWELL. For a question.

"Mr. BORLAND. It is customary in Western States, in case of a militia of this kind, to reward them by land scrip of various kinds, is it not? Was anything done in that way for these men?

"Mr. HOWELL. To the best of my knowledge there has been no recognition of his service on the part of the General Government whatsoever. There is only the fact that it was performed under territorial authority and in accordance with the demand of the

Indian Superintendent at that time who was in charge of the Indians and a Federal officer.

"The magnitude of these Indian disturbances and the invaluable service rendered by those who served in them is fully recognized and admitted by the opponents of the amendment, but they strenuously resist the essential provision that will make them beneficiaries under the bill. They are content to make the promise to the ear in section 1 of the bill, but now seek to break it to the hope by refusing to concur in the Senate amendment.

"Mr. LANGLEY. If the gentlemen will permit me, there has been no land scrip issued by Congress since the Civil War, and this service was all performed, as I understand it, after the Civil War.

"Mr. HOWELL. Yes. If there is any gentleman who can suggest a way by which these meritorious soldiers—these men who furnished their own arms, their own equipment, and went out to defend the settlers in that early day—can be rewarded; if there is any way by which you can amend this so that you can extend this bounty to those who are as deserving as any soldiers ever were in any Indian war, we have no objection to that. This talk about desertion and about corruption and seeking to get into the Treasury by this amendment, to those who know the conditions, is all subterfuge.

"Mr. LANGLEY. That is right."

ERRONEOUS CHARGES OF DESERTION.

There is still another class of our soldiers who are, and have been for all these years, entitled to relief, who have been unable to get justice done them through the War Department, because of the rigid and absurd provisions of the law governing that department in such matters, and who have been unable to get relief through either general or special legislation by Congress because of the adverse attitude of so many Members of it, which is due almost entirely to a total misunderstanding on their part of the facts. I refer to those soldiers who were entered upon the records by their superior officer as deserters because of their unexplained absence from their command, when in fact their absence was due to causes which when disclosed render the charge of desertion outrageously unjust. They can not have the charge removed upon making proof of those facts and presenting them to the War Department, because the provisions of the law enacted by Congress governing such matters do not confer upon that department the power to do it; and they can not get relief from Congress by special legislation nor by having the law amended, for the reasons I have already stated.

I have taken occasion a number of times since I have been a Member of this body to discuss this question and have repeatedly endeavored to get relief for these men, both by general and special legislation, but thus far without avail. I shall not go into the question again at this time, except to reproduce here some of the debate on special bills proposing to remove desertion charges, which debate occurred in the House on February 12, 1917, and in which I participated. This will serve to illustrate the present situation. I am not going to cease or abate my efforts in their behalf, but I shall renew them in the Sixty-fifth Congress. The extracts from the debate referred to are as follows:

"Mr. MANN. What is the gentleman's amendment?

"Mr. RAKER. My amendment is to strike out all after the word 'Interior' in line 1 on page 2, and all of lines 2 and 3.

"Mr. LANGLEY. Mr. Speaker, the question of whether the bill is objected to has not yet been put to the House.

"Mr. MANN. The gentleman is stating this for information. I would like to have him again state what his amendment is, so that I may follow it.

"Mr. RAKER. I want to strike out more than that.

"Mr. LANGLEY. Why not let it go over?

"Mr. RAKER. But I want to strike out, commencing with the word 'and' in line 11, page 1, all the rest of that line and all of lines 1, 2, and 3 on page 2. That would just correct his military record.

"Mr. MANN. All right.

"Mr. LANGLEY. Mr. Speaker, I want to reserve the right to object. I want to know if this is a desertion case.

"Mr. FIELDS. Yes.

"Mr. RAKER. The record has been in a shape showing that it is not a desertion; in fact, from the record, the man was home and sick——

"Mr. MANN. He deserted; it is a desertion case.

"Mr. LANGLEY. I have several cases like that when men were at home sick and were not really deserters.

"Mr. MANN. I can assure the gentleman from Kentucky that he has had more passed than any other man in the House, as he is a most diligent man.

"Mr. LANGLEY. The gentleman from Illinois is usually very accurate in most instances, but he missed it in this case, because I have not had in 10 years a single one passed.

"Mr. MANN. I am surprised, because the gentleman from Kentucky is extremely active on behalf of his constituents.

"Mr. LANGLEY. I thank the gentleman for that statement, but I have spent a great deal of time in trying to get some of these desertion cases through this Committee on Military Affairs.

"Mr. MANN. I will undertake to say the gentleman has not spent half as much time as the gentleman from California, besides——

"Mr. LANGLEY. The gentleman from California does not do anything else.

"Mr. MANN. Oh, he does lots of other things. I want to say to the gentleman from Kentucky it is considered one of the prerogatives of the membership of the Committee on Military Affairs that a member of that committee occasionally introduces a bill to remove the charge of desertion and gets it passed, and when outsiders are given this privilege it is by favor and not by right.

"Mr. LANGLEY. I had a suspicion there was something of that kind or something wrong somewhere, and I am glad to have the statement from such an experienced source.

"Mr. FIELDS. Mr. Speaker, I want to say to the gentleman from Kentucky, first, that I have been a member of the Committee on Military Affairs for six years and a goodly portion of that time as a member of the subcommittee on desertions, and I have secured the passage of only two bills, and they were much more meritorious than the bill of my colleague to which he refers.

"Mr. LANGLEY. That is a mere matter of opinion.

"Mr. FIELDS. I want to say, Mr. Speaker, in answer to the gentleman from Illinois, the committee does not attempt to play favorites in these matters, but they try to pass upon the merits of each case before them.

"Mr. LANGLEY. If my colleague will yield, what I am trying to get at is how he works it to get a bill through at all.

"Mr. BURNETT. Mr. Speaker, I hope the gentleman will not conduct a kindergarten here when other people are waiting to try to get their bills passed.

"Mr. LANGLEY. I want to know the length of service of this soldier; I am sincere about this; I want to know how long he served and why you are proposing to remove the charge of desertion from his record.

"Mr. FIELDS. This man was only out of the service two days, and during the two days he was out he was charged with desertion. He returned on his own accord and served out his time and received an honorable discharge. But the charge of desertion apparently was against him on the war records, and was not corrected, and therefore it stands as a charge of desertion.

"Mr. LANGLEY. He returned voluntarily?

"Mr. FIELDS. He returned voluntarily after having been two days out of the service, and then he remained and was mustered out.

"Mr. LANGLEY. How much time did he serve altogether?

"Mr. FIELDS. He served his entire enlistment, from 1865 to July 27, 1866.

"Mr. STAFFORD. Mr. Speaker, reserving the right to object, does that grant him an entire service from April, 1865, to the close of the war, or after the war was concluded, a pensionable status because he served 90 days during the Civil War?

"Mr. FIELDS. Yes; he served 90 days.

"Mr. STAFFORD. When is it considered that the Civil War ended?

"Mr. FIELDS. The gentleman is familiar with that.

"Mr. LANGLEY. I think it has been officially determined it was July 15, 1865. Anyway, it was in July, 1865, with the exception of certain restricted areas where war conditions still existed.

"Mr. FIELDS. This man was mustered out and received an honorable discharge, but because he was away from his command for two days, from December 31 to January 1, he was charged with desertion, and it was only an oversight in not correcting his record.

"Mr. LANGLEY. Will the gentleman pardon me? If he received an honorable discharge and was absent only two days, and voluntarily returned, that would not prevent his widow from getting a pension under existing law if he served 90 days during the Civil War.

"Mr. FIELDS. I have the report here——

"Mr. LANGLEY. There must be something else wrong about it or this legislation would not be needed.

"Mr. FIELDS. The records of the War Department show that he was absent only two days and was mustered out with his company and received an honorable discharge. At the Pension Bureau the charge of desertion, I understand, still stands against him on the record, and they refuse to pension him.

"Mr. LANGLEY. I am frank to say that I never heard of a case where there was an absence of only two days and where the soldier voluntarily returned and was honorably discharged that the War Department refused to remove the charge of desertion.

"Mr. FIELDS. I never heard of it, and that is why I think it ought to be corrected.

"Mr. LANGLEY. I will not object.

"The SPEAKER pro tempore. Is there objection? [After a pause.] The Chair hears none. The Clerk will report the bill.

"The Clerk read as follows:

"Be it enacted, etc., That in the administration of the pension laws and the laws governing the National Home for Disabled Volunteer Soldiers, or any branch thereof, George F. Reid shall hereafter be held and considered to have been honorably discharged from the military service of the United States as a private of Company D, Battalion —, Third Regiment California Volunteer Infantry, and as a private of Company C, Battalion —, Third Regiment California Volunteer Infantry, and that his widow, Isabella Reid, be placed on the pension roll of the Secretary of the Interior, and that she be paid a pension at the rate of $30 per month: *Provided*, That no pension shall accrue prior to the passage of this act.

"Mr. RAKER. Mr. Speaker, I offer an amendment.

"The SPEAKER pro tempore. The gentleman from California offers an amendment which the Clerk will report.

"The Clerk read as follows:

"Amend, on page 1, line 11, after the word 'Infantry,' by striking out the following language:

"'And that his widow, Isabella Reid, be placed on the pension roll of the Secretary of the Interior, and that she be paid a pension at the rate of $30 per month.'

"Mr. MANN. And strike out the proviso.

"The SPEAKER pro tempore. The question is on agreeing to the amendment.

"The question was taken, and the amendment was agreed to.

"Mr. RAKER. I ask that the title be amended accordingly.

"The SPEAKER pro tempore. That will be done after the bill is passed. The question is on the engrossment and third reading of the bill.

"Mr. MANN. It is not to correct a military record. This is a bill for the relief of George F. Reid.

"Mr. LANGLEY. The gentleman is entirely correct about that. You can not change the record of the War Department by an act of Congress. You can change the effect of it.

"Mr. MANN. There are a couple of blank places in here. I do not know whether the bill be any good unless you fill them up here or hereafter.

"Mr. RAKER. He served twice.

"Mr. MANN. The number of the battalion is not stated in either place. The gentleman better have that put in in the Senate.

"The SPEAKER pro tempore. The question is on the engrossment and third reading of the amended bill.

"The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

"The title was amended so as to read: 'A bill for the relief of George F. Reid.'

LEONORE M. SORSBY.

"The next business in order on the Private Calendar was the bill (H. R. 4544) for the relief of Leonore M. Sorsby.

"The SPEAKER pro tempore. Is there objection?

"Mr. MANN and Mr. COX objected.

BENJAMIN R. BUFFINGTON.

"The next business in order on the Private Calendar was the bill (H. R. 5182) requiring the Secretary of War to issue an honorable discharge to Benjamin R. Buffington.

"The SPEAKER pro tempore. Is there objection?

"Mr. LANGLEY. Reserving the right to object, I would like to have some brief statement of that case. What I am trying to get at, if the gentleman will pardon me, is whether you are passing any cases that are not more meritorious than a number that I am so anxious to get through that committee and I have been unable to get through.

"Mr. FIELDS. I will say to my colleague——

"Mr. MANN. It is a pure matter of favor. What is the use?

"Mr. FIELDS. There is much more merit in this case than any that I have seen so far.

"Mr. LANGLEY. I have been good to the members of that committee individually, I am sure, and I can not understand why they do not want to favor me.

"Mr. FIELDS. Does the gentleman want an explanation?

"Mr. LANGLEY. A brief one.

"Mr. FIELDS. This man enlisted in 1861. He was captured and placed in prison. After his release from prison he returned to parole at Camp Parole, Md., and on the motion of his father, inasmuch as he was a minor, he was honorably discharged from the service.

"He reenlisted again and was transferred from one place to another, and finally to a point in South Carolina. When he arrived there he found his regiment was in North Carolina. It was not possible for him to reach his regiment, and he returned home when he could get there.

"Mr. LANGLEY. Now, Mr. Speaker, let me state to the gentleman right there: In the mountains of eastern Kentucky and Tennessee and that section of country generally during the Civil War, in that border territory, we had hundreds of soldiers who were situated just as this soldier was, according to the gentleman's statement. They made repeated attempts, many of them did, according to testimony that I have read in many of these cases, to get back to their commands, but they could not do it. They could not get word to their commanders so that they would know why they were absent. Frequently they were cut off by the enemy, and they were charged with desertion. The conditions existing there during a portion of the war were worse than in any other section of the Union, and you people of the North and West have no conception of it, and that is why you are so hard on these so-called desertion cases.

"This unjust charge still stands. The case of mine to which the gentleman referred a moment ago was that of an old fellow who went home. He says his commanding officer gave him permission to go. He had served over two and one-half years and reenlisted as a veteran volunteer. He was taken sick after he got home. He could not get back to his command. We have established these facts by a dozen witnesses, and yet I have tried for nine years without success to get action on this case.

"Mr. FIELDS. Mr. Speaker, I want to say to my colleague and to the membership of the House that there is a good deal of complaint because the Committee on Military Affairs does not report out desertion cases. I know there are many meritorious claims for the correction of military records. But gentlemen must realize how impossible it is for the Committee on Military Affairs to reach all these cases.

"At the beginning of this Congress I asked the members of the subcommittee to join me in an effort to clean up these bills, and the subcommittee on desertions has written up about 200 cases. Many of them have been reported unfavorably, while many of them have been reported favorably. But the membership of the House knows that the Committee on Military Affairs has been one of the busiest committees of the House during this Congress. We have had three or four sittings during this Congress on cases of desertion. The committee is busy all the time, and it is not because we do not want to consider claims, but it is because we have not the time to reach them; and I trust that my colleague will not feel that he is discriminated against. There are probably 250 Members of the House who have bills of that kind introduced, many of them being claims of much merit, but it has not been possible for the Committee on Claims to reach all of them.

"Mr. LANGLEY. Is it going to be possible for me to get one or two or three of these cases that I have spoken to the gentleman about? I am perfectly sincere in this, and I do not want to delay the work here to-night. But I have several old soldiers in my district who are entitled to relief.

"Mr. NEELY. Mr. Speaker, I ask for the regular order.

"The SPEAKER pro tempore (Mr. FOSTER). The regular order is demanded.

"Mr AUSTIN. Mr. Speaker, I move to strike out the last word.

"The SPEAKER pro tempore. The gentleman from Tennessee moves to strike out the last word.

"Mr. AUSTIN. Mr. Speaker, I wish to indorse what my colleague from Kentucky [Mr. LANGLEY] has said in reference to these so-called desertion cases. East Tennessee furnished 31,000 soldiers to the Union Army. Many of them served in that immediate section of the country. When they were sick or wounded or disabled, many of the men in our east Tennessee regiments, which were not thoroughly and well equipped with hospital service, were granted permission to go home, where they could be nursed and cared for. When they got well perhaps the regiments to which they belonged had left the State, or were in Kentucky, and a large number of our very best citizens have been unable for fifty-odd years to get the American Congress to consider and pass upon this question and remove from them and their reputation and their children a cloud and a reflection upon their honor.

"Now, I have had some of these bills pending before the Committee on Military Affairs for eight years. I am becoming impatient. Some of these men have actually passed away. Recognizing the statement made by the gentleman here, which was made then to me, that on account of the annual appropriation bill they could not meet these bills, I offered a bill in the Sixty-first Congress to create a commission composed of The Adjutant General, the Surgeon General, and the Secretary of War, to pass upon these cases. Not a thing has been done with that bill. No action has been taken on my cases. I shall be in the next Congress if I live, and I serve notice here and now that I shall object to every one of these bills introduced by a member of the Military Affairs Committee, when absolutely no action has been taken on the bills that I have introduced.

"Mr. FIELDS. Very few of these bills are from members of the Military Affairs Committee.

"Mr. LANGLEY. One of these old soldiers to whom I referred a moment ago is now blind. According to what his comrades say, he was the sixth man to scale the heights of Lookout Mountain on that memorable morning when our flag was placed upon its summit. Do not tell me that that sort of a soldier is justly charged with desertion. I have furnished 12 or 15 affidavits stating that he was unable to get back to his command, although he tried to do so. He served two years and seven months. I have had that case pending before the Military Affairs Committee of the various Congresses for nine years, and it has been reported two or three times by a subcommittee, but either they could not get a quorum of the full committee or something or other always happened to block my bill.

"Mr. FIELDS. Other members have filed claims, too, supported by a great deal of testimony. But I want to say to the gentleman from Tennessee [Mr. AUSTIN] that if he will take the pains to read the reports on these bills, he will see that the charge that the bills are from the Committee on Military Affairs is without foundation. There has not been a bill passed to-night or the preceding night that was from a member of the Military Affairs Committee.

"Mr. MANN. The last night we were here we had three of them in succession introduced by members of the Committee on Military Affairs and reported by the gentleman——

"Mr. LANGLEY. I did not make that charge. I did not know it.

"Mr. AUSTIN. In view of the statement of the gentleman from Illinois I ask the gentleman from Kentucky [Mr. FIELDS] to take back the statement he made a few minutes ago.

"Mr. FIELDS. Who introduced them?

"Mr. MANN. I do not remember. We were all commenting upon it at the time. They were meritorious bills.

"Mr. AUSTIN. I do not question that they were meritorious bills.

"Mr. FIELDS. As I remember, there was only one bill from a member of the subcommittee, the gentleman from Illinois [Mr. MCKENZIE], and the bills were objected to.

"Mr. MANN. There were three in succession. I am not going to name them. What is the use?"

The Late Senator James P. Clarke.

MEMORIAL ADDRESS

OF

HON. HENDERSON M. JACOWAY,

OF ARKANSAS,

IN THE HOUSE OF REPRESENTATIVES,

Sunday, February 18, 1917.

The House had under consideration the following resolutions:

Resolved, That the business of the House be now suspended, that opportunity may be given for tributes to the memory of Hon. JAMES P. CLARKE, late a Senator from the State of Arkansas.

Resolved, That as a particular mark of respect to the memory of the deceased, and in recognition of his distinguished public career, the House, at the conclusion of the exercises of this day, shall stand adjourned.

Resolved, That the Clerk communicate these resolutions to the Senate.

Resolved, That the Clerk send a copy of these resolutions to the family of the deceased.

Mr. JACOWAY. Mr. Speaker, on the first day of October last the message was flashed from one extreme of this country to the other and to the nations of the world that a great and good man had fallen. Senator JAMES P. CLARKE of Arkansas lay dead at his home. A citizen most useful, respected, and beloved had lain down the burdens that were his. He had passed from scenes that were transitory and mortal to the realm of those activities that are immortal.

A devoted family was bereft of him who was its head and who to them was a trinity. A sorrow as black as a starless night gathered around and about them and a load as heavy as a huge stone had rolled itself upon their hearts when they realized the awful tragedy that a devoted husband and father had taken his leave for the last time and bidden them all a final adieu. A host of loyal and devoted admirers that were Mr. CLARKE's received the news of his passing with a grief unfeigned. To them they realized that the State and Nation had sustained a great and continuing loss and that they a friend in all the term implies had answered the last call, but who did so with a heart unafraid, a stoicism unequaled, and an intrepid soul unshaken by fear and had bowed to and obeyed the mandates of nature's final decree in equity. When family and friends were brought face to face with the fact that in the life of one they loved the last chapter had been written and the book closed, an agonizing catastrophe threw its shadow across their pathways, and "sorrow rolled like a tempest through their souls."

SENATOR CLARKE'S EARLY CAREER.

Mr. Speaker, time forbids the recital of all the powerful factors that went into the making of this man's life. While in most respects it was not different from other men's, yet when studied as a whole and viewed in its entirety there is found running through the warp and woof of his character those brilliant and golden threads of genius positive and indisputable—the exception that tests the general rule. The compelling force of Senator CLARKE's life, like all men of overpowering ability, wrung from the lip of friend and foe alike that tribute that was his and compelled unstinted words of praise of a life that while erratic in many instances and not regular and commonplace in its orbit, nor in those elements it repelled and attracted, yet most commonplace in fundamentals, for his was a life builded upon the rock, and his characteristics of heart and brain were worked out upon those plans and specifications that went into the making of a man that is true in the sight of his fellows. Senator CLARKE was honest; he was courageous—both morally and physically—and but few men that have sat in the Senate of the United States for the past half century were as capable and efficient as was he. He was one of Arkansas' greatest contributions to the world, having for his object its betterment and its uplift. In no sense of the word can it be said of Senator CLARKE that he was a demagogue. The average political art and artifices of the politician were an absolute stranger to him. To them he had never been introduced and had he been he would not have stooped to use them to gain a given end.

Since the Civil War no southern man has been quite so honored as was he. He was graduated at the University of Virginia. He was a native of the State of Mississippi, which he loved to the day of his death, and on many occasions delighted to make affectionate reference to the State of his birth. In 1879 he moved to the State of Arkansas, which period marked the genesis of a brilliant train of political and legal successes. From that day to the day of his death the State of his adoption delighted to do him honor. He served two years in the State legislature, only to be followed by a term of four years in the State senate, of which body he became president pro tempore and ex-officio lieutenant governor. At the expiration of his State senatorial term he was chosen attorney general and two years later he was elected governor. In 1902 he was elected United States Senator, thus realizing that ambition which is said by him had been his dream from early boyhood. In his second race for the United States Senate he defeated one of the noblest and ablest men Arkansas ever sent to the Halls of National Legislation, Senator James K. Jones. In all his public life no scandal was ever associated with Senator CLARKE's name and his private life was as clean and pure as a star.

AS UNITED STATES SENATOR.

As Senator of the United States he looked the part and he acted the part. By visitors in the gallery of the Senate or upon the streets Senator CLARKE was pointed out as a celebrity. It may be said of him that he was not a Senator whose magnificent equipment of heart and mind were used solely for the advancement of the State which had so greatly honored him, but he had the sincere interest in the affairs of the whole Nation at heart. He had a transcending ability for affairs of state which served him well and which made him a master in the discharge of his arduous duties as United States Senator. When he thought he was right he never surrendered his position. He was peculiarly possessed of that power to think big things and do big things and which gave an unlimited sway to his forceful, powerful, and dexterous qualities in the forum of the United States Senate, an opportunity which he craved and which early in his senatorial career marked him as a Member of the greatest law-

making body the world ever saw, with no superiors and few equals. As a member of the Judiciary Committee and by virtue of sheer ability he was a commanding, compelling, and respected figure, especially in questions of constitutional law his advice was eagerly sought and his counsel prevailed. In these capacities he never failed to leave his impress for good upon legislation. As chairman of the great Committee on Commerce he discharged the duties of this position with great credit to himself and lasting benefit to the country. As presiding officer of the Senate his rulings were fair, and in this capacity his knowledge of parliamentary law and his erudition in general were a marvel. Both sides of this historic chamber gave him credit for absolute fairness. He was also a member of the Committee on Military Affairs and Foreign Affairs and other lesser committees. To these committees he carried the same power for good and the same strength of character that marked his work upon other committees.

The archives of the Nation that had honored him and which he in turn honored bear mute but unanswerable testimony that establishes the facts beyond cavil that in his day and generation he well and ably played his part, had been true to the people of Arkansas who signally honored him, and done those things his hands found to do and with a great willingness. That which was accomplished by him, Mr. Speaker, and the ideals for which he contended have done much to make this country the one intended by the fathers—

A land of settled government;
A land of old and just renown,
Where freedom slowly broadens down
From precedent to precedent.

Yes, if you please, a representative government and, in its broadest sense, where the door of opportunity swings open to all alike and where under our institutions it is sought to be underwritten the guaranty that individual worth shall be the test supreme and every man a free man.

ARKANSAS'S TRIBUTE TO MR. CLARKE.

In a short time after the passing of Senator CLARKE the State of Arkansas speedily and with affectionate regard voiced its appreciation of his worth as a man and as a fitting recognition of his great public service by the adoption of a concurrent resolution providing for the placing of his statue in the Hall of Fame, once the old Hall of Representatives and directly located under the great white dome of our Nation's Capitol. There his statue will stand for the years to come, to be viewed and admired by the multitudes that yearly find their way to the seat of the Federal Government. In illustrious company will his statue be, and justly so. There also in this historic chamber are to be found the statues of many of the great men this country has produced from its inception and which has made our Nation the marvel of the world.

There can be seen the statues of Blair and Benton from Missouri; Kirkwood and Harlan of Iowa; Zeb Vance of North Carolina; Ethan Allen of Vermont; Calhoun of South Carolina; Garfield of Ohio; Samuel Adams of Massachusetts; Wisconsin's tribute in the form of the statue of Marquette, who discovered the Mississippi; the imposing form in bronze of that proud and brave man beloved by the South as a whole, Robert E. Lee, whose fortune it was to lead the greatest army the world ever saw—that army in gray, but which on account of great opposing numbers compelled this naked and half-starving army to lay down their arms at Appomattox to the suffering Grant. Yes, and also in this company is found the likeness of Sam Houston and Richard Austin of Texas, two great pioneers that blazed out the way of a great civilization upon our West; to be seen also is the statue of Fulton studying the model of his steamboat; the great Washington of Virginia is there, and many more which time and space forbid me to enumerate. Side by side with another great Arkansan, too, the chaste, the gentle man, the scholar, the lawyer, author, and linguist, Judge U. M. Rose, whose memory to-day is revered by all Arkansans, will stand proudly erect the statue of JAMES P. CLARKE, a kindred soul in the midst of these great national American characters.

SENATOR CLARKE AS A HOME MAN.

Senator CLARKE was a lover of children. On one occasion I saw two boys, one 6 and the other 4 years of age, find their way into his office. The Senator received them graciously. He laid down the affairs of state for their benefit, forgot the contemplation of momentous questions, and for quite a while reveled in the company of these little fellows. Unless invited to do so few people disturbed Senator CLARKE in the privacy of his office, but these children were the exception to the rule and this picture throws a new light on the character of Senator CLARKE unknown to some. He made these children feel that his heart beat in unison with their childish hearts. He invited them to climb upon great mail sacks filled with books and in turn he rollicked with them by insisting that they jump in his arms only to run around and climb upon the mail sacks again and again and jump for him to catch them. On another occasion in going with him from his office to the Senate Chamber well do I remember the meeting he had with two other children, 2 and 4 years of age, attended by their nurse. At this particular time he was disturbed by pending legislation regarding the cotton situation and vital to the South especially. On meeting these children he inquired their names. True to the ever-present tender impulses of his heart for children again for a moment he forgot the important questions that were challenging and demanding his best attention and clamoring for successful conclusion and fondling the smaller child for a few minutes and bending down over and embracing it and then after shaking hands with the older child he bade them good-bye and with a parting injunction and that characteristic swing of his arm, he said: "Gentlemen, I hope our orbits will soon cross again." Also, no man was ever regarded by his own family more as the prince of all men than was Senator CLARKE. On one occasion while a guest in his home an opportunity was afforded to judge his life from this angle. I shall never forget the beautiful scene of domestic happiness that was mine to enjoy while there. "His home seemed to be the center of his affection and the fountain of mutual joy." In the sitting room, at the dinner table, he was the embodiment of all those refinements that were chivalrous and tender and which go to make the home the universe for those that dwell within it. In a mood brimful of merriment and repartee he was the suitor and courtier to the mother of his children, a cavalier in conduct toward his gracious daughter, while from every word addressed to the son that bore his name and on every ligament of the Senator's face proved the extent of the depth of that great love which he bore his only boy; while for all of those collectively that were dependent upon him and which at last go to make up the greatest of our institutions, the American home, there will forever linger with me a picture of domestic happiness that is beautiful to contemplate.

A BORN LAWYER.

As a lawyer the purity of his ethics was never questioned. He loved his profession and entirely respecting it by revering all those things for which it stands and has stood in the world's history. He never profaned this great calling by descending to those methods that were questionable and which is the stock in-trade of the pettifogger. His acts, his words, and his course of action in the pursuit of his chosen profession were always upon the "mountain ranges of the law," and from this viewpoint he respected always true lawyers and in turn commanded respect from them.

Mr. Speaker, time will not permit me to further comment on the pure character of Senator CLARKE or to further enumerate here that which he accomplished in the various fields of activities in which he figured and played a part so important. They are safely chronicled on the bright pages of his country that he loved, and in which he believed, and which he so well and faithfully served. The historian of the future will pay Senator CLARKE that merited tribute that is his and which he so deservedly won. No poor words of mine can add additional luster to the life and fame of him who was my friend and of whom I was proud. In his death a distinguished patriot, an able and pure statesman, and a noble man has gone into the far country. Mr. Speaker, if honesty of purpose, cleanliness of deed, thought, and action, a courage to do that which is right because it is right, if character builded on the teachings of Holy Writ have their reward, and they do, for God lives and rules, then when dissolution came to the chivalrous and intrepid spirit of Senator JAMES P. CLARKE, and the world and all it contained was slipping from beneath him, his dying eyes caught a vision of the beautiful scenes of field elysian, and on "his feverish brow he felt the breath of the morn eternal."

Congressional Record.

SIXTY-FOURTH CONGRESS,
SECOND SESSION.

INDEX.

FROM DECEMBER 4, 1916, TO MARCH 4, 1917
